# Aetna Health Inc. – District of Columbia 1Q22 Filing - Small Group Business HIOS product ID: 73987DC004 Actuarial Memorandum

#### Statement of Purpose for Filing

This actuarial memorandum supports Aetna Health Inc. commercial base rates for District of Columbia small groups effective beginning January 1, 2022. The purpose of this memorandum is to comply with the District of Columbia, Department of Insurance, Securities and Banking, Health Insurance Rate Filing Procedures and to provide adequate supporting information for our proposed rates pursuant to the DC Official Code, Title 31, Subtitle IV, Chapter 34.

The requested rates have been developed incorporating consideration of the market changes and rating requirements taking effect in the Small Group market pursuant to the Patient Protection and Affordable Care Act of 2010 and subsequent regulation. They are compliant with all rating limitations under federal and state regulation. The plan designs contained in this submission are to be sold on the Exchange.

The descriptions and analyses presented in this rate filing reflect our current understanding of regulations and guidance. As further guidance is received, we reserve the right to submit revisions or withdraw this rate filing.

#### Summary of Changes from prior filing and rate manual

We are proposing to revise the quarterly premium rates for effective dates from January 1, 2022 through December 31, 2022. The quarterly rate increases are reflected in Exhibit 7. Generally, rate changes do not vary by plan design, with the exception of the impact associated with plan-specific benefit modifications necessary to comply with Actuarial Value requirements.

Rates for the plans in this submission are being revised to reflect 1) the impact of updated experience data and medical claim trend and 2) changes in cost-sharing levels to ensure that plans comply with Actuarial Value requirements.

There are no other proposed changes for this submission.

#### **Form Numbers**

An exhibit showing the Form Numbers is shown on under the "Certificate of Form Names and Numbers" Exhibit of this Actuarial Memorandum.

#### Status of Forms

The forms for this submission are "open to new sales" and "non-grandfathered".

#### **Description of Benefits/Metal Levels and Actuarial Values**

This filing covers HMO group medical benefit coverage. The range of coverage includes inpatient, outpatient, primary care, specialist services, pharmacy, DME, and vision. Information on the cost-sharing parameters of the covered benefit plans, including deductibles and copays, can be found in the Schedule of Benefits in the Form filing (AETN-132690493). All benefits are compliant with state mandates and the requirements of the Patient Protection and Affordable Care Act of 2010, including preventive care benefits, deductible limits, and Actuarial Value requirements.

Exhibit A shows the metal level and actuarial value for each plan design using the AV calculator developed and made available by HHS.

#### Average Rate Increase Requested

The following tables provide the requested weighted average increases. The first table shows the incremental increase and the second table shows the year over year increase.

|                              | 1Q22/4Q21 | 2Q22/1Q22 | 3Q22/2Q22 | 4Q22/3Q22 |
|------------------------------|-----------|-----------|-----------|-----------|
| Incremental Rate<br>Increase | -9.95%    | 2.72%     | 2.72%     | 2.72%     |

|                            | 1Q22/1Q21 | 2Q22/2Q21 | 3Q22/3Q21 | 4Q22/4Q21 | Average |
|----------------------------|-----------|-----------|-----------|-----------|---------|
| Requested Rate<br>Increase | -2.39%    | -2.39%    | -2.39%    | -2.39%    | -2.13%  |

#### Maximum Rate Increase Requested

The maximum rate increase that could be applied to a policyholder based on changes to the base rate and rate factors is 3.32%. This rate increase applies to members renewing in 1Q22 for the DC Gold HNOnly 70% \$25/40E plan (HIOS ID 73987DC0040017).

#### **Minimum Rate Increase Requested**

The minimum rate increase that could be applied to a policyholder based on changes to the base rate and rate factors is -11.37%. This rate increase applies to members renewing in 3Q22 for the DC Bronze HNOnly 6000 80% \$15/50 E plan (HIOS ID 73987DC0040056).

#### **Absolute Maximum Premium Increase**

The absolute maximum year-over-year renewal rate increase that could be applied to a policyholder, including demographic changes like aging, is 14.86%. This rate increase applies to members renewing in 1Q22 for DC Gold HNOnly 70% \$25/40E plan (HIOS ID 3987DC0040017) that age up from 20 to 21.

#### Average Renewal Rate Increase for a Year

The average renewal rate increase, weighted by written premium, for renewals in the year ending with the effective period of the rate filing is -2.13%

#### **Rate Change History**

The rate change history for the forms referenced in the filing is shown below.

| Rate Effective Date | Annual Total Change |
|---------------------|---------------------|
| 4Q20                | 12.5%               |
| 1Q21                | -0.3%               |
| 2Q21                | 0.1%                |
| 3Q21                | 0.5%                |
| 4Q21                | 0.9%                |

#### Exposure

The current exposure as of December 2020 is 18 policies, 51 certificates, and 70 covered lives.

#### Member Months

The numbers of members in force during each month of the base experience used in the rate development and for the preceding 12-month period for the forms referenced in this filing are shown in the Loss Ratio History Exhibit of the Actuarial Memorandum.

#### Past Experience

The monthly earned premium and incurred claims for the base experience period used in the rate development and for the preceding 12-month period for the forms referenced in this filing are shown in the Loss Ratio History Exhibit of the Actuarial Memorandum.

#### Index Rate

The index rate = \$579.71

#### **Rate Development**

#### Determination of Claim Portion of Market Index Rate

In setting the projected claim level in the market in 2022, we based our projections upon the 2019 and 2020 experience of our current ACA small group block of business for Innovation Health Plan, Inc. and Innovation Health Insurance Company, in the 2-50 market. The experience data utilized in the rate development reflects incurred claims from January 1, 2020 to December 31, 2020 and paid through January 2021. This manual experience is the HMO Small Group Experience for Innovation Health Plan, Inc. and PPO Small Group Experience for Innovation Health Insurance Company in Northern Virginia.

The manual experience used to develop the rates is shown below:

| DOS       | Membership | Claims     | Premium *  | Loss Ratio |
|-----------|------------|------------|------------|------------|
| 1/1/2020  | 5,429      | 2,003,669  | 2,911,209  | 68.83%     |
| 2/1/2020  | 5,326      | 1,671,186  | 2,865,910  | 58.31%     |
| 3/1/2020  | 5,117      | 2,254,817  | 2,781,281  | 81.07%     |
| 4/1/2020  | 4,995      | 1,586,963  | 2,727,596  | 58.18%     |
| 5/1/2020  | 4,787      | 1,573,332  | 2,629,427  | 59.84%     |
| 6/1/2020  | 4,532      | 1,607,694  | 2,523,700  | 63.70%     |
| 7/1/2020  | 4,398      | 1,507,117  | 2,463,756  | 61.17%     |
| 8/1/2020  | 4,275      | 1,528,337  | 2,414,324  | 63.30%     |
| 9/1/2020  | 4,154      | 1,762,454  | 2,366,444  | 74.48%     |
| 10/1/2020 | 3,990      | 1,740,378  | 2,284,065  | 76.20%     |
| 11/1/2020 | 3,941      | 1,391,012  | 2,270,006  | 61.28%     |
| 12/1/2020 | 3,671      | 1,331,848  | 2,168,885  | 61.41%     |
| Total     | 54,615     | 19,958,808 | 30,406,605 | 65.64%     |

\*Note: Premiums shown are not risk adjusted. The current estimate of the 2020 risk-adjusted loss ratio is 63.5%.

Total incurred claims are developed by estimating the incurred but not reported (IBNR) reserves using aggregate block of business paid claims. Paid claims are adjusted using the IBNR completion factors. More specifically, historical claim payment patterns are used to predict the ultimate incurred claims for each date-of-service month. The IBNR is estimated using actuarial principles and assumptions which consider historical claim submission and adjudication patterns, unit cost and utilization trends, claim inventory levels, changes in membership and product mix, seasonality, and other relevant factors including a review of large claims. This same process is used to develop IBNR estimates for allowed claims.

As noted above, the experience period reflects one month of paid claim run-off. The IBNR reserves account for approximately 1.29% of the experience period incurred claims.

For the projection, the following was taken into consideration:

A. Changes in the Morbidity of the Population Insured:

The experience period data includes experience for policies issued to small employers in 2019 and 2020. We considered the expected relationships between the morbidity of the experience policies and the likely population that will be covered by Small Group Single Risk Pool policies in 2022.

B. Changes in Benefits:

The products included in this filing include benefits necessary to comply with the Essential Health Benefit requirements. The experience data includes experience for Single Risk Pool products that have essentially identical benefits.

The change in projected utilization due to changes in benefits is also considered. As cost sharing decreases (measured by increasing Actuarial Value), utilization increases. This pattern is reflected in the factors that are built into the federal risk adjustment mechanism that started in 2014. The federal risk adjustment program factors and other proprietary models were considered in the development of the utilization change. The average cost sharing in the experience period was compared with the average cost sharing in the projection period. From the average cost sharing change, an expected utilization change was derived.

C. Changes in Demographics:

Experience data was normalized for projected changes in the age/gender mix and area mix using internally-developed factors. Exhibits 2 and 3 contain detail on the calculations of the impact of demographic mix shifts.

D. Other Adjustments:

The 'Other' adjustment includes the projected impact of changes in network composition and provider contracts.

## <u>Determination of Retention Portion of Market Index Rate</u> The retention portion of the projected premium is illustrated in Exhibit 5.

The prospective general and administrative expenses are based on historical corporate small group market expense levels, current-year projections, and projected changes in expenses, inflation, and membership for 2022. The commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet, and other advertising; payments of commissions and other incentive compensation to Company's internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements. The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2022, as well as Federal income tax. The risk adjustment user fee is applied to the

projected risk adjustment transfer and therefore, excluded from the taxes and fees shown under nonbenefit expenses. State premium taxes are estimated on most current known levels and include any known assessments.

The profit and risk load is consistent with the target used in our initial pricing of 2021.

Aetna recognizes that COVID-19 has had an impact on the level of allowed and incurred claims in the experience period of January 1, 2020 through December 31, 2020. We have internally developed factors to adjust 2020 experience, using calendar year 2019 experience as our baseline claims data. Adjustment factors for allowed claims and incurred claims were developed separately and have been applied as such. These factors were developed using experience paid-thru January 31, 2021.

#### **Requested Rates**

Rates are determined using the prescribed member build-up approach. In the event that a family includes more than three dependents under age 21, only the three oldest dependents will be considered in determining the family's premium. Additional dependents (non-billable members) will not be included in the rate calculation.

