# CareFirst BlueCross BlueShield Part III Actuarial Memorandum

#### 4.1 Redacted Actuarial Memorandum

CareFirst is making no redactions so both Actuarial Memorandum submissions are the same.

#### 4.2 General Information Section

#### **Company Identifying Information:**

- Company Legal Name: Group Hospitalization and Medical Services, Inc. (GHMSI) NAIC # 53007
- State: District of ColumbiaHIOS Issuer ID: 78079
- Market: Small Groups (On Exchange)
- Effective Date: 1/1/2023 and quarterly incremental "trend" increases effective 4/1/2023, 7/1/2023 and 10/1/2023.
- Company Filing Number: 2635
- SERFF Filing Number: CFAP-133218006

#### **Company Contact Information:**

- Primary Contact Name: Mr. Gregory Sucher, FSA, MAAA
- Primary Contact Telephone Number: 410-998-5988
- Primary Contact E-Mail Address: Gregory.Sucher@CareFirst.com

#### 4.3 Proposed Rate Changes (Small Group market)

Base rates are changing 13.3% on average for 1Q23. The range is 10.5% to 15.8%. The estimated average base rate changes for 2Q23, 3Q23, and 4Q23 are 13.9%, 14.5% and 15.1%, respectively. This filing applies to all new and renewing, in-force business in the guaranteed renewable, non-grandfathered, ACA, metaled benefit plans. The number of policyholders affected by this rate change is 13,353.

#### Reason for Rate Change(s):

The main drivers supporting the rate change are 1) increase in the base period claims experience of the combined pool, 2) trend, and 3) increases in assumed plan actuarial values.

#### 4.4 Market Experience (Combined Individual/Small Group market)

Our SRP reflects all covered lives for every non-grandfathered product in our market per 45 CFR Part § 156.80 (d).

#### 4.4.1 Experience and Current Period Premium, Claims, and Enrollment

The incurred period is 1/1/2021 through 12/31/2021, as required.

Paid Through Date: 2/28/2022 Current Date: 2/28/2022

Premiums (prior to MLR rebates) in Experience Period: \$232,998,399

**Experience Period Member Months: 357,578** 

**Current Date Members: 30,580** 

#### Allowed and Incurred Claims Incurred During the Experience Period

#### **Allowed Claims**

• Processed through issuer's claim system: \$251,843,294

• Processed outside issuer's claim system: \$0

• IBNR: \$3,527,274

#### **Incurred Claims**

• Processed through issuer's claim system: \$227,255,077

• Processed outside issuer's claim system: \$0

• IBNR: \$3,168,537

#### Method used for determining Allowed Claims

The allowed claims come directly from our claim records and account for capitations by applying contracted PMPM amounts directly to enrollment from the experience period. Drug rebates from the experience period are also included.

#### Support for IBNR estimates

Our estimates of IBNR paid claims were derived using a "chain and ladder" model based on the most recent 36 months to derive the completion factor and IBNR for each incurred month. Estimates of IBNR allowed claims were derived using the same completion factors as those estimated based on paid claims.

#### 4.4.2 Benefit Categories

Inpatient (hospital), outpatient (hospital), professional, other medical (non-capitated ambulance, home health care, durable medical equipment, prosthetics, supplies, vision exams, pediatric dental services and other), prescription drug & capitations.

#### 4.4.3 Projection Factors

#### 4.4.3.1 Trend Factors

#### Trend Factors (Cost/Utilization):

Exhibit 8 in the Memorandum contains our selected annual utilization and unit cost trends by service category. Unit cost and utilization trends were set by service category to produce the overall anticipated trend of 8.0%, which is a decrease compared to the 8.6% trend assumed in our prior filing. Current observed medical trends as of 202112 are 15.7%, up from -2.1% in 202012. Current observed drug trends are 6.9% as of 202112, down from 7.1% in 202012. The composite medical and drug trend is 13.0% as of 202112, up from 0.6% in 202012.

When normalized for induced demand, network, and demographics, the observed composite trends of 13.0% in 202112 and 0.6% in 202012 become 13.5% and 0.8%, respectively.

Using the proposed trend factor, in combination with other assumptions such as morbidity, etc., the annualized allowed PMPM change between 2023 and 2021 represented in this filing is 6.4%.

#### 4.4.3.2 Adjustments to Trended EHB Allowed Claims PMPM

#### **Morbidity Adjustment:**

Exhibit 4 in our memorandum contains support for this adjustment. To measure the projected morbidity of our population, we split our projected population into cohorts defined by metal tier and membership type. Membership type is defined as new member, existing member, or transfer from other lines of business. Consistent with the rules in the 2023 Unified Rate Review Instructions, we began our morbidity projection by normalizing allowed claims for each of the cohorts outlined above for projected changes in age, gender, network and induced utilization.

We have not reflected any morbidity adjustments to the base period normalized allowed PMPMs by metal tier for the existing and transfer membership types. Exhibit 4 demonstrates how these PMPMs are unchanged from the current year YTD to remainder of current year. For the new membership type we have assumed a claims PMPM by metal equal to that of the existing members.

The resulting morbidity calculation is completed in steps split by year:

- Once the remainder of current year (2022) is completed, the membership and claims by metal are combined to derive a total estimate for the year.
- This result carries over to the rating year (2023) as the metal specific normalized PMPMs for the existing members.
- The assumed claims PMPMs by metal for the new members are again assumed to equal those for the existing members.
- Transfer members PMPMs are treated separately and reflect base period amounts projected forward. Our projection factor for these members is 1.000.
- Once these PMPMs are set, the final morbidity calculation is driven by the projected member months at these levels.

The total morbidity change from 2021 to 2023 is expected to be -1.4%, which is the factor used in Exhibit 1 in the calculation of the market adjustment index rate.

#### **Demographic Shift:**

Exhibit 6 in the Memorandum contains support for our adjustment due to the anticipated change in the average age of this population between the experience and projection periods. Our methodology measures the change in average demographic factor between the base and rating periods. The demographic factors used are from an internal age/gender curve with an approximate 4.5:1 ratio (age 64+ to age 21 factors). Factors for both time periods are weighted using member months and the ratio of the two is applied as our market level adjustment.

#### Plan Design Changes:

Exhibit 5 in the Memorandum details our support for this adjustment to account for anticipated changes in the average utilization of services due to differences in average cost sharing requirements between the experience and projection periods. Our methodology measures the change in the average induced utilization factor between the base and rating periods. The factors used are the metal level factors from the federal risk adjustment program. Once the average internal pricing AV, weighted by member months, is determined for both the experience and rating periods the linearly interpolated factor is determined. The ratio of these two factors is applied as our market level adjustment.

#### Other Adjustments:

Exhibit 7 in the Memorandum details our support for these adjustments. We are proposing additional other adjustments for changes to our capitation fees and drug rebates.

#### 4.4.3.3 Manual Rate Adjustments

Not applicable, as experience was determined to be fully credible. The Unified Rate Review Template (URRT) forces the use of a projection period ending twelve months after the effective date. This presumes all rates change on the effective date. This is inconsistent with our understanding of the DC small group market post-1/1/14. In this filling, we are using a projection period ending with 3/31/2024 for our first quarter 2023 Index Rate Projection since business may be sold with this rate through 3/31/2023 and a one-year rate guarantee applies. The trends used in the URRT therefore will not produce the correct projected allowed amount PMPM. As such, we have assigned this projected amount a credibility factor of 0% and have entered the projected amounts corresponding to those in our rate filling using the Manual Rate section.

#### 4.4.3.4 Credibility of Experience

Exhibit 2 in the Memorandum contains a summary of our base period experience, including member months. We have assigned full credibility to this experience.

#### 4.4.3.5 Establishing the Index Rate

The experience period index rate for this filing is \$713.53 and the projection period index rate is \$808.33. Both rates and the adjustments made to develop the projected amount from the experience period amount can be found on Exhibit 1 of the Memorandum. Specifically, these adjustments correspond to those outlined in sections 4.4.3.1 and 4.4.3.2.

#### 4.4.3.6 Development of the Market-wide Adjusted Index Rate

The Market-wide Adjusted Index Rate for the Small Group market is \$731.45 and is derived by multiplying the projection period index rate with the market level adjustments for the risk adjustment program. Details for the risk adjustment program can be found below.

#### Reinsurance

There are no reinsurance recoveries applicable to this market.

#### Risk Adjustment Payment/Charge:

The Experience Period Risk Adjustment transfers in the URRT are based on the most recent Wakely results.

Our projected 2023 risk adjustment transfers, found in Exhibit 9, have been calculated consistent with our membership and morbidity projections found elsewhere in this filing. To project the risk adjustment factors from 2021 to 2023, we have assumed an increase in the statewide premium of 15.8% which reflects an estimate of an average 3.5% increase in 2022 and 11.9% increase in 2023. We have assumed that our CFI Small Group market share will increase from 77.8% in 2021 to 78.5% in 2023. We have assumed that our CFI Small Group PLRS ratio to the state will decrease from 1.018 in 2021 to 1.015 in 2023. The resultant estimate of risk adjustment is that the GHMSI receivable transfer PMPM for the Small Group market will increase from \$63.69 in 2021 to \$72.04 in 2023. Combined with the \$72.04 is a projected HCRP net PMPM payable of -\$1.13, which results in a total projected risk adjustment receivable of \$70.91.

The risk adjustment estimates above are calculated separately for the Individual market and the Small Group market as required. This approach is different than the blended approach used to calculate the Index Rate and therefore there is an inconsistency between the risk assumed in rates and the claims data used in the calculation.

