GEOCAPITOL ENGINEERING, LLC	Jemal's CDC LLC	We propose drilling four, six-inch diameter geotechnical test borings using the hollow stem auger method to evaluate the subsurface conditions. The proposed test boring depths will be 40 feet below the existing ground surface. Drilling equipment will be decontaminated between each hole to avoid cross contamination throughout the site. Upon completion, the geotechnical test borings will be backfilled with grout to the existing ground surface within 24-hours. The borehole will be tremie-grouted in one continuous operation with a positive displacement pump using a bentonite slurry mix from the bottom of the borehole upward. Drilling spoils including soils and water from the test borings will be containerized in 55-gallon drums to be removed for disposal after chemical laboratory results of the spoils have been received and reviewed. Spoils will be disposed of in accordance with Federal and District laws and regulations.
JOHN FORMANT	JENKINS HILL PROPERTIES	Proposed construction will consist of building a four-story 5000 square foot structure. The structure will have a sublevel throughout its entire floor plan. As a result, a geotechnical study consisting of two test borings has been requested for the project. The test borings will be done in readily accessible areas within existing gravel covered parking area behind the existing structure <del>as other areas were not accessible</del>

MR BALLPARK 4, LLC.; RPS, INC.	MR Ballpark 4, LLC.	Environmental soil borings for due diligence investigation. Advance a series of 10 environmental soil borings at the subject site to collect soil and groundwater samples for field screening and laboratory analysis. The soil borings are being conducted as part of a due diligence investigation associated with a real estate transaction. Investigation Derived Waste -IDW- will be laboratory tested and removed from the property for disposal. Permanent casing will not be used as the proposed borings will be abandoned and grouted upon the collection of grab soil and groundwater samples. Borings will only be advanced into the upper level of the surficial aquifer to facilitate the collection of groundwater samples and will not extend through the surficial water bearing zone. Ten Direct-Push -Geoprobe- soil borings -GP-1 through GP-10- for grab soil and groundwater samples. Borings to be grouted upon completion. No well installations. The soil boring diameter will be two inches by max depth of 25 feet, as per site plans, work plan report, DDOE-DC Well Construction/Schematic Forms. Work will be conducted under DDOE regulation.

The investigation will include conducting up to six direct push borings to a depth of up to 20 feet below ground surface. Up to two soil samples will be collected from each boring location for a total of 12 samples. Each sample will be analyzed for volatile organic compounds VOC, SVOC, and petroleum hydrocarbons gasoline and diesel range organics. If groundwater is encountered during advancement of the borings a groundwater sample will be collected and submitted instead of a second soil sample from the boring location. Selection of soil samples for laboratory testing will be based on field observations, staining, odor, organic vapor instrument readings. <del>Please see the attached Hydration Method sheet for additional backfilling information.</del>