The premium for each billable member is calculated as: Calibrated Plan Adjusted Index Rate \* Age Factor \* Area Factor \* Trend Factor

The resulting rate is rounded to the nearest cent, and rates are then summed for all billable family members.

An example of a contract's premium determined by the member build-up calculation is shown in Exhibit 9.

#### **Credibility Assumption**

Experience data for the District of Columbia is assigned 15% credibility.

#### **Trend Assumption**

Anticipated annual trend from the experience period to the rating period for the product line is shown in the following table. The table shows the trend assumptions by major types of service as defined by HHS, separately by unit cost, utilization, and in total.

| Type of Service     | Unit Cost | Utilization | Total |
|---------------------|-----------|-------------|-------|
| Inpatient Hospital  | 5.6%      | 2.5%        | 8.2%  |
| Outpatient Hospital | 3.6%      | 7.0%        | 10.8% |
| Professional        | 1.5%      | 7.0%        | 8.6%  |
| Other Medical       | 3.6%      | 7.0%        | 10.8% |
| Capitation          | 0.0%      | 0.0%        | 0.0%  |
| Prescription Drug   | 9.7%      | 2.6%        | 12.6% |
| Total               | 4.5%      | 5.6%        | 10.2% |

#### a. Medical Trend

Allowed medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.

#### b. Pharmacy Trend

Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend.

#### **Cost-sharing changes & Benefit Changes**

Aetna's rate review models project incurred claims and earned premiums assuming a static benefit plan mix for the book of business for the experience period. Since Aetna prices the book of business utilizing a target loss ratio approach, adjustments made to the incurred claims and earned premiums to account for the anticipated changes to the plan mix would offset resulting in the same projected loss ratio. The Plan Relativity Factors adjust future premium levels to align with the expected claims for changes in plan mix for future dates of service.

#### **Plan Relativities**

The Plan Relativities represent the expected value of the difference in benefits and networks between the market index rate and each additional proposed benefit plan discussed in this filing. The relativities were developed using a proprietary pricing model which relies on State- and product-specific benefit service category weights and rating factors for various levels of plan/member cost-sharing options for deductibles, coinsurance, out-of-pocket maximums and copays.

The product-specific service category weights were developed based on the experience of Aetna's Small Group block of business. The cost-sharing-specific rating factors were developed using experience associated with our Large Group block of business, which excludes the effects of selection. These Large Group based cost-sharing specific rating factors account for differences in a standard population's spending patterns due to differences in the richness and/or structure of benefits, or induced demand, without reflection of differences in health status.

Final plan relativities reflect the value of the EHB and state mandated benefits (including pediatric dental), incorporating the impact of out-of-network benefits and additional benefits. The methodology also considers the value of any differences in network by plan, including but not limited to network discounts and steerage.

# **Rating Factors**

#### Effective Date Factors

Exhibit 7 illustrates the quarterly trend factors, the resulting index rate for effective dates during each calendar quarter, the projected membership distribution by effective date, and the weighted-average index rate. Trend factors are developed from annual forward trend and leveraging. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2022.

#### Member Age Factor

The age factors are based on the DC specific age scale. The factors are shown in Exhibit 11.

#### Tobacco Factors

No load is proposed for tobacco users.

#### Area Factors

Exhibit 3 summarizes the rating area definitions and factors and displays the projected membership by area to develop the projected average area factor. The geographic calibration factor is the reciprocal of the projected average area factor.

#### Wellness Programs

Aetna may encourage and incent members to access certain medical services, to use online tools that enhance their coverage and services, and to continue participation as an **Aetna** member. Members and

their doctor can talk about these medical services and decide if they are right for the member. Aetna may also encourage and incent members in connection with participation in a wellness or health improvement program. Incentives include but are not limited to:

- Modification to copayment, deductible or coinsurance amounts
- Premium discounts or rebates
- Contributions to health savings account
- Fitness center membership reimbursement
- Merchandise
- Coupons
- Gift cards
- Debit cards
- Any combination of the above

The award of any such incentive shall not depend upon the result of a wellness or health improvement activity or upon a member's health.

#### **Distribution of Rate Increases**

The distribution of rate increases (annual) is shown in Exhibit A-1. The increases are shown by Plan.

#### **Claim Reserve Needs**

Total incurred claims are developed by estimating the incurred but not reported (IBNR) reserves using aggregate block of business paid claims. Paid claims are adjusted using the IBNR completion factors. More specifically, historical claim payment patterns are used to predict the ultimate incurred claims for each date-of-service month. The IBNR is estimated using actuarial principles and assumptions which consider historical claim submission and adjudication patterns, unit cost and utilization trends, claim inventory levels, changes in membership and product mix, seasonality, and other relevant factors including a review of large claims. This same process is used to develop IBNR estimates for allowed claims.

The experience data reflects incurred claims from January 1, 2020 through December 31, 2020 and paid through January 31, 2021. The paid claims for the DC Base experience period are \$275,401. The estimated incurred claims are \$279,203.

#### Administrative Costs of Programs that Improve Health Care Quality

The administrative costs included with claims in the numerator of the MLR calculation are shown in Exhibit 6 (MLR Projection).

#### **Taxes and Licensing or Regulatory Fees**

The taxes, licenses and fees removed from premium in the denominator of the MLR calculation are shown in Exhibit 6 (MLR Projection).

#### Medical Loss Ratio (MLR)

The projected Medical Loss Ratio (MLR) as defined by HHS is 85.6% and meets the minimum MLR requirements of Insurance Art. § 15-605(c). The details of the MLR calculation are shown in Exhibit 6 (MLR Projection).

#### **Risk Adjustment**

Risk Adjustment – Experience Period

Risk Adjustment transfer is accrued at the issuer and market level based on 2020 Wakely accruals. The transfer is allocated to the member-level based by applying the HHS risk transfer calculation to each member relative to the imputed market average; such that members with higher resulting relative transfer scores may have a receivable and members with lower resulting scores may have a payable, regardless of the net market risk transfer result. The resulting member transfers are summed to the HIOS plan level and adjusted for 2020 Risk Adjustment fees of \$0.18 PMPM in Worksheet 2.

#### Risk Adjustment – Projection Period

Aetna is projecting a risk adjustment payable. We expect that we will have membership enrolled under the market average morbidity. The resulting PMPM adjustment, net of risk adjustment user fees, is - \$10.49 PMPM.

#### Reinsurance

Transitional Reinsurance recoveries do not apply to Small Group business. The experience period data does not contain Reinsurance Contributions during 2020.

#### **Risk Corridor**

The Risk Corridor program does not apply to Small Group business.

#### Past and Prospective Loss Experience Within and Outside the State

The loss experience used in the development of the rates was based on the HMO Small Group experience for Innovation Health Plan, Inc. and PPO Small Group experience for Innovation Health Insurance Company in Northern Virginia.

#### **Reasonable Margin for Reserve Needs & Past and Prospective Expenses**

The retention portion of the projected premium is illustrated in Exhibit 5.

The prospective general and administrative expenses are based on historical corporate small group market expense levels, current-year projections, and projected changes in expenses, inflation, and membership for 2022. The commission expense factor covers anticipated sales and marketing expenses. Those may include, without limitation, purchase of television, internet and other advertising; payments of commissions and other incentive compensation to the Company's internal sales force; and payment of commissions to external brokers. The exact amounts and distribution among the categories of sales and marketing expenses will depend on a variety of factors including competitive conditions, business strategy, consumer behaviors, and legal and regulatory requirements. The consumer behaviors would capture whether they use a particular distribution channel, commissioned or not, as well as their experience.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2022, as well as Federal income tax. State premium taxes are estimated on most current known levels and include any known assessments.

The profit and risk load is consistent with the target used in the initial pricing for our 2021 plans.

#### Any Other Relevant Factors Within and Outside the State

All relevant Factors within and outside the State have been considered in the development of the proposed rates.

# Any other information needed to support the requested rates or to comply with Actuarial Standard of Practice No. 8

This filing is in conformity with all the applicable Actuarial Standards of Practice, including ASOP No. 8.

#### Actuarial Certification

I, Shih-Pang (Michael) Chang, am an employee of Aetna Inc. and a member of the American Academy of Actuaries. I have reviewed the enclosed rates submitted by Aetna Health Inc. for the District of Columbia.

These rates reflect the negotiated prices from the provider contracts and the expected utilization experience of the plan.

I relied upon financial records and summaries prepared by responsible officers and employees of Aetna Health Inc. In other respects, my analysis included review of assumptions that I considered necessary.

For preparation of the rates, items identified above:

- (i). are computed in accordance with commonly accepted actuarial standards consistently applied and are fairly stated in accordance with sound actuarial principles,
- (ii). meet the requirements of Washington D.C,
- (iii). make a good and sufficient provision for all unpaid claims of the organization under the terms of its contracts and agreements, and
- (iv). include appropriate provision for all actuarial items which ought to be established where allowed by law.

A target medical loss ratio of 80.0% was used for this filing calculated in the traditional way. The expected 2022 MLR for this filing, as defined by PPACA and before any credibility adjustment, is 85.6%.

These rates are appropriate for quotes delivered for effective dates beginning January 1, 2022. The proposed change is not an increase greater than the 15% threshold and will not trigger the federal review requirements as specified under 45 CFR Part 154.

This rate filing conforms to the benefit plan provisions required by the Patient Protection and Affordable Care Act (P.L. 111-148) of 2010.

In my opinion, the enclosed rates are reasonable in relation to the anticipated experience of Aetna Health Inc. They are neither excessive nor inadequate, nor unfairly discriminatory.

Sh pray

Shih-Pang (Michael) Chang, ASA, MAAA Aetna Health Inc.

# 1. Purpose, Scope, and Effective Date

- The purpose of this filing is to:
  - 1) Provide support for the development of the Part I Unified Rate Review Template;
  - 2) Provide support for the assumptions and premiums rate development for the products supported by the policy forms referenced above;
  - 3) Request approval of the proposed monthly premium rates; and
  - 4) Provide benefit plan designs summaries for the products included in this filing.

The development of the rates reflects the impact of the market forces and rating requirements associated with the Patient Protection and Affordable Care Act (PPACA) and subsequent regulation. These rates are for plans issued in District of Columbia beginning January 1, 2022. The rates comply with all rating guidelines under federal and state regulations. The filing covers plans that will be offered outside the public Marketplace in District of Columbia.

# 2. Proposed Rate Increase

Monthly premium rates for Small Group Market products in District of Columbia are being revised for effective dates January 1, 2022 through December 31, 2022.