#### **Exchange User Fees:**

There are no applicable exchange user fees since the rates in this filing are not offered on the Federal Marketplace.

#### 4.4.4 Plan Adjusted Index Rate

Exhibit 11 in the Memorandum displays the adjustments made for each plan. Every plan adjusted index rate is developed from the market adjusted index rate using only the allowable plan level modifiers as follows:

Actuarial value and cost-sharing design of the plan: The actuarial value for each plan was
determined using our own internal model and estimates the ratio of paid to allowed dollars given
that plan's benefit design and the assumed allowed amount consistent with the projection period
index rate. The assumed actuarial values also include a multiplicative factor applied uniformly
across plans. The application of the AV to an index rate that is the same across all plans results in

a member months weighted average AV (and resulting average paid PMPM assumed in rates) that may be materially deficient depending on the distribution of projected membership and actual cost. This factor accounts for the deficiency specific to this block of business. The URRT instructions state that this adjustment may "...take into account the benefit differences and *utilization differences due to differences in cost-sharing.*" As a result, our plan adjusted index rates also include adjustments to account for the impact the metal level has on utilization.

- Provider network: All plans offered use the PPO network.
- Benefits in addition to EHBs: There is an adjustment to account for abortion coverage (which are offered in addition to EHBs).
- Administrative costs: See Exhibit 10A in the Memorandum for the assumed values of the following additional items.
  - 1. Administrative Expense (G&A)
  - 2. Broker Commissions & Fees
  - 3. Contribution to Reserve (Post-Tax)
  - 4. State Premium Tax
  - 5. Federal Income Tax (FIT)
  - 6. Risk Adjustment User Fee
  - 7. Patient-Centered Outcomes Research Institute Fee (PCORI)
  - 8. Exchange Assessment Fee

For each plan, we have taken the applicable adjustment factor from each category above and multiplied them by the market adjusted index rate to derive each plan adjusted index rate.

#### 4.4.5 Calibration

#### **Age Curve Calibration**

We have calibrated to the rounded weighted average age which was determined as the age for the factor nearest our projected average factor. We have used the standard DC age curve factors and weighted them using member months in our calculation.

A demonstration of how the plan adjusted index rates and the age curve are used to generate the schedule of premium rates for each plan can be found in Exhibit 13.

#### **Geographic Factor Calibration**

We have elected not to rate for geographic region.

#### **Tobacco Use Rating Factor Calibration**

We have elected not to rate for tobacco usage.

#### 4.4.6 Consumer Adjusted Premium Rate Development

The premium rate that a given consumer will be charged is calculated by first taking the plan adjusted index rate for that member's chosen plan and dividing by the projected average age rating factor. The resulting value is the base rate for that plan. The final step in determining a consumer adjusted premium rate is to take the rate from the first step and multiply it by the corresponding factor for that member's age from the standard DC age curve. Rate charts are provided for all the consumer adjusted premiums.

#### 4.5 Projected Loss Ratio

The projected loss ratio for the rates provided in this file, using the Federally-prescribed MLR methodology, is 87.3% for the Small Group market and 87.7% for the combined Individual/Small Group market. Details behind this calculation can be found in Exhibit 10B.

#### 4.6 Plan Product Information

#### 4.6.1 AV Metal Values

The majority of our 2023 plans include varying cost share levels for some services that depend on the setting in which care is delivered. The HHS AV calculator was used to compute two separate AVs for each impacted plan – one which applied the higher level of cost-share, and one which applied the lower level of cost-share. The results were blended assuming 81% of the designated services are rendered in higher cost-share setting and the remaining 19% at the lower, consistent with experience from our small group and individual markets. Plans without these features used the AV calculator without modification

Additional details regarding the unique plan designs not accommodated by the HHS AV Calculator along with printouts for each plan are provided in the "Actuarial Memorandum" section of the Supporting Documentation tab of the SERFF filing.

#### 4.6.2 Membership Projections

The membership projections found in Worksheet 2 of the URRT were developed from enrollment as of 2/28/2022 using assumptions for termination rates, new sales and transfers. The projections also incorporate any plan mappings anticipated between that month and the rating period. For new plan offerings where no plans are being uniformly modified into them, a minimum level of enrollment was assumed.

Also, Section III on Worksheet 2 of the URRT is out of balance with worksheet 1. This is because Worksheet 1 is based on the combined Individual/Small Group experience per the DC HBX Carrier Manual, while Worksheet 2 includes only the Small Group plans. Therefore, because of Individual being included at the pool level but not on the plan level, there is a large difference between the 2 worksheets.

#### 4.6.3 Terminated Plans and Products

Plan mappings from the experience period to the rating period can be found in Appendix – Mapping.

#### 4.6.4 Plan Type

Each plan in Worksheet 2, Section I of the URRT contains a plan type that describes the plan exactly.

#### 4.7 Miscellaneous Instructions

#### 4.7.1 Effective Rate Review Information (Optional)

We have no additional exhibits.

#### 4.7.2 Reliance

We do not have any reliance to state.

#### 4.7.3 Actuarial Certification

Included in the Memorandum.

# Group Hospitalization & Medical Services Inc. d.b.a. CareFirst BlueCross BlueShield (NAIC # 53007)

Rate Filing # 2635
D.C. Small Group Products
Rate Filing Effective 1/1/2023

**Actuarial Memorandum** 

# **Group Hospitalization & Medical Services Inc.** (NAIC # 53007)

# H.R. 3950 - Public Law 111-148 - Patient Protection and Affordable Care Act (ACA) **D.C. Small Group Products** Rate Filing Effective 1/1/2023 **Actuarial Certification**

- I, Gregory Sucher, am a(n) Actuary with CareFirst GHMSI doing business as CareFirst BlueCross BlueShield. I am a member of the American Academy of Actuaries (AAA) in good standing and have the education and experience necessary to perform the work. Rates were developed in accordance with the appropriate Actuarial Standards of Practice (ASOPs) and the AAA's Code of Professional Conduct. While other ASOPs apply, a sample listing is below.
- i. ASOP No. 5, Incurred Health and Disability Claims
- ii. ASOP No. 8, Regulatory Filings for Health Plan Entities
- iii. ASOP No. 12, Risk Classification
- iv. ASOP No. 23, Data Quality
- v. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages vi. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health and **Benefit Plans**
- vii. ASOP No. 41, Actuarial Communications
- viii. ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act

I have been involved in the development of these rates, and to the best of my knowledge and understanding, the rates in this filing have been developed in accordance with the available regulations and guidance. Should new guidance be released, this filing may be revised. I certify that this filing has been prepared based on sound and commonly accepted actuarial principles, practices and assumptions in the aggregate for the legal entity.

I further certify the following:

- 1. The projected Index Rate is:
  - a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
  - b. Developed in compliance with the applicable Actuarial Standards of Practice
  - c. Reasonable in relation to the benefits provided and the population anticipated to be covered
  - d. Neither excessive nor deficient
- 2. The Index Rate and only the allowable modifiers as described in 45 CFR § 156.80(d)(1) and 45 CFR § 156.80(d)(2) were used to generate plan level rates. These rates have been calibrated to account for age (geography and tobacco are not applicable).
- 3. Consistent with 45 CFR § 156.135, the 2023 HHS Actuarial Values (AV) Calculator was used to determine the AV metal values shown in Worksheet 2 of Part I of the Unified Rate Review Template (URRT) for all plans except those specified. Where necessary, the AVs of the benefits proposed have been calculated with minimal modifications to the AV calculator as described in the Actuarial Memorandum.

As a qualifier to the opinion, the URRT does not demonstrate the process used by the issuer to develop the rates. Rather it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Marketplaces, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

<sup>\*</sup>Rating factors by cohort for the rating period are based on average factors for each cohort from the current year to date. Weights are based on expected distribution of member months.

<sup>\*\*</sup>The rating period average age is determined from the member weighted average factor. Specifically it is linearly interpolated using the two age factors on the curve surrounding the member weighted average factor.

<sup>\*\*\*</sup>Applied uniformly to all plans

## CareFirst BlueCross BlueShield Part III Actuarial Memorandum

#### 4.1 Redacted Actuarial Memorandum

CareFirst is making no redactions so both Actuarial Memorandum submissions are the same.

#### 4.2 General Information Section

#### **Company Identifying Information:**

- Company Legal Name: Group Hospitalization and Medical Services, Inc. (GHMSI) NAIC # 53007
- State: District of ColumbiaHIOS Issuer ID: 78079
- Market: Small Groups (On Exchange)
- Effective Date: 1/1/2023 and quarterly incremental "trend" increases effective 4/1/2023, 7/1/2023 and 10/1/2023.
- Company Filing Number: 2635
- SERFF Filing Number: CFAP-133218006

#### **Company Contact Information:**

- Primary Contact Name: Mr. Gregory Sucher, FSA, MAAA
- Primary Contact Telephone Number: 410-998-5988
- Primary Contact E-Mail Address: Gregory.Sucher@CareFirst.com

#### 4.3 Proposed Rate Changes (Small Group market)

Base rates are changing 13.3% on average for 1Q23. The range is 10.5% to 15.8%. The estimated average base rate changes for 2Q23, 3Q23, and 4Q23 are 13.9%, 14.5% and 15.1%, respectively. This filing applies to all new and renewing, in-force business in the guaranteed renewable, non-grandfathered, ACA, metaled benefit plans. The number of policyholders affected by this rate change is 13,353.

#### Reason for Rate Change(s):

The main drivers supporting the rate change are 1) increase in the base period claims experience of the combined pool, 2) trend, and 3) increases in assumed plan actuarial values.

