NOTES TO FINANCIAL STATEMENTS

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**A. Accounting Practices**

Unison Health Plan of the Capital Area, Inc. (the "Company") had a contract (the "Contract") with the Government of the District of Columbia, Office of Contracting and Procurement (the "District"), to provide health care services to Medicaid and Health Care Alliance ("Alliance"), a program for uninsured children and adults, eligible beneficiaries in the District of Columbia. This contract represented 100% of the Company's direct written premiums and was effective through April 30, 2013. The District executed an extension of the Company's provider contract for the period from May 1, 2013 to June 30, 2013. Effective July 1, 2013, the contract expired and the Company's operations were discontinued.

The financial statements of the Company are presented on the basis of accounting practices prescribed or permitted by the District of Columbia Department of Insurance, Securities, and Banking (the "DISB").

The Department recognizes only statutory accounting practices, prescribed and permitted by the District of Columbia, for determining and reporting the financial condition and results of operations of a health maintenance organization ("HMO"), for determining its solvency under District of Columbia Insurance Law. The state prescribes the use of the National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures manual ("NAIC SAP") in effect for the accounting periods covered in the statutory basis financial statements.

No significant differences exist between the practices prescribed or permitted by the District of Columbia and those prescribed or permitted by the NAIC SAP that materially affect the statutory basis net (loss) income and capital and surplus as illustrated in the table below:

20. FAIR VALUE MEASUREMENT

The NAIC SAP defines fair value, establishes a framework for measuring fair value, and outlines the disclosure requirements related to fair value measurements. The fair value hierarchy is as follows:

Level 1 — Quoted (unadjusted) prices for identical assets in active markets.

Level 2 — Other observable inputs, either directly or indirectly, including:

- Quoted prices for similar assets in active markets;
- Quoted prices for identical or similar assets in nonactive markets (few transactions, limited information, noncurrent prices, high variability over time, etc.);
- Inputs other than quoted prices that are observable for the asset (interest rates, yield curves, volatilities, default rates, etc.);
- Inputs that are derived principally from or corroborated by other observable market data.

Level 3 — Unobservable inputs that cannot be corroborated by observable market data.

The estimated fair values of bonds and short-term investments are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service (“pricing service”), which generally uses quoted prices or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, non-binding broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to a secondary pricing source; prices reported by its custodian, its investment consultant and third-party investment advisors. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. The Company’s internal price verification procedures and review of fair value methodology documentation provided by independent pricing services have not historically resulted in an adjustment in the prices obtained from the pricing service.

In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest-level input that is significant to the fair value measurement in its entirety. The Company’s assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability.

A. Fair Value