A. Reason for Rate Increase(s):

- Impact of medical claim trend (including changes in provider unit costs and increased utilization of medical cost services) and pharmacy trend;
- Revisions to our assumptions about market-wide population morbidity and the projected population distribution;
- Revisions to administrative expense projections;
- Modifications in cost sharing to ensure that plans comply with Actuarial Value requirements;
- Updates to our pricing models used to determine the impact of cost sharing designs;
- Changes in provider networks and contracts.

• Expected claim cost increase of 2% due to COVID-19 testing and vaccinations.

B. Variation in Rate Changes by Plan/Product:

Rate changes differ by plan for the following reasons:

- Provider cost estimates have been updated, and the change differs by network.
- Modification to cost sharing differs by plan in order to maintain compliance with Actuarial Value and other regulatory requirements.
- Our internal pricing models have been updated to reflect more current information on levels of induced demand associated with different benefit designs. These changes impact our estimates of the relative costs of the plan designs that will be offered.

Exhibit 1 shows the average threshold increases for products covered by this filing.

# 3. Experience Period Premium and Claims

# A. Paid Through Date:

The experience data reported in Worksheet 1, Section I of the Part I Unified Rate Review Template reflects incurred claims from January 1, 2020 through December 31, 2020 and paid through January 31, 2021.

B. Current Date: The current enrollment and premium is reported as of January 31, 2021.

C. Premiums (Net of MLR Rebate) in Experience Period:

Experience period premiums are date-of-service premiums from our actuarial experience databases for non-grandfathered Small Group business in District of Columbia. Our internal projections indicate that no MLR rebate is expected to be paid in 2021 (for 2020 experience) for the Small Group MLR Pool in District of Columbia. As such, no adjustment was made to premiums to account for expected rebates.

D. Allowed and Incurred Claims Incurred During the Experience Period:

Allowed and incurred claims are sourced from our actuarial experience databases. These databases provide member-level detail on total allowed and incurred claims but do not include unit cost or utilization metrics. We allocate claims to cost categories and estimate the corresponding unit costs and utilization metrics by using an alternate reporting system that calculates unit cost and utilization metrics by medical cost category but only permits inclusion/exclusion of experience at the market and segment levels. A reconciliation of aggregate data in our actuarial experience databases is performed to ensure that data is consistent with the experience data contained in our enterprise-wide data warehouse.

Total incurred claims are developed by estimating the incurred but not reported (IBNR) reserves using aggregate block of business paid claims. Paid claims are adjusted using the IBNR completion factors. More specifically, historical claim payment patterns are used to predict the ultimate incurred claims for each date-of-service month. The IBNR is estimated using actuarial principles and assumptions which consider historical claim submission and adjudication patterns, unit cost and utilization trends, claim inventory levels, changes in membership and product mix, seasonality, and other relevant factors including a review of large claims. This same process is used to develop IBNR estimates for allowed

As noted above, the experience period reflects one month of paid claim run-off. The IBNR reserves account for approximately 1.3% of the experience period incurred claims.

In addition to the fee-for-service and capitation payments discussed above, some of our provider contracts include provisions under which we share claim cost differences with the provider relative to a predetermined target amount. These adjustments serve to increase our claims cost when results are favorable to the target and decrease our claims costs when results are unfavorable. We adjust both allowed and incurred claims by our current estimate of the impact of provider risk sharing provisions.

Aetna recognizes that COVID-19 has had an impact on the level of allowed and incurred claims in the experience period of January 1, 2020 through December 31, 2020. We have internally developed factors to adjust 2020 experience, using calendar year 2019 experience as our baseline claims data. Adjustment factors for allowed claims and incurred claims were developed separately and have been applied as such. These factors were developed using experience paid-thru January 31, 2021.

#### 4. Benefit Categories

Our internal systems assign claims to several benefit categories. We have mapped these categories to the categories described in the Unified Rate Review Instructions released in April 2020. Inpatient Hospital consists of care delivered at an inpatient facility and associated expenses, including day-based mental health services. Outpatient Hospital includes outpatient surgical, outpatient mental health, and emergency care and associated expenses. Professional includes both specialty physician and primary care physician expenses, including office-based mental health services. Other includes dental, home health care, medical pharmacy expenses, laboratory expenses, and radiology expenses. Non-capitated ambulance is included in the Outpatient Hospital category when billed by the facility and included in Specialist Physician otherwise. Prescription Drug includes drugs dispensed by a pharmacy.

The utilization for these services are counted by service type and aggregated for each benefit category. Inpatient Hospital utilization is counted as days; Outpatient Hospital, Professional, and Other Medical utilization are counted as visits. Prescription Drug utilization is counted per script.

# 5. Projection Factors

A. Changes in the Morbidity of the Population Insured:

The experience period data includes experience for community-rated policies issued to small employers in 2020.

We also considered the expected morbidity of the DC small group ACA population and the likely population that will be covered by Small Group Single Risk Pool policies in 2022 and have adjusted our projections for this morbidity change accordingly.

# B. Plan Design Changes:

The products included in this filing include benefits necessary to comply with the Essential Health Benefit requirements. The experience data includes experience for Single Risk Pool products that have essentially identical benefits and coverage issued outside the Single Risk Pool which does not cover all EHBs. The projection factor reflects the pro-rated impact of these additional benefits, as well as any changes in 2022 State Benchmark EHBs, and newly mandated benefits.

The change in projected utilization due to changes in benefits is also considered. As cost sharing decreases (measured by increasing Actuarial Value), utilization increases. This pattern is reflected in the factors that are built into the federal risk adjustment mechanism that started in 2014. The federal risk adjustment program factors and other proprietary models were considered in the development of the utilization change. The average cost sharing in the experience period was compared with the average cost

sharing in the projection period. From the average cost sharing change, an expected utilization change was derived.

# C. Changes in Demographics:

Experience data was normalized for projected changes in the age/gender mix and area mix using internally-developed factors. Exhibits 2 and 3 contain detail on the calculations of the impact of demographic mix shifts.

# D. Other Adjustments:

The 'Other' adjustment includes the projected impact of changes in network composition and provider contracts, expected morbidity changes, changes in benefits, and changes in demographics.

# E. Trend Factors (Cost/Utilization):

Medical trend factors are based on our Medical Economics Unit's national guidance coupled with local trend and network experience, based on analysis of a continuous normalized population, excluding catastrophic claims. Allowed medical trend includes known and anticipated changes in provider contract rates, severity and medical technology impacts, and expected changes in utilization. The impact of benefit leveraging is accounted for separately in the projected paid to allowed ratio.

Pharmacy trends are based on national commercial group Rx trend analysis. Pharmacy trend considers the impact of formulary changes, patent expirations, new drugs, other general market share shifts, and overall utilization trend. Pharmacy Trend is expressed in terms of allowed trend less rebates. Year 1 and Year 2 trends on Worksheet 1 specify annual trends, with 12 months of trend applied to each year.

Exhibit 8 shows the anticipated annual trend from the experience period to the rating period.

# 6. Manual Rate Adjustments:

# A. Source and Appropriateness of Experience Data Used:

The source data for our manual rate is the experience incurred from January 1, 2020 to December 31, 2020 and paid through January 2021 for issuers 12028 and 86443 in the Virginia Small Group HMO & PPO market. The Small Group market experience is considered an appropriate source for the manual rate due to similarities in covered benefits and market dynamics to the current ACA Small Group market. The similar dynamics include: no individual medical underwriting and rating by gender, limits on age-rating, and caps for rating on the number of dependents, as well as plans benefits and cost-sharing.

# B. Adjustments Made to the Data:

The Small Group experience used as the basis for the manual rate was adjusted in a similar manner as the base period experience for changes in population risk morbidity, benefits, and demographic and area normalizations. The data is further adjusted for projected changes in network, provider contract rates, and claims adjudication, in addition to unit cost and utilization trend.

# C. Inclusion of Capitation Payments:

No services provided in 2022 will be covered by capitation arrangements. We have adjusted the experience data to incorporate our best-estimate of the impact of moving to fee for service payment approaches.

# 7. Credibility of Experience

The CMS Medicare full credibility standard is 24,000 member months. Based on our experience, the Medicare population has significantly higher utilization than Commercial populations. Using actuarial judgement, we have assigned 15% credibility to experience data, using 50,000 member months as the threshold. This is consistent with prior rate filings

# 8. Risk Adjustment

# A. Risk Adjustment - Experience Period

Risk Adjustment transfer is accrued at the issuer and market level based on 2020 Wakely accruals and our internal projections of how our risk relative to market has changed since that report was issued. The transfer is allocated to the member-level based by applying the HHS risk transfer calculation to each member relative to the imputed market-average, such that members with higher resulting relative transfers scores may have a receivable and members with lower resulting scores may have a payable, regardless of the net market risk transfer result. The resulting member transfers are summed to the HIOS plan level.

# B. Risk Adjustment - Projection Period

We trended Innovation Health 2019 actual Risk Adjustment payments and 2020 Risk Adjustment accruals forward three and two years respectively. Resulting payment amounts were blended 59%/41% to determine an IH risk transfer relative to the market.

We trended Aetna entity-specific 2020 Risk Adjustment accruals two years. Resulting payment amounts were credibility-blended determine our current risk transfer relative to the market.

In addition, the projected risk adjustment transfer includes changes that were outlined in the 2022 Notice of Benefit and Payment Parameters. The 2022 projected market average premium used in the payment transfer formula is also reduced by 14% to remove administrative cost

As a result, we project a risk adjustment payable, net of the 2022 user fee of \$0.25 PBMPM. The resulting PMPM adjustment, net of risk adjustment user fees, is -\$9.57.

# 9. Non-Benefit Expenses and Profit & Risk

The retention portion of the projected premium is illustrated in Exhibit 5.

The prospective general and administrative expenses are set to achieve the 80% MLR threshold requirement. Actual general and administrative expenses are based on historical corporate Small Group market expense levels, 2021 projections, and projected changes in expenses, inflation, and membership for 2022 for our National book of Small Group business.

A flat commission per policy per month will be paid to all brokers in DC during open enrollment. Commissions do not vary by plan.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2022, as well as Federal income tax and State Premium taxes. State premium taxes are estimated on most current known levels and include any known assessments.

The profit and risk load is consistent with the initial target used in pricing our 2021 plans.

# 10. Projected Loss Ratio

The expected 2022 MLR for this filing, as defined by PPACA and before any credibility adjustment, is shown in Exhibit 6.