#### 4.4 Market Experience (Combined Individual/Small Group market)

Our SRP reflects all covered lives for every non-grandfathered product in our market per 45 CFR Part § 156.80 (d).

#### 4.4.1 Experience and Current Period Premium, Claims, and Enrollment

The incurred period is 1/1/2021 through 12/31/2021, as required.

Paid Through Date: 2/28/2022 Current Date: 2/28/2022

Premiums (prior to MLR rebates) in Experience Period: \$232,998,399

**Experience Period Member Months: 357,578** 

**Current Date Members: 30,580** 

#### Allowed and Incurred Claims Incurred During the Experience Period

#### **Allowed Claims**

• Processed through issuer's claim system: \$251,843,294

• Processed outside issuer's claim system: \$0

• IBNR: \$3,527,274

#### **Incurred Claims**

• Processed through issuer's claim system: \$227,255,077

• Processed outside issuer's claim system: \$0

• IBNR: \$3,168,537

#### Method used for determining Allowed Claims

The allowed claims come directly from our claim records and account for capitations by applying contracted PMPM amounts directly to enrollment from the experience period. Drug rebates from the experience period are also included.

#### Support for IBNR estimates

Our estimates of IBNR paid claims were derived using a "chain and ladder" model based on the most recent 36 months to derive the completion factor and IBNR for each incurred month. Estimates of IBNR allowed claims were derived using the same completion factors as those estimated based on paid claims.

#### 4.4.2 Benefit Categories

Inpatient (hospital), outpatient (hospital), professional, other medical (non-capitated ambulance, home health care, durable medical equipment, prosthetics, supplies, vision exams, pediatric dental services and other), prescription drug & capitations.

#### 4.4.3 Projection Factors

#### 4.4.3.1 Trend Factors

#### Trend Factors (Cost/Utilization):

Exhibit 8 in the Memorandum contains our selected annual utilization and unit cost trends by service category. Unit cost and utilization trends were set by service category to produce the overall anticipated trend of 8.0%, which is a decrease compared to the 8.6% trend assumed in our prior filing. Current observed medical trends as of 202112 are 15.7%, up from -2.1% in 202012. Current observed drug trends are 6.9% as of 202112, down from 7.1% in 202012. The composite medical and drug trend is 13.0% as of 202112, up from 0.6% in 202012.

When normalized for induced demand, network, and demographics, the observed composite trends of 13.0% in 202112 and 0.6% in 202012 become 13.5% and 0.8%, respectively.

Using the proposed trend factor, in combination with other assumptions such as morbidity, etc., the annualized allowed PMPM change between 2023 and 2021 represented in this filing is 6.4%.

#### 4.4.3.2 Adjustments to Trended EHB Allowed Claims PMPM

#### **Morbidity Adjustment:**

Exhibit 4 in our memorandum contains support for this adjustment. To measure the projected morbidity of our population, we split our projected population into cohorts defined by metal tier and membership type. Membership type is defined as new member, existing member, or transfer from other lines of business. Consistent with the rules in the 2023 Unified Rate Review Instructions, we began our morbidity projection by normalizing allowed claims for each of the cohorts outlined above for projected changes in age, gender, network and induced utilization.

We have not reflected any morbidity adjustments to the base period normalized allowed PMPMs by metal tier for the existing and transfer membership types. Exhibit 4 demonstrates how these PMPMs are unchanged from the current year YTD to remainder of current year. For the new membership type we have assumed a claims PMPM by metal equal to that of the existing members.

The resulting morbidity calculation is completed in steps split by year:

- Once the remainder of current year (2022) is completed, the membership and claims by metal are combined to derive a total estimate for the year.
- This result carries over to the rating year (2023) as the metal specific normalized PMPMs for the existing members.
- The assumed claims PMPMs by metal for the new members are again assumed to equal those for the existing members.
- Transfer members PMPMs are treated separately and reflect base period amounts projected forward. Our projection factor for these members is 1.000.
- Once these PMPMs are set, the final morbidity calculation is driven by the projected member months at these levels.

The total morbidity change from 2021 to 2023 is expected to be -1.4%, which is the factor used in Exhibit 1 in the calculation of the market adjustment index rate.

#### **Demographic Shift:**

Exhibit 6 in the Memorandum contains support for our adjustment due to the anticipated change in the average age of this population between the experience and projection periods. Our methodology measures the change in average demographic factor between the base and rating periods. The demographic factors used are from an internal age/gender curve with an approximate 4.5:1 ratio (age 64+ to age 21 factors). Factors for both time periods are weighted using member months and the ratio of the two is applied as our market level adjustment.

#### Plan Design Changes:

Exhibit 5 in the Memorandum details our support for this adjustment to account for anticipated changes in the average utilization of services due to differences in average cost sharing requirements between the experience and projection periods. Our methodology measures the change in the average induced utilization factor between the base and rating periods. The factors used are the metal level factors from the federal risk adjustment program. Once the average internal pricing AV, weighted by member months, is determined for both the experience and rating periods the linearly interpolated factor is determined. The ratio of these two factors is applied as our market level adjustment.

#### Other Adjustments:

Exhibit 7 in the Memorandum details our support for these adjustments. We are proposing additional other adjustments for changes to our capitation fees and drug rebates.

#### 4.4.3.3 Manual Rate Adjustments

Not applicable, as experience was determined to be fully credible. The Unified Rate Review Template (URRT) forces the use of a projection period ending twelve months after the effective date. This presumes all rates change on the effective date. This is inconsistent with our understanding of the DC small group market post-1/1/14. In this filling, we are using a projection period ending with 3/31/2024 for our first quarter 2023 Index Rate Projection since business may be sold with this rate through 3/31/2023 and a one-year rate guarantee applies. The trends used in the URRT therefore will not produce the correct projected allowed amount PMPM. As such, we have assigned this projected amount a credibility factor of 0% and have entered the projected amounts corresponding to those in our rate filling using the Manual Rate section.

#### 4.4.3.4 Credibility of Experience

Exhibit 2 in the Memorandum contains a summary of our base period experience, including member months. We have assigned full credibility to this experience.

#### 4.4.3.5 Establishing the Index Rate

The experience period index rate for this filing is \$713.53 and the projection period index rate is \$808.33. Both rates and the adjustments made to develop the projected amount from the experience period amount can be found on Exhibit 1 of the Memorandum. Specifically, these adjustments correspond to those outlined in sections 4.4.3.1 and 4.4.3.2.

#### 4.4.3.6 Development of the Market-wide Adjusted Index Rate

The Market-wide Adjusted Index Rate for the Small Group market is \$731.45 and is derived by multiplying the projection period index rate with the market level adjustments for the risk adjustment program. Details for the risk adjustment program can be found below.

#### Reinsurance

There are no reinsurance recoveries applicable to this market.

#### Risk Adjustment Payment/Charge:

The Experience Period Risk Adjustment transfers in the URRT are based on the most recent Wakely results.

Our projected 2023 risk adjustment transfers, found in Exhibit 9, have been calculated consistent with our membership and morbidity projections found elsewhere in this filing. To project the risk adjustment factors from 2021 to 2023, we have assumed an increase in the statewide premium of 15.8% which reflects an estimate of an average 3.5% increase in 2022 and 11.9% increase in 2023. We have assumed that our CFI Small Group market share will increase from 77.8% in 2021 to 78.5% in 2023. We have assumed that our CFI Small Group PLRS ratio to the state will decrease from 1.018 in 2021 to 1.015 in 2023. The resultant estimate of risk adjustment is that the GHMSI receivable transfer PMPM for the Small Group market will increase from \$63.69 in 2021 to \$72.04 in 2023. Combined with the \$72.04 is a projected HCRP net PMPM payable of -\$1.13, which results in a total projected risk adjustment receivable of \$70.91.

The risk adjustment estimates above are calculated separately for the Individual market and the Small Group market as required. This approach is different than the blended approach used to calculate the Index Rate and therefore there is an inconsistency between the risk assumed in rates and the claims data used in the calculation.

#### **Exchange User Fees:**

There are no applicable exchange user fees since the rates in this filing are not offered on the Federal Marketplace.

#### 4.4.4 Plan Adjusted Index Rate

Exhibit 11 in the Memorandum displays the adjustments made for each plan. Every plan adjusted index rate is developed from the market adjusted index rate using only the allowable plan level modifiers as follows:

Actuarial value and cost-sharing design of the plan: The actuarial value for each plan was
determined using our own internal model and estimates the ratio of paid to allowed dollars given
that plan's benefit design and the assumed allowed amount consistent with the projection period
index rate. The assumed actuarial values also include a multiplicative factor applied uniformly
across plans. The application of the AV to an index rate that is the same across all plans results in

a member months weighted average AV (and resulting average paid PMPM assumed in rates) that may be materially deficient depending on the distribution of projected membership and actual cost. This factor accounts for the deficiency specific to this block of business. The URRT instructions state that this adjustment may "...take into account the benefit differences and *utilization differences due to differences in cost-sharing.*" As a result, our plan adjusted index rates also include adjustments to account for the impact the metal level has on utilization.

- Provider network: All plans offered use the PPO network.
- Benefits in addition to EHBs: There is an adjustment to account for abortion coverage (which are offered in addition to EHBs).
- Administrative costs: See Exhibit 10A in the Memorandum for the assumed values of the following additional items.
  - 1. Administrative Expense (G&A)
  - 2. Broker Commissions & Fees
  - 3. Contribution to Reserve (Post-Tax)
  - 4. State Premium Tax
  - 5. Federal Income Tax (FIT)
  - 6. Risk Adjustment User Fee
  - 7. Patient-Centered Outcomes Research Institute Fee (PCORI)
  - 8. Exchange Assessment Fee

For each plan, we have taken the applicable adjustment factor from each category above and multiplied them by the market adjusted index rate to derive each plan adjusted index rate.

