# CareFirst BlueCross BlueShield Part III Actuarial Memorandum

# 4.1 Redacted Actuarial Memorandum

CareFirst is making no redactions so both Actuarial Memorandum submissions are the same.

# 4.2 General Information Section

Company Identifying Information:

- Company Legal Name: Group Hospitalization and Medical Services, Inc. (GHMSI) NAIC # 53007
- State: District of Columbia
- HIOS Issuer ID: 78079
- Market: Individual, Non-Medigap (On Exchange)
- Effective Date: 1/1/25 12/31/25
- Company Filing Number: 2768
- SERFF Filing Number: CFAP-134065040

**Company Contact Information:** 

- Primary Contact Name: Mr. Cory Bream, ASA, MAAA
- Primary Contact Telephone Number: 410-998-5308
- Primary Contact E-Mail Address: Cory.Bream@CareFirst.com

### 4.3 Proposed Rate Changes (Individual market)

Base rates are changing 3.6% on average. The range is 1.4% to 5.0%. This filing applies to all new and renewing, in-force business in the guaranteed renewable, non-grandfathered, ACA, metaled benefit plans. The number of policyholders affected by this rate change is 5,590.

### Reason for Rate Change(s):

The main drivers supporting the rate change are 1) trend, 2) lower projected changes in pool morbidity, and 3) lower projected risk adjustment receivable.

For our initial submission, we have not adjusted 2025 rates to reflect potential impacts of Medicaid redeterminations. We reserve the right to update assumptions as appropriate during the review process.

# 4.4 Market Experience (Combined Individual/Small Group market)

Our SRP reflects all covered lives for every non-grandfathered product in our market per 45 CFR Part § 156.80 (d).

### 4.4.1 Experience and Current Period Premium, Claims, and Enrollment

The incurred period is 1/1/23 through 12/31/23, as required.

Paid Through Date: 2/29/24 Current Date: 2/29/24

Premiums (prior to MLR rebates) in Experience Period: \$260,900,126 Experience Period Member Months: 358,970 Current Date Members: 29,178

### Allowed and Incurred Claims Incurred During the Experience Period

### Allowed Claims

- Processed through issuer's claim system: \$261,324,770
- Processed outside issuer's claim system: \$0
- **IBNR:** \$9,589,348

### **Incurred Claims**

- Processed through issuer's claim system: \$233,918,699
- Processed outside issuer's claim system: \$0
- IBNR: \$8,523,738

### Method used for determining Allowed Claims

The allowed claims come directly from our claim records and account for capitations by applying contracted PMPM amounts directly to enrollment from the experience period. Drug rebates from the experience period are also included.

### Support for IBNR estimates

Our estimates of IBNR paid claims were derived using a "chain and ladder" model based on the most recent 36 months to derive the completion factor and IBNR for each incurred month. Estimates of IBNR allowed claims were derived using the same completion factors as those estimated based on paid claims.

### 4.4.2 Benefit Categories

Inpatient (hospital), outpatient (hospital), professional, other medical (non-capitated ambulance, home health care, durable medical equipment, prosthetics, supplies, vision exams, pediatric dental services and other), prescription drug & capitations.

### 4.4.3 Projection Factors

### 4.4.3.1 Trend Factors

### Trend Factors (Cost/Utilization):

Exhibit 8 in the Memorandum contains our selected annual utilization and unit cost trends by service category. Unit cost and utilization trends were set by service category to produce the overall anticipated trend of 8.9%, which is an increase compared to the 7.8% trend assumed in our prior filing. Current observed medical trends as of 202312 are -0.5%, down from 5.9% in 202212. Current observed drug trends are 4.2% as of 202312, up from 2.3% in 202212. The composite medical and drug trend is 0.8% as of 202312, down from 4.9% in 202212.

When normalized for induced demand, network, and demographics, the observed composite trends of 0.8% in 202312 and 4.9% in 202212 become 0.4% and 4.9%, respectively.

Using the proposed trend factor, in combination with other assumptions such as morbidity, etc., the annualized allowed PMPM change between 2025 and 2023 represented in this filing is 7.7%.

### 4.4.3.2 Adjustments to Trended EHB Allowed Claims PMPM

### Morbidity Adjustment:

Exhibit 4 in our memorandum contains support for this adjustment. To measure the projected morbidity of our population, we split our projected population into cohorts defined by metal tier and membership type. Membership type is defined as new member, existing member, or transfer from other lines of business. Consistent with the rules in the 2025 Unified Rate Review Instructions, we began our morbidity projection by normalizing allowed claims for each of the cohorts outlined above for projected changes in age, gender, network and induced utilization.

We have not reflected any morbidity adjustments to the base period normalized allowed PMPMs by metal tier for the existing and transfer membership types. Exhibit 4 demonstrates how these PMPMs are unchanged from the current year YTD to remainder of current year. For the new membership type we have assumed a claims PMPM by metal equal to that of the existing members.

The resulting morbidity calculation is completed in steps split by year:

- Once the remainder of current year (2024) is completed, the membership and claims by metal are combined to derive a total estimate for the year.
- This result carries over to the rating year (2025) as the metal specific normalized PMPMs for the existing members.
- The assumed claims PMPMs by metal for the new members are again assumed to equal those for the existing members.
- Transfer members PMPMs are treated separately and reflect base period amounts projected forward. Our projection factor for these members is 1.250.
- Once these PMPMs are set, the final morbidity calculation is driven by the projected member months at these levels.