# 11. Single Risk Pool

The plans and rates included in the Part I URRT are those for all plans we intend to offer in the Small Group market in the District of Columbia through Aetna Health Inc. The proposed rates comply with the Single Risk Pool requirements of 45 CFR §156.80(d).

#### 12. Index Rate

The index rates for the experience and projection periods are set equal to the actual and projected allowed claims, respectively, less non-essential health benefits.

The index rate reflects the projected mix of business by plan. The AV pricing values for each plan are based on our internal company modeling of plan cost-sharing designs, the plan's provider network, delivery system characteristics, and utilization management practices, the impacts (as applicable) of benefits in addition to EHBs catastrophic eligibility criteria, and the distribution and administrative costs applicable to the plan/product. Rates do not differ for any characteristic other than those allowable under the regulations as described in 45 CFR 156 §156.80(d)(2).

**Small Group Market Trend Adjustments:** Exhibit 7 illustrates the quarterly trend factors, the resulting index rate for effective dates during each calendar quarter, the projected membership distribution by effective date, and the weighted-average index rate. Trend factors are developed from annual forward trend and leveraging. A trend factor of 1.00 corresponds to a policy period that begins January 1, 2022.

#### 13. Market-Adjusted Index Rate

Worksheet 1 illustrates the development of the Market Adjusted Index Rate. The market-wide adjustment for Risk Adjustment was discussed, previously. The risk adjustment is displayed on a paid-basis and the exchange user fee is estimated as a PMPM based on the target premium rate on Worksheet 1 of the URRT.

#### 14. Plan-Adjusted Index Rates

Section 3 of Worksheet 2 illustrates the development of the Plan Adjusted Index Rates and displays each plan-specific adjustment made to the Market Adjusted Index Rate. The 2022 Plan Adjusted Index Rates are displayed in Line 3.10. The following briefly describes how each set of adjustments was determined.

#### A. Actuarial Value, Cost Sharing:

The factors in Line 3.3 are the product of two separate adjustments:

- 1. We used internal models developed on large group claims experience to estimate the impact of different cost sharing designs. The combination of these two analyses is a projection of the relative paid to allowed ratio which also reflects the impact of out of network coverage.
- 2. We applied an adjustment for the impact different levels of cost sharing have on the use of medical services, which is based in part on the induced utilization factors used in the Risk Adjustment program. These adjustments are first normalized to result in an aggregate factor of 1.0 when applied to the projected 2022 membership.

#### B. Distribution and Administrative Costs:

Section 3 of Worksheet 2 also reflects the adjustment for projected administrative costs, including sales, marketing, any commission expense, profit, and risk. These are discussed above in the 'Non-Benefit Expenses and Profit & Risk' section, excluding the Risk Adjustment User Fee, and the Exchange User Fee, which are reflected in the Market-Adjusted Index Rate. These expense and profit assumptions do not vary by plan.

#### C. Provider Network, Delivery System, and Utilization Management:

The factors in Line 3.4 reflect the impact of differences in the network size, efficiency, and provider contract terms. We worked with our contracting area and other subject matter experts to review the impact of these differences and the expected impact on allowed claims.

D. Benefits in addition to EHBs:

The factors in Line 3.5 adjust for the impact of benefits in addition to EHBs.

# E. Catastrophic Plan Eligibility:

This filing does not include catastrophic plans.

# F. Experience Period Plan Adjusted Index Rates:

Worksheet 2 of the URRT displays the Plan Adjusted Index Rates filed in 2020 for the experience period.

# 15. Calibration

# A. Age Curve Calibration:

The age factors are based on the HHS Default Standard Age curve. We then project a premium-weighted average age factor for the 2022 membership using the prescribed age curve and the projected age distribution. The calibration factor is the reciprocal of this weighted average factor. The age that most closely corresponds to the premium weighted overall average age factor is the average age for the single risk pool.

# B. Geographic Factor Calibration:

Projected area factors are shown in Exhibit 3. Unit cost trend studies were used to evaluate whether there were significant changes to network costs that would require changes from previously filed rating area factors. The geographic calibration factor is the reciprocal of the projected average area factor.

C. Tobacco Factor Calibration

We are not applying a tobacco factor in our rating.

# 16. Consumer-Adjusted Premium Rate Development

Rates are determined using the prescribed member build-up approach. In the event that a family includes more than three child dependents under age 21, only the three oldest child dependents will be considered in determining the family's premium. Additional child dependents (non-billable members) will not be included in the rate calculation.

The premium for each billable member is calculated as: Calibrated Plan Adjusted Index Rate \* Age Factor \* Area Factor \* Trend Factor

The resulting rate is rounded to the nearest cent, and rates are then summed for all billable family members.

An example of a contract's premium determined by the member build-up calculation is shown in Exhibit 9.

# 17. Composite Premiums

Small employers will be able to elect to have rates set using a composite approach as permitted by DC.

# 18. AV Metal Values

The AV Metal Values on Worksheet 2 were based on the Draft 2022 AV Calculator. As applicable, entries were modified to reflect the plan appropriately and/or adjustments were made for plan design features that could not be entered in the calculator per 45 CFR Part 156, §156.135. The accompanying certification discusses how the benefits were modified to fit the parameters and the development of any adjustments. The AV screen shots provide detail on the modified entries and adjustments to AV, as applicable.

# 19. AV Pricing Values

The AV Pricing Values are calculated as the ratio of the Plan Adjusted Index Rate to the Market Adjusted Index Rate. The adjustments reflected in the AV Pricing Values are discussed in Section 14. AV Pricing Values do not differ based on morbidity differences or benefit selection anticipated within the Single Risk Pool.

#### 20. Membership Projections

Exhibit A summarizes the membership distribution by plan. Membership projections on Worksheet 2 are based on historical experience, enrollment in ACA-compliant plans through January 2021, and our expectations for future sales as additional members move to these plans from grandfathered and transitional plans.

#### Terminated Plans and Products

Exhibit 10 provides a plan and product crosswalk from 2020 to 2022. The crosswalk includes the list of products that have experience in the single risk pool experience period, and products that were made available in 2021 and 2022.

Consistent with the URRT instructions, experience for non-single risk pool terminated products is reported in aggregate under the terminated product with the largest membership in the experience period.

# 21. Plan Type

All plans are consistent with the plan type indicated on Worksheet 2.

#### 22. Benefit Design

This filing includes one Bronze, two Silver, and four Gold plans.

Please refer to the corresponding policy forms for detailed benefit language. Exhibit A-2 provides the screenshots from the AV Calculator. All benefit and cost sharing parameters comply with DC benefit mandates and the requirements of PPACA, including preventive care benefits, deductible limits, and Actuarial Value requirements.

# 23. Marketing

Plans will be available outside of the public Marketplace. These plans may be marketed in a variety of means, including HHS Planfinder and our own website. In addition, members of our 2021 plans will be mailed a discontinuance or renewal letter, in accordance with CMS guidelines. Marketing and distribution approaches may change from time to time at management's discretion.

# 24. Underwriting

Aetna will verify applicant eligibility for these plans based on any applicable age or geographic limitations.

# 25. Renewability

These policies are guaranteed renewable as required under §2703 of the Public Health Service Act.

# 26. Company Financial Condition

As of December 31, 2020, the capital and surplus held by Aetna Health Inc. was approximately \$562 million. This amount is disclosed in page 3, line 33 of the Company's statutory financial statement dated December 31, 2020. The Company issues insurance nationwide for multiple lines of business including, large group medical, Small Group medical, and various non-medical products.

# Reliance

While I have reviewed the reasonableness of the assumptions and data in support of both the preparation of the Part I Unified Rate Review Template and the rate development applicable to the products discussed in this filing, I relied on the expertise of other Aetna employees, along with work products produced at their direction, for the following items:

- Experience Period MLR Rebates
- Risk Adjustment Transfer
- Actuarial Value, Modifications, and Benefit Relativities
- Supplemental EHB Pricing
- Population Risk Morbidity
- Medical Cost and Utilization Trend
- Rx Cost and Utilization Trend
- Components of Retention/Administrative Fees
- Value of Network Arrangements
- MH Net Trend
- Experience Period Data Small Group

# Certification

While this memorandum discusses both our development of rates for these products and the completion of the Part I Unified Rate Review Template (URRT), the Part I URRT does not demonstrate the process used by Aetna to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally-facilitated marketplaces, and for certification that the index rate is developed in accordance with Federal regulation, is used consistently, and is only adjusted by the allowable modifiers. The information provided above is intended to comply with these requirements.

I, Shih-Pang (Michael) Chang, a member of the American Academy of Actuaries, and am qualified in the area of health insurance. I hereby certify that to the best of my knowledge and judgment:

- 1. This rate filing is in compliance with the applicable laws and regulations of the District of Columbia, the requirements under federal law and regulation, and all applicable Actuarial Standards of Practice, including but not limited to:
  - a. ASOP No. 5, Incurred Health and Disability Claims
  - b. ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and Entities Providing Health
  - c. ASOP No. 12, Risk Classification
  - d. ASOP No. 23, Data Quality
  - e. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages
  - f. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
  - g. ASOP No. 41, Actuarial Communications
  - h. ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act

- 2. The Projected Index Rate is:
  - a. In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),
  - b. Developed in compliance with the applicable Actuarial Standards of Practice,
  - c. Reasonable in relation to the benefits provided and the population anticipated to be covered,
  - d. Neither excessive, deficient, nor unfairly discriminatory.
- 3. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.
- 4. Adjustments to the MAIR for benefits the plan offers in addition to essential health benefits included in Worksheet 2, Section III were calculated in accordance with actuarial standards of practice.
- 5. The geographic rating factors reflect only differences in the costs of delivery (which include unit costs and provider practice pattern differences) and do not include differences for population morbidity by geographic area.
- 6. The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Adjustments made to reflect benefit features not handled by the AV Calculator are discussed in the attached certification required by 45 CFR Part 156, §156.135.

*Company Contact Information:* Name: Telephone Number: Email Address:

1. Purpose, Scope, and Effective Date

- The purpose of this filing is to:
  - 1) Provide support for the development of the Part I Unified Rate Review Template;
  - 2) Provide support for the assumptions and premiums rate development for the products supported by the policy forms referenced above;
  - 3) Request approval of the proposed monthly premium rates; and
  - 4) Provide benefit plan designs summaries for the products included in this filing.

The development of the rates reflects the impact of the market forces and rating requirements associated with the Patient Protection and Affordable Care Act (PPACA) and subsequent regulation. These rates are for plans issued in District of Columbia beginning January 1, 2022. The rates comply with all rating guidelines under federal and state regulations. The filing covers plans that will be offered outside the public Marketplace in District of Columbia.

