AUTOMOBILE INSURANCE PREMIUM COMPARISON
SAMPLE PROFILES
(6 month policy)

Automobile premiums vary based on many factors, which can include the vehicle type, age, cost new, and annual miles driven. The automobile premium is also based on the driver's record, age, sex, credit rating, home ownership, and additional coverages selected. Additional factors considered in the premium rating include marital status, how the car is used, and longevity with the company. Premiums in metropolitan areas tend to be higher due to heavy traffic congestion, heavy automobile density, and an above average number of automobile accident occurrences. Washington, DC is a metropolitan area. The following may help lower your automobile insurance premiums: driving safely, comparing companies' premiums, choosing higher physical damage deductibles, insuring all vehicles under one policy, buying moderately priced vehicles, purchasing package insurance policies, and being eligible for discounts.