#### 4.4.5 Calibration

#### **Age Curve Calibration**

We have calibrated to the rounded weighted average age which was determined as the age for the factor nearest our projected average factor. We have used the standard DC age curve factors and weighted them using member months in our calculation.

A demonstration of how the plan adjusted index rates and the age curve are used to generate the schedule of premium rates for each plan can be found in Exhibit 13.

#### **Geographic Factor Calibration**

We have elected not to rate for geographic region.

#### **Tobacco Use Rating Factor Calibration**

We have elected not to rate for tobacco usage.

#### 4.4.6 Consumer Adjusted Premium Rate Development

The premium rate that a given consumer will be charged is calculated by first taking the plan adjusted index rate for that member's chosen plan and dividing by the projected average age rating factor. The resulting value is the base rate for that plan. The final step in determining a consumer adjusted premium rate is to take the rate from the first step and multiply it by the corresponding factor for that member's age from the standard DC age curve. Rate charts are provided for all the consumer adjusted premiums.

#### 4.5 Projected Loss Ratio

The projected loss ratio for the rates provided in this file, using the Federally-prescribed MLR methodology, is 87.3% for the Small Group market and 87.7% for the combined Individual/Small Group market. Details behind this calculation can be found in Exhibit 10B.

#### 4.6 Plan Product Information

#### 4.6.1 AV Metal Values

The majority of our 2023 plans include varying cost share levels for some services that depend on the setting in which care is delivered. The HHS AV calculator was used to compute two separate AVs for each impacted plan – one which applied the higher level of cost-share, and one which applied the lower level of cost-share. The results were blended assuming 81% of the designated services are rendered in higher cost-share setting and the remaining 19% at the lower, consistent with experience from our small group and individual markets. Plans without these features used the AV calculator without modification

Additional details regarding the unique plan designs not accommodated by the HHS AV Calculator along with printouts for each plan are provided in the "Actuarial Memorandum" section of the Supporting Documentation tab of the SERFF filing.

#### 4.6.2 Membership Projections

The membership projections found in Worksheet 2 of the URRT were developed from enrollment as of 2/28/2022 using assumptions for termination rates, new sales and transfers. The projections also incorporate any plan mappings anticipated between that month and the rating period. For new plan offerings where no plans are being uniformly modified into them, a minimum level of enrollment was assumed.

Also, Section III on Worksheet 2 of the URRT is out of balance with worksheet 1. This is because Worksheet 1 is based on the combined Individual/Small Group experience per the DC HBX Carrier Manual, while Worksheet 2 includes only the Small Group plans. Therefore, because of Individual being included at the pool level but not on the plan level, there is a large difference between the 2 worksheets.

#### 4.6.3 Terminated Plans and Products

Plan mappings from the experience period to the rating period can be found in Appendix – Mapping.

#### 4.6.4 Plan Type

Each plan in Worksheet 2, Section I of the URRT contains a plan type that describes the plan exactly.

#### 4.7 Miscellaneous Instructions

#### 4.7.1 Effective Rate Review Information (Optional)

We have no additional exhibits.

#### 4.7.2 Reliance

We do not have any reliance to state.

#### 4.7.3 Actuarial Certification

Included in the Memorandum.

## Group Hospitalization & Medical Services Inc. d.b.a. CareFirst BlueCross BlueShield (NAIC # 53007)

Rate Filing # 2635
D.C. Small Group Products
Rate Filing Effective 1/1/2023

**Actuarial Memorandum** 

## **Group Hospitalization & Medical Services Inc.** (NAIC # 53007)

## H.R. 3950 - Public Law 111-148 - Patient Protection and Affordable Care Act (ACA) **D.C. Small Group Products** Rate Filing Effective 1/1/2023 **Actuarial Certification**

- I, Gregory Sucher, am a(n) Actuary with CareFirst GHMSI doing business as CareFirst BlueCross BlueShield. I am a member of the American Academy of Actuaries (AAA) in good standing and have the education and experience necessary to perform the work. Rates were developed in accordance with the appropriate Actuarial Standards of Practice (ASOPs) and the AAA's Code of Professional Conduct. While other ASOPs apply, a sample listing is below.
- i. ASOP No. 5, Incurred Health and Disability Claims
- ii. ASOP No. 8, Regulatory Filings for Health Plan Entities
- iii. ASOP No. 12, Risk Classification
- iv. ASOP No. 23, Data Quality
- v. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages vi. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health and **Benefit Plans**
- vii. ASOP No. 41, Actuarial Communications
- viii. ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act

I have been involved in the development of these rates, and to the best of my knowledge and understanding, the rates in this filing have been developed in accordance with the available regulations and guidance. Should new guidance be released, this filing may be revised. I certify that this filing has been prepared based on sound and commonly accepted actuarial principles, practices and assumptions in the aggregate for the legal entity.

I further certify the following:

- 1. The projected Index Rate is:
  - a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
  - b. Developed in compliance with the applicable Actuarial Standards of Practice
  - c. Reasonable in relation to the benefits provided and the population anticipated to be covered
  - d. Neither excessive nor deficient
- 2. The Index Rate and only the allowable modifiers as described in 45 CFR § 156.80(d)(1) and 45 CFR § 156.80(d)(2) were used to generate plan level rates. These rates have been calibrated to account for age (geography and tobacco are not applicable).
- 3. Consistent with 45 CFR § 156.135, the 2023 HHS Actuarial Values (AV) Calculator was used to determine the AV metal values shown in Worksheet 2 of Part I of the Unified Rate Review Template (URRT) for all plans except those specified. Where necessary, the AVs of the benefits proposed have been calculated with minimal modifications to the AV calculator as described in the Actuarial Memorandum.

As a qualifier to the opinion, the URRT does not demonstrate the process used by the issuer to develop the rates. Rather it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Marketplaces, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

(7)	Projection Period Utilization and Network Adjustment	1.0000	
(8)	Demographic Adjustment	0.9885	6
(9)	Area Adjustment	1.0000	
(10)	Additional "Other" Adjustments	0.9992	7
(11)	Annualized Trend	8.0%	8
(12)	Months of Trend	24.0	
(13)	Unit cost & Utilization/1,000 Trend Factor	1.1665	
(14)	Projection Period Index Rate	\$ 808.33	
(15)	Risk Adjustment Program	0.9049	9
(16)	Federal Exchange User Fee	1.0000	
(17)	Market Adjusted Index Rate	\$ 731.45	
	Without Risk Adjustment	\$ 808.33	

The projection period index rate was developed by projecting individual URRT service categories and then building up into a total PMPM. As a result the adjustments above may not match the referenced exhibits exactly because these represent the average factor when considering application at the service category level.

<sup>\*</sup>Rating factors by cohort for the rating period are based on average factors for each cohort from the current year to date. Weights are based on expected distribution of member months.

<sup>\*\*</sup>The rating period average age is determined from the member weighted average factor. Specifically it is linearly interpolated using the two age factors on the curve surrounding the member weighted average factor.

<sup>\*\*\*</sup>Applied uniformly to all plans

### Rate Filing Justification Part II (Plain Language Summary)

Pursuant to 45 CFR 154.215, health insurance issuers are required to file Rate Filing Justifications. Part II of the Rate Filing Justification for rate increases and new submissions must contain a written description that includes a simple and brief narrative describing the data and assumptions that were used to develop the proposed rates. The Part II template below must be filled out and uploaded as an Adobe PDF file under the Consumer Disclosure Form section of the Supporting Documentation tab.

Name of Company	Group Hospitali	zation & Medical Service	es Inc.			
SERFF tracking number	CFAP-1332180	06				
Submission Date	5/2/2022					
Product Name	BluePreferred					
Market Type:	0	Individual	•	Small Group		
Rate Filing Type:	•	Rate Increase	0	New Filing		
Scope and Range of the Incre	ease:					
The	13.3	% increase is requested	ed because:			
The main drivers supporting t actuarial values.	he rate change	are 1) increase in the	base period	claims experience of the combined pool, 2) trend, and 3) increases in assu	ımed pl	an
This filing will impact: # of policyholder's	13,353	# of covered lives	22,349			
	,		22,347			
The average, minimum and m					12.2	0/
Average Rate Cha	ange: The avera	ige premium change, t	oy percentag	ge, across all policy holders if the filing is approved	13.3	
<ul> <li>Minimum Rate Cl would experience if</li> </ul>	_	•	e (or largest	decrease), by percentage, that any one policy holder	10.5	%
<ul> <li>Maximum Rate C if the filing is approv</li> </ul>		gest premium increase	, by percent	tage, that any one policy holder would experience	28.7	%

Individuals within the group may vary from the aggregate of the above increase components as a result of:

Product selection, changes in age factors, and changes in family composition.

### **Financial Experience of Product**

The overall financial experience of the product includes:

In 2021, a total of \$172.7 million in premium was collected and \$146.9 million in claims were paid out. We received \$16.5 million in risk adjustment, for a loss ratio of 75.5%. However, the rate increase of the product is driven partially by the combined Individual and Small group experience, which collected \$233.0 million in premium and paid out \$230.4 million in claims and received \$25.5 million in risk adjustment for a loss ratio of 87.9%.

The rate increase will affect the projected financial experience of the product by:

The proposed rate increases are aimed to bring the loss ratio for the combined Individual/small group pool to a projected 85.0%.