# 2. Proposed Rate Increase

Monthly premium rates for Small Group Market products in District of Columbia are being revised for effective dates January 1, 2022 through December 31, 2022.

A. Reason for Rate Increase(s):

- Impact of medical claim trend (including changes in provider unit costs and increased utilization of medical cost services) and pharmacy trend;
- Revisions to our assumptions about market-wide population morbidity and the projected population distribution;
- Revisions to administrative expense projections;
- Modifications in cost sharing to ensure that plans comply with Actuarial Value requirements;
- Updates to our pricing models used to determine the impact of cost sharing designs;
- Changes in provider networks and contracts.

B. Variation in Rate Changes by Plan/Product:

Rate changes differ by plan for the following reasons:

- Provider cost estimates have been updated, and the change differs by network.
- Modification to cost sharing differs by plan in order to maintain compliance with Actuarial Value and other regulatory requirements.
- Our internal pricing models have been updated to reflect more current information on levels of induced demand associated with different benefit designs. These changes impact our estimates of the relative costs of the plan designs that will be offered.

Exhibit 1 shows the average threshold increases for products covered by this filing.

3. Experience Period Premium and Claims

# A. Paid Through Date:

The experience data reported in Worksheet 1, Section I of the Part I Unified Rate Review Template reflects incurred claims from January 1, 2020 through December 31, 2020 and paid through January 31, 2021.

B. Current Date: The current enrollment and premium is reported as of January 31, 2021.

C. Premiums (Net of MLR Rebate) in Experience Period:

Experience period premiums are date-of-service premiums from our actuarial experience databases for non-grandfathered Small Group business in District of Columbia.

D. Allowed and Incurred Claims Incurred During the Experience Period:

Allowed and incurred claims are sourced from our actuarial experience databases. These databases provide member-level detail on total allowed and incurred claims but do not include unit cost or utilization metrics. We allocate claims to cost categories and estimate the corresponding unit costs and utilization metrics by using an alternate reporting system that calculates unit cost and utilization metrics by medical cost category but only permits inclusion/exclusion of experience at the market and segment levels. A reconciliation of aggregate data in our actuarial experience databases is performed to ensure that data is consistent with the experience data contained in our enterprise-wide data warehouse.

Total incurred claims are developed by estimating the incurred but not reported (IBNR) reserves using aggregate block of business paid claims. Paid claims are adjusted using the IBNR completion factors. More specifically, historical claim payment patterns are used to predict the ultimate incurred claims for each date-of-service month. The IBNR is estimated using actuarial principles and assumptions which consider historical claim submission and adjudication patterns, unit cost and utilization trends, claim inventory levels, changes in membership and product mix, seasonality, and other relevant factors including a review of large claims. This same process is used to develop IBNR estimates for allowed

As noted above, the experience period reflects one month of paid claim run-off.

# 4. Benefit Categories

Our internal systems assign claims to several benefit categories. We have mapped these categories to the categories described in the Unified Rate Review Instructions released in April 2020. Inpatient Hospital consists of care delivered at an inpatient facility and associated expenses, including day-based mental health services. Outpatient Hospital includes outpatient surgical, outpatient mental health, and emergency care and associated expenses. Professional includes both specialty physician and primary care physician expenses, including office-based mental health services. Other includes dental, home health care, medical pharmacy expenses, laboratory expenses, and radiology expenses. Non-capitated ambulance is included in the Outpatient Hospital category when billed by the facility and included in Specialist Physician otherwise. Prescription Drug includes drugs dispensed by a pharmacy.

The utilization for these services are counted by service type and aggregated for each benefit category. Inpatient Hospital utilization is counted as days; Outpatient Hospital, Professional, and Other Medical utilization are counted as visits. Prescription Drug utilization is counted per script.

- 5. Projection Factors
- A. Changes in the Morbidity of the Population Insured:

The experience period data includes experience for community-rated policies issued to small employers in 2020.

We also considered the expected morbidity of the DC small group ACA population and the likely population that will be covered by Small Group Single Risk Pool policies in 2022 and have adjusted our projections for this morbidity change accordingly.

# B. Plan Design Changes:

The products included in this filing include benefits necessary to comply with the Essential Health Benefit requirements. The experience data includes experience for Single Risk Pool products that have essentially identical benefits and coverage issued outside the Single Risk Pool which does not cover all EHBs. The projection factor reflects the pro-rated impact of these additional benefits, as well as any changes in 2022 State Benchmark EHBs, and newly mandated benefits.

The change in projected utilization due to changes in benefits is also considered. As cost sharing decreases (measured by increasing Actuarial Value), utilization increases. This pattern is reflected in the factors that are built into the federal risk adjustment mechanism that started in 2014. The federal risk adjustment program factors and other proprietary models were considered in the development of the utilization change. The average cost sharing in the experience period was compared with the average cost sharing in the projection period. From the average cost sharing change, an expected utilization change was derived.

C. Changes in Demographics:

Experience data was normalized for projected changes in the age/gender mix and area mix using internally-developed factors. Exhibits 2 and 3 contain detail on the calculations of the impact of demographic mix shifts.

# D. Other Adjustments:

The 'Other' adjustment includes the projected impact of changes in network composition and provider contracts, expected morbidity changes, changes in benefits, and changes in demographics.

E. Trend Factors (Cost/Utilization):

- 6. Manual Rate Adjustments:
- A. Source and Appropriateness of Experience Data Used:

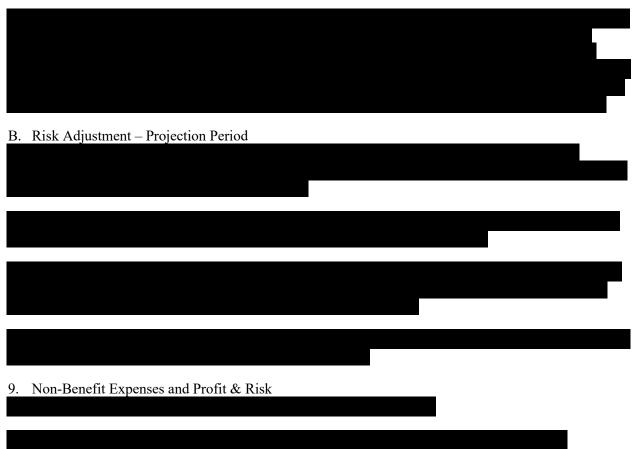

B. Adjustments Made to the Data:

C. Inclusion of Capitation Payments:

7. Credibility of Experience

8. Risk Adjustment

A. Risk Adjustment – Experience Period

Actual general and administrative expenses are based on historical corporate Small Group market expense levels, 2021 projections, and projected changes in expenses, inflation, and membership for 2022 for our National book of Small Group business.

A flat commission per policy per month will be paid to all brokers in DC during open enrollment. Commissions do not vary by plan.

Federal taxes include PPACA Taxes and Fees are based on the Notice of Benefit and Payment Parameters for 2022, as well as Federal income tax and State Premium taxes. State premium taxes are estimated on most current known levels and include any known assessments.

# 10. Projected Loss Ratio

# 11. Single Risk Pool

The plans and rates included in the Part I URRT are those for all plans we intend to offer in the Small Group market in the District of Columbia through Aetna Health Inc. The proposed rates comply with the Single Risk Pool requirements of 45 CFR §156.80(d).

# 12. Index Rate

The index rates for the experience and projection periods are set equal to the actual and projected allowed claims, respectively, less non-essential health benefits.

The index rate reflects the projected mix of business by plan. The AV pricing values for each plan are based on our internal company modeling of plan cost-sharing designs, the plan's provider network, delivery system characteristics, and utilization management practices, the impacts (as applicable) of benefits in addition to EHBs catastrophic eligibility criteria, and the distribution and administrative costs applicable to the plan/product. Rates do not differ for any characteristic other than those allowable under the regulations as described in 45 CFR 156 §156.80(d)(2).

# Small Group Market Trend Adjustments:

# 13. Market-Adjusted Index Rate

14. Plan-Adjusted Index Rates

A. Actuarial Value, Cost Sharing:

B. Distribution and Administrative Costs:

C. Provider Network, Delivery System, and Utilization Management:

D. Benefits in addition to EHBs:

E. Catastrophic Plan Eligibility:

This filing does not include catastrophic plans.

F. Experience Period Plan Adjusted Index Rates:

Worksheet 2 of the URRT displays the Plan Adjusted Index Rates filed in 2020 for the experience period.

# 15. Calibration

#### C. Tobacco Factor Calibration

We are not applying a tobacco factor in our rating.

#### 16. Consumer-Adjusted Premium Rate Development

Rates are determined using the prescribed member build-up approach. In the event that a family includes more than three child dependents under age 21, only the three oldest child dependents will be considered in determining the family's premium. Additional child dependents (non-billable members) will not be included in the rate calculation.

The premium for each billable member is calculated as: Calibrated Plan Adjusted Index Rate \* Age Factor \* Area Factor \* Trend Factor

The resulting rate is rounded to the nearest cent, and rates are then summed for all billable family members.

# 17. Composite Premiums

Small employers will be able to elect to have rates set using a composite approach as permitted by DC.

# 18. AV Metal Values

The AV Metal Values on Worksheet 2 were based on the Draft 2022 AV Calculator. As applicable, entries were modified to reflect the plan appropriately and/or adjustments were made for plan design features that could not be entered in the calculator per 45 CFR Part 156, §156.135. The accompanying certification discusses how the benefits were modified to fit the parameters and the development of any adjustments. The AV screen shots provide detail on the modified entries and adjustments to AV, as applicable.

# 19. AV Pricing Values

The AV Pricing Values are calculated as the ratio of the Plan Adjusted Index Rate to the Market Adjusted Index Rate. The adjustments reflected in the AV Pricing Values are discussed in Section 14. AV Pricing

Values do not differ based on morbidity differences or benefit selection anticipated within the Single Risk Pool.

# 20. Membership Projections

#### Terminated Plans and Products

Exhibit 10 provides a plan and product crosswalk from 2020 to 2022. The crosswalk includes the list of products that have experience in the single risk pool experience period, and products that were made available in 2021 and 2022.

Consistent with the URRT instructions, experience for non-single risk pool terminated products is reported in aggregate under the terminated product with the largest membership in the experience period.

# 21. Plan Type

All plans are consistent with the plan type indicated on Worksheet 2.

#### 22. Benefit Design

This filing includes one Bronze, two Silver, and four Gold plans.

