This Offering is being conducted pursuant to D.C. Official Code § 31-5604.03 and Section 250 of Chapter 26B of the District of Columbia Municipal Regulations. In making an investment decision, investors must rely on their own examination of the issuer and the issuer's Disclosure Statement, including the terms of the offering and the merits and risks involved. These securities have not been recommended by any federal or state securities regulator or the Department of Insurance, Securities and Banking or other regulatory authority. Furthermore, the foregoing authorities have not confirmed the accuracy or determined the adequacy of this document. Any representation to the contrary is a criminal offense. These securities are subject to restrictions on transferability and resale and may not be transferred or resold except as permitted by subsection (e) of SEC Rule 147 ([17 C.F.R. § 230.147](#)) (e) as promulgated under the securities act of 1933, as amended, and the applicable District of Columbia Securities Laws, pursuant to registration or exemption therefrom. Investors should be aware that they will be required to bear the financial risks of this investment for an indefinite period of time and that they may lose their entire investment.

RISK FACTORS

The following is a summary of all the risks that apply to the Company and/or this offering. Only those items that are checked or included in the Other Risks section apply to this offering. You should carefully consider these risks prior to investing in this offering.

Operating History

- The Company has limited or no operating history. As a new enterprise, the Company is likely to be subject to risks the management has not anticipated.
- Because the Company has been operating for only a short period of time, it has produced little or no profit. There is no assurance that it will ever produce a profit.

Limited Resources/Losses

- The Company has limited resources and will not be able to continue operating without the proceeds from this offering. It is possible that the proceeds from this offering and other resources may not be sufficient for the Company to continue to finance operations.
- The Company expects to continue to experience losses from operations and we cannot predict when or if the Company will become profitable. If the Company achieves profitability, it may not be sustainable.
- The Company has incurred losses since inception and may incur future losses. The Company has not yet generated a profit from operations. As of the date of the most recent financial statements, the Company had an accumulated deficit of .

Competition

- The Company operates in a highly technical industry, which is characterized by frequent introductions of new products and services into the market. The Company's success will depend, in part, on our ability to improve the present products and/or services, to develop new products and/or services, and to provide necessary services and support.
- A large number of enterprises provide products or services similar to the Company's. The Company will be competing with established businesses that have an operating history, and greater financial resources, management experience and market share than the Company. There can be no assurance that the Company will be able to compete or capture adequate

market share. The Company may not be profitable if it cannot compete successfully with other businesses.

Key Persons

- The Company's success depends substantially on the services of a small number of individuals. The Company may be harmed if it loses the services of these people and it is not able to attract and retain qualified replacements.
- The Company's officers, directors, managers, and/or key persons will continue to have substantial ownership and control over the Company after the offering.
- The Company does not maintain key person life insurance on those individuals on whom the Company's success depends. The loss of any of these individuals could have a substantial negative impact on the Company and your investment.

Inexperienced Management

- None of the Company's officers, directors, and/or managers has managed a company in this industry. The Company's ability to operate successfully may depend on its ability to attract and retain qualified personnel, who may be in great demand.
- None of the Company's officers, directors, and/or managers has experience in managing a development stage enterprise.

Past Experience

- Prior to organizing the Company, one or more of the Company's officers, directors, and/or managers operated a similar business in which suffered substantial losses. The Company's ability to operate successfully may depend on its officers, directors, and/or managers to succeed where they have failed before.

Government Regulation

- The Company must comply with local, state and federal rules and regulations. If the Company fails to comply with a rule or regulation it may be subject to fines, or other penalties, or its permit or license may be lost or suspended. The Company may have to stop operating and the investors may lose their entire investment.

Dilution

- The price of a share in this offering is significantly higher than the book value of the securities. Investors participating in this offering will incur immediate and substantial dilution of the book value of their investment.
- To the extent outstanding options or warrants to purchase securities are exercised, new investors will incur further dilution of the book value of their investment.
- There are no limits in place to restrict the Company's ability to issue securities in the future. If the Company issues additional securities, investors participating in this offering may experience further dilution of the value of their investment.

No Existing Market

- Because there is no market for the Company’s securities, you may not be able to sell your securities or recover any part of your investment. You should not invest unless you can afford to hold your investment indefinitely.
- You may not sell to anyone other than a resident of the District of Columbia for nine months after the offering is closed.

Offering Price

- The offering price of these securities has been arbitrarily set and accordingly should not be considered an indication of the actual value of the Company.

“Best-efforts” Offering

- The Company is offering these securities on a “best-efforts” basis. The Company has not contracted with an underwriter, placement agent, or other person to purchase or sell all, or a portion of our securities and there is no assurance that we can sell all or any of the securities.

Lack of Investor Control

- The Company’s officers, directors, managers, and/or key persons will continue to have substantial control over the Company after the offering. As such, you may have little or no ability to influence the affairs of the Company.

Other Risks

Describe any other risks that apply to the Company and/or the offering that have not yet been addressed above. Failure to disclose all material risks may subject the Company, its Officers, Directors, Managers, or promoters to liability for securities fraud.

For example, a Company may choose to limit an offering to its employees, independent contractors, or franchisees, or to investors who meet certain financial requirements.

Transfer Restrictions

The securities sold in this offering are also restricted by the requirements for the federal exemption from registration for intrastate offerings under §3(a)(11) of the Securities Act of 1933 and Securities and Exchange Commission Rule 147, which limits all resales to persons residing within the District of Columbia for a period of nine months from the date of last sale by the issuer of such securities.

Once the periods for these restrictions on resale have passed, investors who have purchased securities in this offering may sell or transfer their securities in an offering that has been registered or is exempt from

registration under both federal and state law. An exemption or registration may not be available at such time. In addition, the Company may place additional restrictions on resale of the securities sold in this offering. For these reasons, you should not purchase securities in this offering if you cannot afford to hold these securities indefinitely.