### **Components of Increase**

The request is made up of the following components:

Trend Increases –	8.0	% of the	13.3	% total filed increase				
1. Medical Utilization Changes –Defined as the increase in total plan claim costs not attributable to changes in the unit cost of underlying services, or renegotiation of provider contracts. Examples include changes in the mix of services utilized, or an increase/decrease in the frequency of service utilization.								
This component is	6.9	% of the	13.3	% total filed increase.				
<ol> <li>Medical Price Changes – D the unit cost of underlying This component is</li> </ol>	services, or rer	•	er contracts.					

Other Increases –	4.9 % of the	13.3 % total filed increase						
1. Medical Benefit Changes R	equired by Law – Defined as any n	ew mandated plan benefit changes, as mandated						
by either State or Federal F	, ,	<u> </u>						
	0.0 % of the	13.3 % total filed increase.						
This component is	0.0 % of the	15.5 % total flied increase.						
Medical Benefit Changes I	Net Described by Levy Defined as	hamana in whan hamafit design made bu the						
• •	equired by either State or Federal R							
This component is	0.0 % of the	13.3 % total filed increase.						
3. Changes to Administration	Costs – Defined as increases in the	e costs of providing insurance coverage.						
Examples include claims pa	ayment expenses, distribution costs	s, taxes, and general business expenses such as rent, salaries,						
and overhead.	,	, , , , , , , , , , , , , , , , , , , ,						
	-0.3 % of the	13.3 % total filed increase.						
This component is	70 of the	15.5 % total flied merease.						
4 Changes to Drofit Margin	Defined as increases to company	sumbles as above as as additional magnin to accord						
	- Defined as increases to company s	surplus or changes as an additional margin to cover						
the risk of the company.								
This component is	4.0 % of the	13.3 % total filed increase.						
5. Other – Defined as:								
Improvement in the base peri-	od experience of the combined poo	ol.						
This component is	1.1 % of the	13.3 % total filed increase.

### **Key Drivers**

- 1.) Increase in the base period experience of the combined pool
- 2.) Trend
- 3.) Increase in the assumed plan actuarial values

## CareFirst BlueCross BlueShield Part III Actuarial Memorandum

#### 4.1 Redacted Actuarial Memorandum

CareFirst is making no redactions so both Actuarial Memorandum submissions are the same.

#### 4.2 General Information Section

#### **Company Identifying Information:**

- Company Legal Name: Group Hospitalization and Medical Services, Inc. (GHMSI) NAIC # 53007
- State: District of ColumbiaHIOS Issuer ID: 78079
- Market: Small Groups (On Exchange)
- Effective Date: 1/1/2023 and quarterly incremental "trend" increases effective 4/1/2023, 7/1/2023 and 10/1/2023.
- Company Filing Number: 2635
- SERFF Filing Number: CFAP-133218006

#### **Company Contact Information:**

- Primary Contact Name: Mr. Gregory Sucher, FSA, MAAA
- Primary Contact Telephone Number: 410-998-5988
- Primary Contact E-Mail Address: Gregory.Sucher@CareFirst.com

#### 4.3 Proposed Rate Changes (Small Group market)

Base rates are changing 13.3% on average for 1Q23. The range is 10.5% to 15.8%. The estimated average base rate changes for 2Q23, 3Q23, and 4Q23 are 13.9%, 14.5% and 15.1%, respectively. This filing applies to all new and renewing, in-force business in the guaranteed renewable, non-grandfathered, ACA, metaled benefit plans. The number of policyholders affected by this rate change is 13,353.

#### Reason for Rate Change(s):

The main drivers supporting the rate change are 1) increase in the base period claims experience of the combined pool, 2) trend, and 3) increases in assumed plan actuarial values.

#### 4.4 Market Experience (Combined Individual/Small Group market)

Our SRP reflects all covered lives for every non-grandfathered product in our market per 45 CFR Part § 156.80 (d).

#### 4.4.1 Experience and Current Period Premium, Claims, and Enrollment

The incurred period is 1/1/2021 through 12/31/2021, as required.

Paid Through Date: 2/28/2022 Current Date: 2/28/2022

Premiums (prior to MLR rebates) in Experience Period: \$232,998,399

**Experience Period Member Months: 357,578** 

**Current Date Members: 30,580** 

#### Allowed and Incurred Claims Incurred During the Experience Period

#### **Allowed Claims**

• Processed through issuer's claim system: \$251,843,294

• Processed outside issuer's claim system: \$0

• IBNR: \$3,527,274

#### **Incurred Claims**

• Processed through issuer's claim system: \$227,255,077

• Processed outside issuer's claim system: \$0

• IBNR: \$3,168,537

#### Method used for determining Allowed Claims

The allowed claims come directly from our claim records and account for capitations by applying contracted PMPM amounts directly to enrollment from the experience period. Drug rebates from the experience period are also included.

#### Support for IBNR estimates

Our estimates of IBNR paid claims were derived using a "chain and ladder" model based on the most recent 36 months to derive the completion factor and IBNR for each incurred month. Estimates of IBNR allowed claims were derived using the same completion factors as those estimated based on paid claims.

#### 4.4.2 Benefit Categories

Inpatient (hospital), outpatient (hospital), professional, other medical (non-capitated ambulance, home health care, durable medical equipment, prosthetics, supplies, vision exams, pediatric dental services and other), prescription drug & capitations.

#### 4.4.3 Projection Factors

#### 4.4.3.1 Trend Factors

#### Trend Factors (Cost/Utilization):

Exhibit 8 in the Memorandum contains our selected annual utilization and unit cost trends by service category. Unit cost and utilization trends were set by service category to produce the overall anticipated trend of 8.0%, which is a decrease compared to the 8.6% trend assumed in our prior filing. Current observed medical trends as of 202112 are 15.7%, up from -2.1% in 202012. Current observed drug trends are 6.9% as of 202112, down from 7.1% in 202012. The composite medical and drug trend is 13.0% as of 202112, up from 0.6% in 202012.

When normalized for induced demand, network, and demographics, the observed composite trends of 13.0% in 202112 and 0.6% in 202012 become 13.5% and 0.8%, respectively.

Using the proposed trend factor, in combination with other assumptions such as morbidity, etc., the annualized allowed PMPM change between 2023 and 2021 represented in this filing is 6.4%.

#### 4.4.3.2 Adjustments to Trended EHB Allowed Claims PMPM

#### **Morbidity Adjustment:**

Exhibit 4 in our memorandum contains support for this adjustment. To measure the projected morbidity of our population, we split our projected population into cohorts defined by metal tier and membership type. Membership type is defined as new member, existing member, or transfer from other lines of business. Consistent with the rules in the 2023 Unified Rate Review Instructions, we began our morbidity projection by normalizing allowed claims for each of the cohorts outlined above for projected changes in age, gender, network and induced utilization.

We have not reflected any morbidity adjustments to the base period normalized allowed PMPMs by metal tier for the existing and transfer membership types. Exhibit 4 demonstrates how these PMPMs are unchanged from the current year YTD to remainder of current year. For the new membership type we have assumed a claims PMPM by metal equal to that of the existing members.

The resulting morbidity calculation is completed in steps split by year:

- Once the remainder of current year (2022) is completed, the membership and claims by metal are combined to derive a total estimate for the year.
- This result carries over to the rating year (2023) as the metal specific normalized PMPMs for the existing members.
- The assumed claims PMPMs by metal for the new members are again assumed to equal those for the existing members.
- Transfer members PMPMs are treated separately and reflect base period amounts projected forward. Our projection factor for these members is 1.000.
- Once these PMPMs are set, the final morbidity calculation is driven by the projected member months at these levels.

The total morbidity change from 2021 to 2023 is expected to be -1.4%, which is the factor used in Exhibit 1 in the calculation of the market adjustment index rate.

#### **Demographic Shift:**

Exhibit 6 in the Memorandum contains support for our adjustment due to the anticipated change in the average age of this population between the experience and projection periods. Our methodology measures the change in average demographic factor between the base and rating periods. The demographic factors used are from an internal age/gender curve with an approximate 4.5:1 ratio (age 64+ to age 21 factors). Factors for both time periods are weighted using member months and the ratio of the two is applied as our market level adjustment.

#### Plan Design Changes:

Exhibit 5 in the Memorandum details our support for this adjustment to account for anticipated changes in the average utilization of services due to differences in average cost sharing requirements between the experience and projection periods. Our methodology measures the change in the average induced utilization factor between the base and rating periods. The factors used are the metal level factors from the federal risk adjustment program. Once the average internal pricing AV, weighted by member months, is determined for both the experience and rating periods the linearly interpolated factor is determined. The ratio of these two factors is applied as our market level adjustment.

#### Other Adjustments:

Exhibit 7 in the Memorandum details our support for these adjustments. We are proposing additional other adjustments for changes to our capitation fees and drug rebates.

#### 4.4.3.3 Manual Rate Adjustments

Not applicable, as experience was determined to be fully credible. The Unified Rate Review Template (URRT) forces the use of a projection period ending twelve months after the effective date. This presumes all rates change on the effective date. This is inconsistent with our understanding of the DC small group market post-1/1/14. In this filling, we are using a projection period ending with 3/31/2024 for our first quarter 2023 Index Rate Projection since business may be sold with this rate through 3/31/2023 and a one-year rate guarantee applies. The trends used in the URRT therefore will not produce the correct projected allowed amount PMPM. As such, we have assigned this projected amount a credibility factor of 0% and have entered the projected amounts corresponding to those in our rate filling using the Manual Rate section.

#### 4.4.3.4 Credibility of Experience

Exhibit 2 in the Memorandum contains a summary of our base period experience, including member months. We have assigned full credibility to this experience.