Please refer to the corresponding policy forms for detailed benefit language. Exhibit A-2 provides the screenshots from the AV Calculator. All benefit and cost sharing parameters comply with DC benefit mandates and the requirements of PPACA, including preventive care benefits, deductible limits, and Actuarial Value requirements.

#### 23. Marketing

Plans will be available outside of the public Marketplace. These plans may be marketed in a variety of means, including HHS Planfinder and our own website. In addition, members of our 2021 plans will be mailed a discontinuance or renewal letter, in accordance with CMS guidelines. Marketing and distribution approaches may change from time to time at management's discretion.

#### 24. Underwriting

Aetna will verify applicant eligibility for these plans based on any applicable age or geographic limitations.

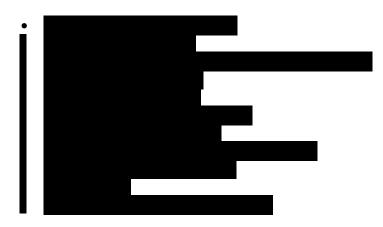

# 25. Renewability

These policies are guaranteed renewable as required under §2703 of the Public Health Service Act.

# 26. Company Financial Condition

Reliance

While I have reviewed the reasonableness of the assumptions and data in support of both the preparation of the Part I Unified Rate Review Template and the rate development applicable to the products discussed in this filing, I relied on the expertise of other Aetna employees, along with work products produced at their direction, for the following items:

# Certification

While this memorandum discusses both our development of rates for these products and the completion of the Part I Unified Rate Review Template (URRT), the Part I URRT does not demonstrate the process used by Aetna to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally-facilitated marketplaces, and for certification that the index rate is developed in accordance with Federal regulation, is used consistently, and is only adjusted by the allowable modifiers. The information provided above is intended to comply with these requirements.

#### I,

, and am qualified in the area of health insurance. I hereby certify that to the best of my knowledge and judgment:

- 1. This rate filing is in compliance with the applicable laws and regulations of the District of Columbia, the requirements under federal law and regulation, and all applicable Actuarial Standards of Practice, including but not limited to:
  - a. ASOP No. 5, Incurred Health and Disability Claims
  - b. ASOP No. 8, Regulatory Filings for Health Benefits, Accident and Health Insurance, and **Entities Providing Health**
  - c. ASOP No. 12. Risk Classification
  - d. ASOP No. 23, Data Quality
  - e. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages
  - f. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health Benefit Plans
  - g. ASOP No. 41, Actuarial Communications
  - h. ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act

- 2. The Projected Index Rate is:
  - a. In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),
  - b. Developed in compliance with the applicable Actuarial Standards of Practice,
  - c. Reasonable in relation to the benefits provided and the population anticipated to be covered,
  - d. Neither excessive, deficient, nor unfairly discriminatory.
- 3. The Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan-level rates.
- 4. Adjustments to the MAIR for benefits the plan offers in addition to essential health benefits included in Worksheet 2, Section III were calculated in accordance with actuarial standards of practice.
- 5. The geographic rating factors reflect only differences in the costs of delivery (which include unit costs and provider practice pattern differences) and do not include differences for population morbidity by geographic area.
- The AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. Adjustments made to reflect benefit features not handled by the AV Calculator are discussed in the attached certification required by 45 CFR Part 156, §156.135.

Mr. Efren Tanhehco Supervising Actuary District of Columbia Department of Insurance & Securities Regulation 810 First Street NE, 6<sup>th</sup> Floor Washington, DC 20002

Subject: Aetna Health, Inc. - NAIC Number 95109 Small Group Premium Rate Filing – DC On Exchange Effective dates January 1, 2022 – December 31, 2022

Dear Mr. Tanhehco:

I am writing to request approval of the attached Rate Filing for plans offered to Small Groups by Aetna Health, Inc. sold on the DC Exchange. This filing is for effective dates January 1, 2022 – December 31, 2022. This filing contains the benefit plans and rating methodology. The average rate revision proposed is a decrease of -2.13%.

The requested rates have been developed incorporating consideration of the market changes and rating requirements taking effect in the Small Group Market and conforms to the benefit plan provisions required by the Patient Protection and Affordable Care Act (P.L. 111-148) of 2010. Additionally, these health benefit plans conform to each respective tier of coverage, defined as Bronze, Silver, and Gold.

This filing is for Aetna's Small Group HMO Medical Expense coverage.

The following supporting documentation is also included:

- 1) An Actuarial Certification
- 2) An Actuarial Memorandum including supporting exhibits and documentation

The forms filing has been submitted under separate cover and the SERFF Filing ID # is AETN-132690493.

The purpose of this rate filing is to comply with regulatory rate filing requirements. This filing is not intended to be used for other purposes. If you need additional information, please contact me by telephone at (925) 948-4316, or via e-mail at ChangS1@aetna.com.

Sincerely,

Sh phay

Shih-Pang (Michael) Chang, ASA, MAAA

# Rate Filing Justification Part II (Plain Language Summary)

Pursuant to 45 CFR 154.215, health insurance issuers are required to file Rate Filing Justifications. Part II of the Rate Filing Justification for rate increases and new submissions must contain a written description that includes a simple and brief narrative describing the data and assumptions that were used to develop the proposed rates. The Part II template below must be filled out and uploaded as an Adobe PDF file under the Consumer Disclosure Form section of the Supporting Documentation tab.

| Name of Company       | Aetna Health, In | IC.          |
|-----------------------|------------------|--------------|
| SERFF tracking number | AETN-1327313     | 53           |
| Submission Date       | May 3, 2021      |              |
| Product Name          | DC AHI HMO S     | G 2022       |
| Market Type           | O Individual     | Small Group  |
| Rate Filing Type      | Rate Increase    | O New Filing |

# Scope and Range of the Increase:

The -2.1:% increase is requested because:

Rates are updated to reflect the impact of medical trend, revisions to our assumptions about population morbidity and projected population, changes in cost sharing levels to ensure compliance with Actuarial Value requirements, and changes in provider networks and contracts.

This filing will impact:

# of policyholder's 51

# of covered lives 70

The average, minimum and maximum rate changes increases are:

- Average Rate Change: The average premium change, by percentage, across all policy holders if the filing is approved -2.1: %
- Minimum Rate Change: The smallest premium increase (or largest decrease), by percentage, that any one policy holder would experience if the filing is approved -11.1%
- Maximum Rate Change: The largest premium increase, by percentage, that any one policy holder would experience if the filing is approved 3.32%

Individuals within the group may vary from the aggregate of the above increase components as a result of:

the benefit plan the individual chooses, when the member's group contract renews, the age and family size and age for enrolling employees and employer contributions.

# **Financial Experience of Product**

The overall financial experience of the product includes:

The 2020 experience generated by the plans offered under this product produced a loss ratio that was favorable to the target loss ratio before and after risk adjustment. Due to the low volume of members that have enrolled in these plans the 2020 experience is not credible.

The rate increase will affect the projected financial experience of the product by:

The rate revision is not expected to impact the profitability of the product. That is, the target profit margin is unchanged.

# **Components of Increase**

The request is made up of the following components:

Trend Increases - -346 % of the -2.1 % total filed increase

1. Medical Utilization Changes –Defined as the increase in total plan claim costs not attributable to changes in the unit cost of underlying services, or renegotiation of provider contracts. Examples include changes in the mix of services utilized, or an increase/decrease in the frequency of service utilization.

This component is -192 % of the -2.1; % total filed increase.

2. Medical Price Changes – Defined as the increase in total plan claim costs attributable to changes in the unit cost of underlying services, or renegotiation of provider contracts.

This component is -154% of the -2.1% total filed increase.

Other Increases – 446. % of the -2.1. % total filed increase

1. Medical Benefit Changes Required by Law – Defined as any new mandated plan benefit changes, as mandated by either State or Federal Regulation.

This component is -31.4% of the -2.1% total filed increase.

2. Medical Benefit Changes Not Required by Law – Defined as changes in plan benefit design made by the company, which are not required by either State or Federal Regulation.

This component is 0 % of the -2.1% total filed increase.

 Changes to Administration Costs – Defined as increases in the costs of providing insurance coverage. Examples include claims payment expenses, distribution costs, taxes, and general business expenses such as rent, salaries, and overhead.

This component is -3.9 % of the -2.1; % total filed increase.

4. Changes to Profit Margin – Defined as increases to company surplus or changes as an additional margin to cover the risk of the company.

This component is -334 % of the -2.1 % total filed increase.

5. Other – Defined as:

Changes in commission, benefit slope, risk adjustment, provider contracting, experience and population risk.

This component is 816.% of the -2.1% total filed increase.

#### Actuarial Value Certification

| State:            | DC             |
|-------------------|----------------|
| Plan Year:        | DC             |
| HIOS Issuer ID:   | 2022           |
| HIOS Product Ids: | 73987          |
|                   | 73987DC004     |
| HIOS Plan Ids:    | 73987DC0040029 |
|                   | 73987DC0040056 |

Per 156.135, the AV must be certified by a member of the American Academy of Actuaries using generally accepted actuarial principles and methodologies. There are 3 types of certification: (1) Option 1 - Certify that the plan was entered correctly and does not vary materially from standard options entered (2) Option 2 - Certify that the plan was entered correctly and core not vary materially from standard options entered

(2) Option 2 - Certify that entries into the calculator were modified to reflect the plan appropriately [156.135.(b).(2)] (3) Option 3 - Used the calculator for provisions that fit and made adjustment for plan design features that deviate outside of calculator [156.135.(b).(3)]

The plans listed meet the criteria for Option 1 - the plans were entered correctly and do not vary materially from the standard options entered. In addition, a 0.9999 factor is applied to the average coinsurance in row 11 for most plans. While not materially impacting the entered benefit value, this methodology prevents the OP facility/physician splitting methodology from being invoked which we do not believe is appropriate for our benefit plans. The output from this consistentlyapplied process reflects our certified Actuarial Values.

#### Certification Language:

The development of the actuarial value was determined in accordance with the ASOPs established by the ASB and with applicable laws and regulations.

This analysis was conducted by a member of the American Academy of Actuaries that meets the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States promulgated by the American Academy of Actuaries, and has the education and experience necessary to perform the work.

The certifying actuary is an employee of Aetna.

This certification supports plans offered in the Small Group market.

Metal levels were appropriately assigned based on applicable law.