#### 4.4.3.5 Establishing the Index Rate

The experience period index rate for this filing is \$713.53 and the projection period index rate is \$808.33. Both rates and the adjustments made to develop the projected amount from the experience period amount can be found on Exhibit 1 of the Memorandum. Specifically, these adjustments correspond to those outlined in sections 4.4.3.1 and 4.4.3.2.

#### 4.4.3.6 Development of the Market-wide Adjusted Index Rate

The Market-wide Adjusted Index Rate for the Small Group market is \$731.45 and is derived by multiplying the projection period index rate with the market level adjustments for the risk adjustment program. Details for the risk adjustment program can be found below.

#### Reinsurance

There are no reinsurance recoveries applicable to this market.

#### Risk Adjustment Payment/Charge:

The Experience Period Risk Adjustment transfers in the URRT are based on the most recent Wakely results.

Our projected 2023 risk adjustment transfers, found in Exhibit 9, have been calculated consistent with our membership and morbidity projections found elsewhere in this filing. To project the risk adjustment factors from 2021 to 2023, we have assumed an increase in the statewide premium of 15.8% which reflects an estimate of an average 3.5% increase in 2022 and 11.9% increase in 2023. We have assumed that our CFI Small Group market share will increase from 77.8% in 2021 to 78.5% in 2023. We have assumed that our CFI Small Group PLRS ratio to the state will decrease from 1.018 in 2021 to 1.015 in 2023. The resultant estimate of risk adjustment is that the GHMSI receivable transfer PMPM for the Small Group market will increase from \$63.69 in 2021 to \$72.04 in 2023. Combined with the \$72.04 is a projected HCRP net PMPM payable of -\$1.13, which results in a total projected risk adjustment receivable of \$70.91.

The risk adjustment estimates above are calculated separately for the Individual market and the Small Group market as required. This approach is different than the blended approach used to calculate the Index Rate and therefore there is an inconsistency between the risk assumed in rates and the claims data used in the calculation.

#### **Exchange User Fees:**

There are no applicable exchange user fees since the rates in this filing are not offered on the Federal Marketplace.

#### 4.4.4 Plan Adjusted Index Rate

Exhibit 11 in the Memorandum displays the adjustments made for each plan. Every plan adjusted index rate is developed from the market adjusted index rate using only the allowable plan level modifiers as follows:

Actuarial value and cost-sharing design of the plan: The actuarial value for each plan was
determined using our own internal model and estimates the ratio of paid to allowed dollars given
that plan's benefit design and the assumed allowed amount consistent with the projection period
index rate. The assumed actuarial values also include a multiplicative factor applied uniformly
across plans. The application of the AV to an index rate that is the same across all plans results in

a member months weighted average AV (and resulting average paid PMPM assumed in rates) that may be materially deficient depending on the distribution of projected membership and actual cost. This factor accounts for the deficiency specific to this block of business. The URRT instructions state that this adjustment may "...take into account the benefit differences and *utilization differences due to differences in cost-sharing.*" As a result, our plan adjusted index rates also include adjustments to account for the impact the metal level has on utilization.

- Provider network: All plans offered use the PPO network.
- Benefits in addition to EHBs: There is an adjustment to account for abortion coverage (which are offered in addition to EHBs).
- Administrative costs: See Exhibit 10A in the Memorandum for the assumed values of the following additional items.
  - 1. Administrative Expense (G&A)
  - 2. Broker Commissions & Fees
  - 3. Contribution to Reserve (Post-Tax)
  - 4. State Premium Tax
  - 5. Federal Income Tax (FIT)
  - 6. Risk Adjustment User Fee
  - 7. Patient-Centered Outcomes Research Institute Fee (PCORI)
  - 8. Exchange Assessment Fee

For each plan, we have taken the applicable adjustment factor from each category above and multiplied them by the market adjusted index rate to derive each plan adjusted index rate.

#### 4.4.5 Calibration

#### **Age Curve Calibration**

We have calibrated to the rounded weighted average age which was determined as the age for the factor nearest our projected average factor. We have used the standard DC age curve factors and weighted them using member months in our calculation.

A demonstration of how the plan adjusted index rates and the age curve are used to generate the schedule of premium rates for each plan can be found in Exhibit 13.

#### **Geographic Factor Calibration**

We have elected not to rate for geographic region.

### **Tobacco Use Rating Factor Calibration**

We have elected not to rate for tobacco usage.

#### 4.4.6 Consumer Adjusted Premium Rate Development

The premium rate that a given consumer will be charged is calculated by first taking the plan adjusted index rate for that member's chosen plan and dividing by the projected average age rating factor. The resulting value is the base rate for that plan. The final step in determining a consumer adjusted premium rate is to take the rate from the first step and multiply it by the corresponding factor for that member's age from the standard DC age curve. Rate charts are provided for all the consumer adjusted premiums.

#### 4.5 Projected Loss Ratio

The projected loss ratio for the rates provided in this file, using the Federally-prescribed MLR methodology, is 87.3% for the Small Group market and 87.7% for the combined Individual/Small Group market. Details behind this calculation can be found in Exhibit 10B.

#### 4.6 Plan Product Information

#### 4.6.1 AV Metal Values

The majority of our 2023 plans include varying cost share levels for some services that depend on the setting in which care is delivered. The HHS AV calculator was used to compute two separate AVs for each impacted plan – one which applied the higher level of cost-share, and one which applied the lower level of cost-share. The results were blended assuming 81% of the designated services are rendered in higher cost-share setting and the remaining 19% at the lower, consistent with experience from our small group and individual markets. Plans without these features used the AV calculator without modification

Additional details regarding the unique plan designs not accommodated by the HHS AV Calculator along with printouts for each plan are provided in the "Actuarial Memorandum" section of the Supporting Documentation tab of the SERFF filing.

#### 4.6.2 Membership Projections

The membership projections found in Worksheet 2 of the URRT were developed from enrollment as of 2/28/2022 using assumptions for termination rates, new sales and transfers. The projections also incorporate any plan mappings anticipated between that month and the rating period. For new plan offerings where no plans are being uniformly modified into them, a minimum level of enrollment was assumed.

Also, Section III on Worksheet 2 of the URRT is out of balance with worksheet 1. This is because Worksheet 1 is based on the combined Individual/Small Group experience per the DC HBX Carrier Manual, while Worksheet 2 includes only the Small Group plans. Therefore, because of Individual being included at the pool level but not on the plan level, there is a large difference between the 2 worksheets.

#### 4.6.3 Terminated Plans and Products

Plan mappings from the experience period to the rating period can be found in Appendix – Mapping.

#### 4.6.4 Plan Type

Each plan in Worksheet 2, Section I of the URRT contains a plan type that describes the plan exactly.

#### 4.7 Miscellaneous Instructions

#### 4.7.1 Effective Rate Review Information (Optional)

We have no additional exhibits.

#### 4.7.2 Reliance

We do not have any reliance to state.

#### 4.7.3 Actuarial Certification

Included in the Memorandum.

## Group Hospitalization & Medical Services Inc. d.b.a. CareFirst BlueCross BlueShield (NAIC # 53007)

Rate Filing # 2635
D.C. Small Group Products
Rate Filing Effective 1/1/2023

**Actuarial Memorandum** 

## **Group Hospitalization & Medical Services Inc.** (NAIC # 53007)

## H.R. 3950 - Public Law 111-148 - Patient Protection and Affordable Care Act (ACA) **D.C. Small Group Products** Rate Filing Effective 1/1/2023 **Actuarial Certification**

- I, Gregory Sucher, am a(n) Actuary with CareFirst GHMSI doing business as CareFirst BlueCross BlueShield. I am a member of the American Academy of Actuaries (AAA) in good standing and have the education and experience necessary to perform the work. Rates were developed in accordance with the appropriate Actuarial Standards of Practice (ASOPs) and the AAA's Code of Professional Conduct. While other ASOPs apply, a sample listing is below.
- i. ASOP No. 5, Incurred Health and Disability Claims
- ii. ASOP No. 8, Regulatory Filings for Health Plan Entities
- iii. ASOP No. 12, Risk Classification
- iv. ASOP No. 23, Data Quality
- v. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages vi. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health and **Benefit Plans**
- vii. ASOP No. 41, Actuarial Communications
- viii. ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act

I have been involved in the development of these rates, and to the best of my knowledge and understanding, the rates in this filing have been developed in accordance with the available regulations and guidance. Should new guidance be released, this filing may be revised. I certify that this filing has been prepared based on sound and commonly accepted actuarial principles, practices and assumptions in the aggregate for the legal entity.

I further certify the following:

- 1. The projected Index Rate is:
  - a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
  - b. Developed in compliance with the applicable Actuarial Standards of Practice
  - c. Reasonable in relation to the benefits provided and the population anticipated to be covered
  - d. Neither excessive nor deficient
- 2. The Index Rate and only the allowable modifiers as described in 45 CFR § 156.80(d)(1) and 45 CFR § 156.80(d)(2) were used to generate plan level rates. These rates have been calibrated to account for age (geography and tobacco are not applicable).
- 3. Consistent with 45 CFR § 156.135, the 2023 HHS Actuarial Values (AV) Calculator was used to determine the AV metal values shown in Worksheet 2 of Part I of the Unified Rate Review Template (URRT) for all plans except those specified. Where necessary, the AVs of the benefits proposed have been calculated with minimal modifications to the AV calculator as described in the Actuarial Memorandum.

As a qualifier to the opinion, the URRT does not demonstrate the process used by the issuer to develop the rates. Rather it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Marketplaces, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

(7)	Projection Period Utilization and Network Adjustment	1.0000	
(8)	Demographic Adjustment	0.9885	6
(9)	Area Adjustment	1.0000	
(10)	Additional "Other" Adjustments	0.9992	7
(11)	Annualized Trend	8.0%	8
(12)	Months of Trend	24.0	
(13)	Unit cost & Utilization/1,000 Trend Factor	1.1665	
(14)	Projection Period Index Rate	\$ 808.33	
(15)	Risk Adjustment Program	0.9049	9
(16)	Federal Exchange User Fee	1.0000	
(17)	Market Adjusted Index Rate	\$ 731.45	
	Without Risk Adjustment	\$ 808.33	

The projection period index rate was developed by projecting individual URRT service categories and then building up into a total PMPM. As a result the adjustments above may not match the referenced exhibits exactly because these represent the average factor when considering application at the service category level.

<sup>\*</sup>Rating factors by cohort for the rating period are based on average factors for each cohort from the current year to date. Weights are based on expected distribution of member months.

<sup>\*\*</sup>The rating period average age is determined from the member weighted average factor. Specifically it is linearly interpolated using the two age factors on the curve surrounding the member weighted average factor.

<sup>\*\*\*</sup>Applied uniformly to all plans

# RATE FILING REQUIREMENTS INDIVIDUAL AND SMALL GROUP PLANS SOLD ON DC HEALTH LINK CHECK-LIST

INSTRUCTIONS: Include all required elements in the table below with the filed rates. The data elements listed in the Actuarial Memorandum should be

consistent with the cover letter, if applicable.

Number	Data Element	Requirement Description	Individual and Small Group			
			Has the Data Element Been	Location of the Data		
			Included?	Element		
1	Purpose of Filing	State the purpose of the filing. Identify the applicable law. List the proposed changes to the base rates and rating factors, and provide a general summary.	Yes	Page 1 of the Actuarial Memorandum PDF in SERFF		
2	Form Numbers	Form numbers should be listed in the actuarial memorandum.	Yes	Appendix - Form Numbers_SG		
3	HIOS Product ID	The HIOS product ID should be listed in the actuarial memorandum.	Yes	Exhibit 11 - Plan Adjusted_SG		
4	Effective Date	The requested effective date of the rate change. For filings effective 1/1/2017 and later, follow filing due date requirements.	Yes	Page 1 of the Actuarial Memorandum PDF in SERFF		
5	Market	Indicate whether the products are sold in the individual or small employer group market.	Yes	Page 1 of the Actuarial Memorandum PDF in SERFF		
6	Status of Forms	Indicate whether the forms are open to new sales, closed, or a mixture of both, and whether the forms are grandfathered, non-grandfathered, or a mixture of both.	Yes	Appendix - Form Numbers_SG		
7	Benefits/Metal level(s)	Include a basic description of the benefits of the forms referenced in the filing and the metal level of each plan design.	Yes	Exhibit 11 - Plan Adjusted_SG		
7.1	AV Value	Provide the actuarial value of each plan design using the AV calculator developed and made available by HHS.	Yes	See the PDF file "AV Screen Shots" in SERFF		
8	Average Rate Increase Requested	The weighted average rate increase being requested, incremental and year-over-year renewal. The weights should be based on premium volume. In the small group market, please also provide weighted average rate increase requested for 2023Q1 over 2022Q1; etc.	Yes	Appendix - Rate Change_SG		
9	Maximum Rate Increase Requested	The maximum rate increase that could be applied to a policyholder based on changes to the base rate and rating factors, incremental and year-over-year renewal. (Does not include changes in the demographics of the covered members.)	Yes	Appendix - Rate Change_SG		

Number	Data Element	Requirement Description	Individual and S	mall Group
			Has the Data Element Been	Location of the
			Included?	Data Element
10	Minimum Rate Increase Requested	The minimum rate increase that could be applied to a policyholder based on changes to the base rate and rating factors, incremental and year-over-year renewal. (Does not include changes in the demographics of the covered members.)	Yes	Appendix - Rate Change_SG
11	Absolute Maximum Premium Increase	The absolute maximum year-over-year renewal rate increase that could be applied to a policyholder, including demographic changes such as aging.	Yes	Appendix - Rate Change_SG
12	Average Renewal Rate Increase for a Year	Calculate the average renewal rate increase, weighted by written premium, for renewals in the year ending with the effective period of the rate filing. The calculation must be performed for each HIOS product ID.	Yes	Appendix - Rate Change_SG
13	Rate Change History	Rate change history of the forms referenced in the filing. If nationwide experience is used in developing the rates, provide separately the rate history for District of Columbia and the nationwide average rate history.	Yes	Appendix - Rate Change_SG
14	Exposure	Current number of policies, certificates and covered lives.	Yes	Appendix - Rate Change_SG
15	Member Months	Number of members in force during each month of the base experience period used in the rate development and in each of the two preceding twelve-month periods.	Yes	Appendix - Total Experience
16	Past Experience	Provide monthly earned premium and incurred claims for the base experience period used in the rate development and each of the two preceding twelve-month periods.	Yes	Appendix - Total Experience
17	Index Rate	Provide the index rate.	Yes	Exhibit 1 - Summary_SG
17.1	Rate Development	Show base experience used to develop rates and all adjustments and assumptions applied to arrive at the requested rates. For less than fully credible blocks, disclose the source of the base experience data used in the rate development and discuss the appropriateness of the data for pricing the policies in the filing.	Yes	Appendix - Total Experience
18		If the experience of the policies included in the filing is not fully credible, state and provide support for the credibility formula used in the rate development.	No	Not applicable

Number	Data Element	Requirement Description	Individual and Si	nall Group

	Increases	rates, plan relativities, and rating factors. This need not include	Yes	Change_SG
		changes in demographics of the individual or group.		
25	Claim Reserve Needs	Provide the claims for the base experience period separately for paid		
		claims, and estimated incurred claims (including claim reserve).		
		Indicate the incurred period used for the base period. Indicate the	Yes	Appendix - Total
		paid-through date of the paid claims, and provide a basic description		Experience
		of the reserving methodology for claims reserves and contract		
		reserves, if any. Provide margins used, if any.		

Number	Data Element	Requirement Description	Individual and Small Group		
			Has the Data Element Been Included?	Location of the Data Element	
26	Administrative Costs of Programs that Improve Health Care Quality	Show the amount of administrative costs included with claims in the numerator of the MLR calculation. Show that the amount is consistent with the most recently filed Supplemental Health Care Exhibit or provide support for the difference.	Yes	Exhibit10A - DICR SG and Exhibit 10B - Fed MLR_SG	
27	Taxes and Licensing or Regulatory Fees	Show the amount of taxes, licenses, and fees subtracted from premium in the denominator of your medical loss ratio calculation(c). Show that the amount is consistent with the most recently filed Supplemental Health Care Exhibit or provide support for the difference.	Yes	Exhibit10A - DICR SG and Exhibit 10B - Fed MLR_SG	
28	Medical Loss Ratio (MLR)	Demonstrate that the projected loss ratio, including the requested rate change, meets the minimum MLR. Show the premium, claims, and adjustments separately with the development of the projected premium and projected claims (if not provided in the rate development section). If the loss ratio falls below the minimum for the subset of policy forms in the filing, show that when combined with all other policy forms in the market segment in District of Columbia, the loss ratio meets the minimum.	Yes	Exhibit10A - DICR SG and Exhibit 10B - Fed MLR_Combined	
29	Risk Adjustment	Provide rate information relating to the Risk Adjustment program. Information should include assumed Risk Adjustment user fees, Risk Adjustment PMPM excluding user fees and assumed distribution of enrollment by risk score, plan, and geographical area. Provide support for the assumptions, including any demographic changes. Provide information/study on the development of risk scores and Risk Adjustment PMPM. Provide previous year-end estimated risk adjustment payable or receivable amount and quantitative support for the amount.	Yes	Exhibit 9 - Risk Adjustment _SG	
30	Past and Prospective Loss Experience Within and Outside the	Indicate whether loss experience within or outside the state was used in the development of proposed rates. Provide an explanation for using loss experience within or outside the state.	Yes	Not applicable	

Number	Data Element	Requirement Description	Individual and Si	nall Group
			Has the Data Element Been Included?	Location of the Data Element
31	A Reasonable Margin for Reserve Needs	Show the assumed Margin for Reserve Needs used in the development of proposed rates. Margin for Reserve Needs includes factors that reflect assumed contributions to the company's surplus or the assumed profit margin. Demonstrate how this assumption was derived, how the assumption has changed from prior filings, and provide support for changes. If the assumption for Qualified Health Plans exceeds 3% as assumed in the risk corridor formula, justify the excess in light of the company's surplus position.	Yes	Exhibit 10A - DICR SG and Exhibit 10B - Fed MLR_SG
32	Past and Prospective Expenses	Indicate the expense assumptions used in the development of proposed rates. Demonstrate how this assumption was derived. Show how this assumption has changed from prior filings, and provide support for any change.  Provide the assumed administrative costs in the following categories:  • Salaries, wages, employment taxes, and other employee benefits  • Commissions  • Taxes, licenses, and other regulatory fees  • Cost containment programs / quality improvement activities  • All other administrative expenses  • Total	Yes	Exhibit10A - DICR SG and Exhibit 10B - Fed MLR_SG
33	Any Other Relevant Factors Within and Outside the State	Show any other relevant factors that have been considered in the development of the proposed rates. Demonstrate how any related assumptions were derived. Show how these assumptions have changed from prior filings, and provide support for any change.	Yes	Actuarial Memorandum
34	Other	Any other information needed to support the requested rates or to comply with Actuarial Standard of Practice No. 8.	Yes	Actuarial Memorandum