Actuarial Value determination was made based on the Draft 2022 AV Calculator, since the Final 2022 AV Calculator had not yet been released at time of certification

Actuary Signature: Actuary Printed name: Shih-Pang (Michael) Chang, ASA MAAA Date: 4/28/2021

# Unique Plan Design - Issuer Actuarial Value Supporting Documentation and Justification

73987DC0040058

| State:            | DC             |
|-------------------|----------------|
| Plan Year:        | 2022           |
| HIOS Issuer ID:   | 73987          |
| HIOS Product Ids: | 73987DC004     |
| HIOS Plan Ids:    | 73987DC0040021 |
|                   | 73987DC0040057 |

1) Justification for use of Issuer AV:

Per 156.135, the AV must be certified by a member of the American Academy of Actuaries using generally accepted actuarial principles and methodologies. There are 3 types of certification:

- (1) Option 1 Certify that the plan was entered correctly and does not vary materially from standard options entered
- (2) Option 2 Certify that entries into the calculator were modified to reflect the plan appropriately [156.135.(b).(2)]
- (3) Option 3 Used the calculator for provisions that fit and made adjustment for plan design features that deviate outside of calculator [156.135.(b).(3)]

Aetna benefit plans were analyzed vs the AVC to determine when Option 2 and/or Option 3 vs Option 1 certification was necessary. Four underlying calculators were built to support population of the Mental Health OP, Specialist OV, ER, and Rx generic rows in the AVC. These all support Option 2 certifications, but only the calculators used are referenced below. A separate calculator was used for plans with True Individual Family (TIF) deductibles in support of Option 3. Again, only if the calculator was used would it be referenced below. In addition, a 0.9999 factor is applied to the average coinsurance in row 11 for most plans. While not materially impacting the entered benefit value, this methodology prevents the OP facility/physician splitting methodology from being invoked which we do not believe is appropriate for our benefit plans. The output from this consistently-applied process reflects our certified Actuarial Values.

#### 2) Regulatory permitted alternate method used:

(2) Option 2 - Certify that entries into the calculator were modified to reflect the plan appropriately [156.135.(b).(2)]

3) Confirmation that only in-network cost sharing including multitier networks, was considered: Confirmed. Only in-network cost sharing information was used.

#### 4) Description of standardized plan population data used:

Detail of data used for each of the subcalculators is described below in items 5 & 6. All data was based on either the AVC continuance tables, or a national data set which is representative of the SG population

5) If the method described in 156.135.(b).(2) was used, description of how the benefits were modified to fit the parameters of the AV calculator:

#### MH OP Benefit Plan Fit Process

MH OP has two subcategories: MH OP - Office Visit and MH OV - All Other. The equivalent coinsurance for each was set as the plan copay divided by the unit cost. The adjusted equivalent coinsurance was then calculated for each copay/deductible combination. If there was non-uniform deductible applicability, the equivalent coinsurance was calculated that produced the same net impact as assuming both subcategories had no deductible applied. This was based on the distribution of claims cost from the AVC continuance tables, adjusted to take into account the impact of the OOP Max. The average coinsurance of the row was calculated based on the weightings of the internal subcategories. This coinsurance was then coverted to a copay based on the average unit cost from the aforementioned continuance tables.

#### 6) If the method described in 156.135.(b).(3) was used, description of the data and method used to develop the adjustments:

None

#### Certification Language:

The development of the actuarial value was determined in accordance with the ASOPs established by the ASB and with applicable laws and regulations.

This analysis was conducted by a member of the American Academy of Actuaries that meets the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States promulgated by the American Academy of Actuaries, and has the education and experience necessary to perform the work.

The certifying actuary is an employee of Aetna.

This certification supports plans offered in the Small Group market.

Metal levels were appropriately assigned based on applicable law.

Actuarial Value determination was made based on the Draft 2022 AV Calculator, since the Final 2022 AV Calculator had not yet been released at time of certification

3) Confirmation that only in-network cost sharing including multitier networks, was considered: Confirmed. Only in-network cost sharing information was used.

#### 4) Description of standardized plan population data used:

Detail of data used for each of the subcalculators is described below in items 5 & 6. All data was based on either the AVC continuance tables, or a national data set which is representative of the SG population

#### 5) If the method described in 156.135.(b).(2) was used, description of how the benefits were modified to fit the parameters of the AV calculator:

#### MH OP Benefit Plan Fit Process

MH OP has two subcategories: MH OP - Office Visit and MH OV - All Other. The equivalent coinsurance for each was set as the plan copay divided by the unit cost. The adjusted equivalent coinsurance was then calculated for each copay/deductible combination. If there was non-uniform deductible applicability, the equivalent coinsurance was calculated that produced the same net impact as assuming both subcategories had no deductible applied. This was based on the distribution of claims cost from the AVC continuance tables, adjusted to take into account the impact of the OOP Max. The average coinsurance of the row was calculated based on the weightings of the internal subcategories. This coinsurance was then coverted to a copay based on the average unit cost from the aforementioned continuance tables.

#### ER Benefit Plan Fit Process

Where both an ER copay and coinsurance exist, we calculated a coinsurance equivalent amount. The copay visit costs were converted to equivalent coinsurance using the AVC continuance table average unit costs. The copay equivalent coinsurance was then multiplied by the actual coinsurance as the aggregate equivalent coinsurance.

#### 6) If the method described in 156.135.(b).(3) was used, description of the data and method used to develop the adjustments:

#### Certification Language:

None

The development of the actuarial value was determined in accordance with the ASOPs established by the ASB and with applicable laws and regulations.

This analysis was conducted by a member of the American Academy of Actuaries that meets the Qualification Standards for Actuaries Issuing Statements of Actuarial Opinion in the United States promulgated by the American Academy of Actuaries, and has the education and experience necessary to perform the work.

The certifying actuary is an employee of Aetna.

This certification supports plans offered in the Small Group market.

Metal levels were appropriately assigned based on applicable law.

Actuarial Value determination was made based on the Draft 2022 AV Calculator, since the Final 2022 AV Calculator had not yet been released at time of certification

#### Unique Plan Design - Issuer Actuarial Value Supporting Documentation and Justification

| 0C004 |
|-------|
|       |

HIOS Plan Ids: 73987DC0040046

#### 1) Justification for use of Issuer AV:

Per 156.135, the AV must be certified by a member of the American Academy of Actuaries using generally accepted actuarial principles and methodologies. There are 3 types of certification:

- (1) Option 1 Certify that the plan was entered correctly and does not vary materially from standard options entered
- (2) Option 2 Certify that entries into the calculator were modified to reflect the plan appropriately [156.135.(b).(2)]
- (3) Option 3 Used the calculator for provisions that fit and made adjustment for plan design features that deviate outside of calculator [156.135.(b).(3)]

Aetna benefit plans were analyzed vs the AVC to determine when Option 2 and/or Option 3 vs Option 1 certification was necessary. Four underlying calculators were built to support population of the Mental Health OP, Specialist OV, ER, and Rx generic rows in the AVC. These all support Option 2 certifications, but only the calculators used are referenced below. A separate calculator was used for plans with True Individual Family (TIF) deductibles in support of Option 3. Again, only if the calculator was used would it be referenced below. In addition, a 0.9999 factor is applied to the average coinsurance in row 11 for most plans. While not materially impacting the entered benefit value, this methodology prevents the OP facility/physician splitting methodology from being invoked which we do not believe is appropriate for our benefit plans. The output from this consistently-applied process reflects our certified Actuarial Values.

#### 2) Regulatory permitted alternate method used:

(3) Option 3 - Used calculator for provisions that fit and made adjustment for plan design features that deviate outside of calculator [156.135.(b).(3)]

3) Confirmation that only in-network cost sharing including multitier networks, was considered: Confirmed. Only in-network cost sharing information was used.

#### 4) Description of standardized plan population data used:

Detail of data used for each of the subcalculators is described below in items 5 & 6. All data was based on either the AVC continuance tables, or a national data set which is representative of the SG population

5) If the method described in 156.135.(b).(2) was used, description of how the benefits were modified to fit the parameters of the AV calculator: None

#### 6) If the method described in 156.135.(b).(3) was used, description of the data and method used to develop the adjustments:

#### TIF (True individual family) Deductible

For plans with a TIF deductible, the average change in paid to allowed due to this feature was determined based on internal cost data and a SG appropriate distribution of single vs family members. That process produces an additive adjustment to the AV obtained via the methodology described above in support of 156.135.(b).(2) certifications.

### Actuarial Value Snapshot

The Actuarial Value Calculator (AV Calculator) is designed to give an estimate of network liability for a given plan design. This build of the AV Calculator uses data from a large national commercial database to build continuance tables by metal tier.

This product, DC Bronze HNOnly 6000 80% \$15/50 E, satisfies the HHS guidelines for a Bronze plan with an Actuarial Value of 64.62%

### DC Gold HNOnly 1500 90% E

### **Actuarial Value Snapshot**

The Actuarial Value Calculator (AV Calculator) is designed to give an estimate of network liability for a given plan design. This build of the AV Calculator uses data from a large national commercial database to build continuance tables by metal tier.

This product, DC Gold HNOnly 1500 90% E, satisfies the HHS guidelines for a Gold plan with an Actuarial Value of 79.91%

### DC Gold HNOnly 1650 100% HSA T

### Actuarial Value Snapshot

The Actuarial Value Calculator (AV Calculator) is designed to give an estimate of network liability for a given plan design. This build of the AV Calculator uses data from a large national commercial database to build continuance tables by metal tier.

This product, DC Gold HNOnly 1650 100% HSA T, satisfies the HHS guidelines for a Gold plan with an Actuarial Value of 81.81%

### DC Gold HNOnly 500 90% \$25/40 E

### Actuarial Value Snapshot

The Actuarial Value Calculator (AV Calculator) is designed to give an estimate of network liability for a given plan design. This build of the AV Calculator uses data from a large national commercial database to build continuance tables by metal tier.

This product, DC Gold HNOnly 500 90% \$25/40 E, satisfies the HHS guidelines for a Gold plan with an Actuarial Value of 79.54%

### DC Gold HNOnly 70% \$25/40 E

### Actuarial Value Snapshot

The Actuarial Value Calculator (AV Calculator) is designed to give an estimate of network liability for a given plan design. This build of the AV Calculator uses data from a large national commercial database to build continuance tables by metal tier.

This product, DC Gold HNOnly 70% \$25/40 E, satisfies the HHS guidelines for a Gold plan with an Actuarial Value of 81.99%

### DC Silver HNOnly 3000 100% HSA E

### Actuarial Value Snapshot

The Actuarial Value Calculator (AV Calculator) is designed to give an estimate of network liability for a given plan design. This build of the AV Calculator uses data from a large national commercial database to build continuance tables by metal tier.