Number	Data Element	Requirement Description	Individual and Small Group						
			Has the Data Element Been	Location of the					
			Included?	Data Element					
35	Actuarial Certification	Signed and dated certification by a qualified actuary that the anticipated loss ratio meets the minimum requirement, the rates are reasonable in relation to benefits, the filing complies with the laws and regulations of the District of Columbia and all applicable Actuarial Standards of Practice, including ASOP No. 8, and that the rates are not unfairly discriminatory.	Yes	Actuarial Certification is included in the Actuarial Memorandum					
36	Part I Preliminary Justification (Grandfathered Plan Filings)	Rate Summary Worksheet Provide this document with all Grandfathered plan filings. <b>Provide in Excel and PDF format.</b>	No	This is not a Grandfathered Filing, so a PRJ is not provided					
36.1	Unified Rate Review Template (Non- Grandfathered Filings)	Unified Rate Review Template as specified in the proposed Federal Rate Review regulation. Provide this document with all Non-Grandfathered plan filings. <b>Provide in Excel and PDF format.</b>	Yes	See the URRT included as a separate document in SERFF					
37	Part II Preliminary Justification	Written description justifying the rate increase as specified by 45 CFR § 154.215(f). Provide for <i>all</i> individual and small employer group filings (whether or not they are "subject to review" as defined by HHS).	Yes	See the Part II included as a separate document in SERFF					
38	DISB Actuarial Memorandum Dataset	Summarizes data elements contained in Actuarial Memorandum. Provide this document with all Non- Grandfathered plan filings.  Provide in Excel format only.	Yes	See the Dataset included as a separate document in SERFF					
39	District of Columbia Plain Language Summary	Similar to the Part II Preliminary Justification, this is a written description of the rate increase as specified by 45 CFR § 154.215, but as a simple and brief narrative describing the data and assumptions that were used to develop the proposed rates. Provide this document for all individual and small employer group filings.	Yes	See the Part II included as a separate document in SERFF					
40	-	DISB will require that issuers provide a chart listing a) any and all components of requested rate changes from the prior year; b) a quick summary/explanation of the change; and c) the actual percentage impact of the change for each component, such that the total for all components listed equals the total percentage change requested for the plan year.	Yes	See the file "Index & Plan Comparison" included as a separate document in SERFF					

Number	Data Element	Requirement Description	Individual and Si	nall Group
			Has the Data Element Been Included?	Location of the Data Element
41	CCIIO Risk Adjustment Transfer Elements Extract	Received directly from CCIIO; this report should be completed and submitted by the set deadline for QHP submissions, or by April 30 <sup>th</sup> of the current year, whichever is first.	Yes	See the Rate E file included as a separate document in SERFF
42	Additional Requirements for Stand Alone Dental Plan Filings	<ul> <li>Provide the following for stand-alone dental plan filings:</li> <li>Identification of the level of coverage (i.e. low or high), including the actuarial value of the plan determined in accordance with the proposed rule;</li> <li>Certification of the level of coverage by a member of the American Academy of Actuaries using generally accepted actuarial principles; and</li> <li>Demonstration that the plan has a reasonable annual limitation on cost-sharing.</li> </ul>	No	Not applicable

## **CERTIFYING SIGNATURE**

The undersigned representative of the organization submitting this rate filing attests that all items contained in the above checklist have been included in the filing

May 2, 2022

Mr. Efren Tanhehco Supervisory Health Actuary Department of Insurance, Securities and Banking

Re: Group Hospitalization and Medical Services, Inc. Small Group Rate Filing Cover Letter

Mr. Tanhehco,

In accordance with DISB requirements this letter has been submitted as cover for our 2023 ACA plan rate filing submitted 5/2/2022. Please note the required information below:

a. Company Name: Group Hospitalization and Medical Services, Inc. (GHMSI)

b. NAIC Company Code: 53007

c. Unique Company Filing Number: 2635

d. Date Submitted: 5/2/2022

e. Proposed Effective Date: 1/1/2023
f. Type of Product: PPO – On Exchange
g. Individual or Group: Small Group

h. **Scope and Purpose of Filing:** This filing has been submitted to propose the rate actions listed below in section k for all non-grandfathered ACA compliant plans offered by GHMSI.

i. **Indication Whether Initial Filing or Change:** This filing proposes a change to existing rates (from our previous SERFF Filing #CFAP-132809076).

j. **Indication if no DC Policyholders:** This filing proposes rate actions to our plans sold in DC. DC policyholders of GHMSI ACA plans will be impacted.

k. Overall Premium Impact of Filing on DC Policyholders: Proposed average rate increase for 2023 is 13.3%.

I. Contact Information:

a. Name: Gregory Sucher, FSA, MAAAb. Telephone Number: 410-998-5688c. Email: <u>Gregory.Sucher@Carefirst.com</u>

d. Fax: 410-505-2192

For further detail and support for the rate actions proposed above please reference the Actuarial Memorandum submitted on 5/2/2022.

Sincerely,

Gregory

Digitally signed by Gregory Sucher

Sucher Date: 2022.05.02 10:49:36

## DC GHMSI

#### Rate Filing Justification Part II (Plain Language Summary)

Pursuant to 45 CFR 154.215, health insurance issuers are required to file Rate Filing Justifications. Part II of the Rate Filing Justification for rate increases and new submissions must contain a written description that includes a simple and brief narrative describing the data and assumptions that were used to develop the proposed rates. The Part II template below must be filled out and uploaded as an Adobe PDF file under the Consumer Disclosure Form section of the Supporting Documentation tab.

Name of Company	Group Hospitali	ization & Medical Servi	ces Inc.			
	CFAP-1332180	06				
	5/2/2022					
Product Name	BluePreferred					
Market Type:	0	Individual	•	Small Group		
Rate Filing Type:	•	Rate Increase	0	New Filing		
Scope and Range of the Incre The		% increase is reques	ted because:			
The main drivers supporting the actuarial values.	he rate change	are 1) increase in the	base period	claims experience of the combined pool, 2) trend, and 3) increases in assur	ned p	lan
This filing will impact: # of policyholder's	- 7	# of covered lives	22,349			
The average, minimum and m		•		ge, across all policy holders if the filing is approved	13.3	%
<ul> <li>Minimum Rate Ch would experience if t</li> </ul>	nange: The sma the filing is app	llest premium increas	se (or largest	decrease), by percentage, that any one policy holder	10.5	%
if the filing is approv	-	sest breimam increas	e, by percent	age, that any one policy holder would experience	20.7	70

Individuals within the group may vary from the aggregate of the above increase components as a result of:

Product selection, changes in age factors, and changes in family composition.

## **Financial Experience of Product**

The overall financial experience of the product includes:

In 2021, a total of \$172.7 million in premium was collected and \$146.9 million in claims were paid out. We received \$16.5 million in risk adjustment, for a loss ratio of 75.5%. However, the rate increase of the product is driven partially by the combined Individual and Small group experience, which collected \$233.0 million in premium and paid out \$230.4 million in claims and received \$25.5 million in risk adjustment for a loss ratio of 87.9%.

The rate increase will affect the projected financial experience of the product by:

The proposed rate increases are aimed to bring the loss ratio for the combined Individual/small group pool to a projected 85.0%.

## **Components of Increase**

The request is made up of the following components:

Trend Increases –	8.0	% of the	13.3	% total filed increase							
. Medical Utilization Changes –Defined as the increase in total plan claim costs not attributable to changes in the unit cost of underlying services, or renegotiation of provider contracts. Examples include changes in the mix of services utilized, or an increase/decrease in the frequency of service utilization.											
This component is	6.9	% of the	13.3	% total filed increase.							
<ol> <li>Medical Price Changes – D the unit cost of underlying This component is</li> </ol>	services, or rer	•	er contracts.								

Other Increases –	4.9 % of the	13.3 % total filed increase
1. Medical Benefit Changes R	equired by Law – Defined as any n	ew mandated plan benefit changes, as mandated
by either State or Federal F	, ,	<u> </u>
	0.0 % of the	13.3 % total filed increase.
This component is	0.0 % of the	15.5 % total flied increase.
2 Madical Bonefit Chances	Net Described by Levy Defined as	hamana in whan hamafit design made bu the
	·	hanges in plan benefit design made by the
• •	equired by either State or Federal R	
This component is	0.0 % of the	13.3 % total filed increase.
3. Changes to Administration	Costs – Defined as increases in the	e costs of providing insurance coverage.
Examples include claims pa	ayment expenses, distribution costs	s, taxes, and general business expenses such as rent, salaries,
and overhead.	,	, , , , , , , , , , , , , , , , , , , ,
	-0.3 % of the	13.3 % total filed increase.
This component is	70 of the	15.5 % total flied merease.
4 Changes to Drofit Margin	Defined as increases to company	and the same and t
	- Defined as increases to company s	surplus or changes as an additional margin to cover
the risk of the company.		
This component is	4.0 % of the	13.3 % total filed increase.
5. Other – Defined as:		
Improvement in the base peri-	od experience of the combined poo	ol.
This component is	1.1 % of the	13.3 % total filed increase.

## **Rating Area Data Collection**

Specify the total number of Rating Areas in your State by selecting the Create Rating Areas button or Ctrl + Shift + R. Select only the Rating Areas you are offering plans within and add a factor for each area.

To validate, select the Validate button or Ctrl + Shift + I. To finalize, select the Finalize button or Ctrl + Shift + F.

Rating Area	Rating Factor
Rating Area 1	1.0000