This product, DC Silver HNOnly 3000 100% HSA E, satisfies the HHS guidelines for a Silver plan with an Actuarial Value of 71.57%

### DC Silver HNOnly 4800 80% \$25/45 E

### Actuarial Value Snapshot

The Actuarial Value Calculator (AV Calculator) is designed to give an estimate of network liability for a given plan design. This build of the AV Calculator uses data from a large national commercial database to build continuance tables by metal tier.

#### Experience Period 1.0155 Demographic Factor

Note:

Experience Period Demographic Factor computed as the weighted average of gender specific Demographic Factor by current population distribution.

Projected Demographic Factor computed as the weighted average of gender specific Demographic Factor by projected population distribution.

Claim Impact due to Demographic Changes computed as the ratio of the Projected Demographic Factor over the Experience Period Demographic Factor.

#### Exhibit 3

#### Projected Membership Distribution by County

| Rating Area | Counties             | Experience Period<br>Membership | Experience Period<br>Area Factor | Projected<br>Membership | Projected Area<br>Factor |
|-------------|----------------------|---------------------------------|----------------------------------|-------------------------|--------------------------|
| 1           | District of Columbia | 100%                            | 1.000                            | 100%                    | 1.000                    |

| Average Experience Period<br>Area Factor | 1.0000 |
|--|--------|
|--|--------|

#### Note:

Average Experience Period Area Factor computed as the weighted average of Experience Period Area Factors by experience period membership distribution.

| Average Projected Area<br>Factor | 1.0000 |
|----------------------------------|--------|
|----------------------------------|--------|

#### Note:

Projected Area Factor computed as the weighted average of Projection Period Area Factors by projected membership distribution.

| Area Shift Factor | 1.0000 |
|-------------------|--------|
|                   |        |

#### Note:

Area Shift Factor computed as the ratio of the Projected Membership by Area over the Experience Membership by Area Factor represents: The impact due to the shift of the population distribution across areas.

#### Area Factor Change 1.0000

#### Note:

Area Factor Change computed as the ratio of the Projected Area Factor over the Experience Area Factor both using experience membership Factor represents: The impact due to cost relativity changes, including

changes to provider networks and contracts, from the experience period to the rating period.

### Exhibit 4

### Projected Membership and Paid to Allowed by Metal Tier

| Metallic Tier | Projected<br>Membership | Projected Paid to Allowed<br>Ratio |
|---------------|-------------------------|------------------------------------|
| Platinum      | 0                       | N/A                                |
| Gold          | 356                     | 83%                                |
| Silver        | 28                      | 74%                                |
| Bronze        | 11                      | 67%                                |
| Catastrophic  | 0                       | N/A                                |
| Total         | 395                     | 82%                                |

### **Exhibit 5** Retention as a Percent of Premium and PMPM

| Retention Components               | % of Premium | РМРМ    |
|------------------------------------|--------------|---------|
| Administrative Expense Load        | 9.69%        | \$58.75 |
| Profit & Risk Load                 | 4.74%        | \$28.74 |
| Premium Tax                        | 3.37%        | \$20.43 |
| User Exchange Fee                  | 0.90%        | \$5.46  |
| State Based Exchange Fee           | 0.00%        | \$0.00  |
| HIF                                | 0.00%        | \$0.00  |
| Risk Adjustment User Fee and PCORI | 0.08%        | \$0.48  |
| Federal Income Tax                 | 1.26%        | \$7.64  |
| Total Taxes and Fees               | 5.61%        | \$34.01 |

### Exhibit 6 MLR Projection

|     |                                   |          | Formula       |
|-----|-----------------------------------|----------|---------------|
| (a) | Premium (pmpm)                    | \$606.31 |               |
| (b) | Medical Cost (pmpm)               | \$484.80 |               |
| (c) | Medical Benefit Ratio (MBR)       | 80.0%    | = (c) / (b)   |
|     |                                   |          |               |
| (d) | Quality Improvement Action (pmpm) | \$4.85   | = (a) x 0.80% |
| (e) | Taxes and Fees (pmpm)             | \$34.01  |               |
|     |                                   |          |               |
| (f) | Adjusted Premium (pmpm)           | \$572.30 | =(a) - (e)    |
| (g) | Adjusted Claims (pmpm)            | \$489.66 | = (b) + (d)   |
|     | Medical Loss Ratio (MLR)          | 85.6%    | =(g) / (f)    |

Notes:

ACA adjustments for QIA and taxes and fees are estimates based on historical experience and projected expenses.

Values reflect current actuarial projections and will differ from the final reported MLR.

This projection applies to the products included in this filing and is a standalone calculation for the 2022 calendar year. This projection differs from the MLR calculation specified by PPACA which includes three years of experience for all business in the MLR pool.

### Exhibit 7 Quarterly Trend Factors

| Effective Quarter | Membership | Trend Factor | Index Rate |
|-------------------|------------|--------------|------------|
| 1Q 2022           | 79.3%      | 1.000        | \$579.71   |
| 2Q 2022           | 6.0%       | 1.027        | \$595.51   |
| 3Q 2022           | 12.4%      | 1.055        | \$611.73   |
| 4Q 2022           | 2.3%       | 1.084        | \$628.40   |
| Total             | 100.0%     | 1.010        | \$585.76   |

### Exhibit 8 Trend Exhibit

| Service Type        | Unit Cost | Utilization | Total<br>Allowed |
|---------------------|-----------|-------------|------------------|
| Facility Inpatient  | 5.6%      | 2.5%        | 8.2%             |
| Facility Outpatient | 3.6%      | 7.0%        | 10.8%            |
| Physician           | 1.5%      | 7.0%        | 8.6%             |
| Capitation          | 0.0%      | 0.0%        | 0.0%             |
| Medical             | 3.1%      | 6.3%        | 9.6%             |
|                     |           |             |                  |
| Pharmacy            | 9.7%      | 2.6%        | 12.6%            |
| Total (Med + Rx)    | 4.5%      | 5.6%        | 10.2%            |

### Exhibit 9

### Sample Rate Calculation

The following steps outline the mathematical formula used to develop the member level rates for a sample small group. The input assumptions and the census provided below are for illustrative purposes only.

### **Sample Small Group Information:**

| Effective Date: | 1/1/2022                            |
|-----------------|-------------------------------------|
| Rating Area:    | Rating Area 1                       |
| Plan:           | DC Silver HNOnly 4800 80% \$25/45 E |

|              | Employee | Spouse | Child 1 | Child 2 | Child 3 |
|--------------|----------|--------|---------|---------|---------|
| Group Census | Age      | Age    | Age     | Age     | Age     |
| Employee 1   | 35       | 36     | 5       | 7       |         |
| Employee 2   | 56       | 52     |         |         |         |
| Employee 3   | 24       | 21     |         |         |         |
| Employee 4   | 52       | 49     | 19      | 17      | 16      |
| Employee 5   | 65       | 65     | 25      |         |         |
| Employee 6   | 58       | 60     | 24      |         |         |
| Employee 7   | 56       | 51     |         |         |         |
| Employee 8   | 42       | 41     |         |         |         |
| Employee 9   | 33       | 34     | 5       | 6       | 7       |
| Employee 10  | 25       | 28     | 2       | 1       |         |

| Age and Tobacco |          |        | Age Factors |         |         |
|-----------------|----------|--------|-------------|---------|---------|
| <b>Factors</b>  | Employee | Spouse | Child 1     | Child 2 | Child 3 |
| Employee 1      | 0.876    | 0.896  | 0.654       | 0.654   |         |
| Employee 2      | 1.801    | 1.545  |             |         |         |
| Employee 3      | 0.727    | 0.727  |             |         |         |
| Employee 4      | 1.545    | 1.377  | 0.654       | 0.654   | 0.654   |
| Employee 5      | 2.181    | 2.181  | 0.727       |         |         |
| Employee 6      | 1.944    | 2.099  | 0.727       |         |         |
| Employee 7      | 1.801    | 1.487  |             |         |         |
| Employee 8      | 1.053    | 1.013  |             |         |         |
| Employee 9      | 0.836    | 0.856  | 0.654       | 0.654   | 0.654   |
| Employee 10     | 0.727    | 0.744  | 0.654       | 0.654   |         |

### **Calculation of Monthly Premium**

Step 1: Multiply Market Base Rate x Rating Area Factor x Plan Factor x Effective Date Factor

| Market Base Rate =                                       | \$667.10 |
|--|----------|
| x Rating Area Factor (Rating Area 1)                     | 1.0000   |
| x Plan Factor  | 0.6182   |
| x Effective Date Factor                                  | 1.0000   |
| Market Base Rate adjusted for Plan/Area/Effective Date = | \$412.43 |

Step 2: Multiply Adjusted Market Base Rate in Step 1 by the Member level Age and Tobacco Factors:

| <b>Member Monthly Rates</b> | Employee | Spouse   | Child 1  | Child 2  | Child 3  | Total       |
|-----------------------------|----------|----------|----------|----------|----------|-------------|
| Employee 1                  | \$361.29 | \$369.54 | \$269.73 | \$269.73 |          | \$1,270.29  |
| Employee 2                  | \$742.79 | \$637.21 |          |          |          | \$1,380.00  |
| Employee 3                  | \$299.84 | \$299.84 |          |          |          | \$599.68    |
| Employee 4                  | \$637.21 | \$567.92 | \$269.73 | \$269.73 | \$269.73 | \$2,014.32  |
| Employee 5                  | \$899.52 | \$899.52 | \$299.84 |          |          | \$2,098.88  |
| Employee 6                  | \$801.77 | \$865.70 | \$299.84 |          |          | \$1,967.31  |
| Employee 7                  | \$742.79 | \$613.29 |          |          |          | \$1,356.08  |
| Employee 8                  | \$434.29 | \$417.80 |          |          |          | \$852.09    |
| Employee 9                  | \$344.79 | \$353.04 | \$269.73 | \$269.73 | \$269.73 | \$1,507.02  |
| Employee 10                 | \$299.84 | \$306.85 | \$269.73 | \$269.73 |          | \$1,146.15  |
| Group Total Monthly Premiu  | m:       |          |          |          |          | \$14,191.82 |

Note: Member level monthly rates are rounded to the nearest penny.

Age Calibration Factor1.111Note:

43

Age Calibration Factor

computed as the weighted average of HHS Age Factor by projected membership distribution.

### Weighted Average Age

Note:

This is the age that most closely corresponds to the age calibration factor.

| 52  | 1.10% | 0.86% | 1.545 |