The total morbidity change from 2023 to 2025 is expected to be -1.5%, which is the factor used in Exhibit 1 in the calculation of the market adjustment index rate.

### **Demographic Shift:**

Exhibit 6 in the Memorandum contains support for our adjustment due to the anticipated change in the average age of this population between the experience and projection periods. Our methodology measures the change in average demographic factor between the base and rating periods. The demographic factors used are from an internal age/gender curve with an approximate 4.5:1 ratio (age 64+ to age 21 factors). Factors for both time periods are weighted using member months and the ratio of the two is applied as our market level adjustment.

### Plan Design Changes:

Exhibit 5 in the Memorandum details our support for this adjustment to account for anticipated changes in the average utilization of services due to differences in average cost sharing requirements between the experience and projection periods. Our methodology measures the change in the average induced utilization factor between the base and rating periods. The factors used are the metal level factors from the federal risk adjustment program. Once the average internal pricing AV, weighted by member months, is determined for both the experience and rating periods the linearly interpolated factor is determined. The ratio of these two factors is applied as our market level adjustment.

### **Other Adjustments:**

Exhibit 7 in the Memorandum details our support for these adjustments. We are proposing additional other adjustments for changes to our capitation fees and drug rebates.

### 4.4.3.3 Manual Rate Adjustments

Not applicable, as experience was determined to be fully credible.

### 4.4.3.4 Credibility of Experience

Exhibit 2 in the Memorandum contains a summary of our base period experience, including member months. We have assigned full credibility to this experience.

### 4.4.3.5 Establishing the Index Rate

The experience period index rate for this filing is \$754.26 and the projection period index rate is \$874.85. Both rates and the adjustments made to develop the projected amount from the experience period amount can be found on Exhibit 1 of the Memorandum. Specifically, these adjustments correspond to those outlined in sections 4.4.3.1 and 4.4.3.2.

### 4.4.3.6 Development of the Market-wide Adjusted Index Rate

The Market-wide Adjusted Index Rate for the Individual market is \$772.51 and is derived by multiplying the projection period index rate with the market level adjustments for the risk adjustment program. Details for the risk adjustment program can be found below.

### Reinsurance

There are no reinsurance recoveries applicable to this market.

### **Risk Adjustment Payment/Charge:**

The Experience Period Risk Adjustment transfers in the URRT are based on the most recent Wakely estimates.

Our projected 2025 risk adjustment transfers, found in Exhibit 9, have been calculated consistent with our membership and morbidity projections found elsewhere in this filing. To project the risk adjustment factors from 2023 to 2025, we have assumed an increase in the statewide premium of 12.9% which reflects an estimate of an average 7.5% increase in 2024 and 5.0% increase in 2025. We have assumed that our CFI Individual non-Catastrophic market share will increase from 79.0% in 2023 to 80.0% in 2025 and that our CFI Individual non-Catastrophic PLRS ratio to the state will decrease from 1.072 in 2023 to 1.065 in 2025. The resultant estimate of risk adjustment is that the GHMSI receivable transfer PMPM for the Individual market will decrease from \$89.59 in 2023 to \$82.40 in 2025. Combined with the \$82.40 is a projected HCRP net PMPM payable of -\$0.26, which results in a total projected risk adjustment receivable of \$82.14.

The risk adjustment estimates above are calculated separately for the Individual market and the Small Group market as required. This approach is different than the blended approach used to calculate the Index Rate, and therefore there is an inconsistency between the risk assumed in rates and the claims data used in the calculation.

The risk adjustment estimates above are calculated separately for the Individual market and the Small Group market as required. This approach is different than the blended approach used to calculate the Index Rate, and therefore there is an inconsistency between the risk assumed in rates and the claims data used in the calculation. As a result of this approach, we are forced to rebalance the contribution to reserve assumed in the Individual filings so that our rate submissions reflect lower HMO rates than PPO by metal. If such rebalancing was not needed, the rate change for Individual GHMSI is estimated to be 1.9%.

If a merged Individual and Small Group risk adjustment methodology was used, the rate change for Individual GHMSI is estimated to be 2.2%.

### **Exchange User Fees:**

There are no applicable exchange user fees since the rates in this filing are not offered on the Federal Marketplace.

### 4.4.4 Plan Adjusted Index Rate

Exhibit 11 in the Memorandum displays the adjustments made for each plan. Every plan adjusted index rate is developed from the market adjusted index rate using only the allowable plan level modifiers as follows:

- Actuarial value and cost-sharing design of the plan: The actuarial value for each plan was determined using our own internal model and estimates the ratio of paid to allowed dollars given that plan's benefit design and the assumed allowed amount consistent with the projection period index rate. The assumed actuarial values also include a multiplicative factor applied uniformly across plans. The application of the AV to an index rate that is the same across all plans results in a member months weighted average AV (and resulting average paid PMPM assumed in rates) that may be materially deficient depending on the distribution of projected membership and actual cost. This factor accounts for the deficiency specific to the combined block of business. The URRT instructions state that this adjustment may take into account the benefit differences and utilization differences due to differences in cost-sharing. As a result, our plan adjusted index rates also include adjustments to account for the impact the metal level has on utilization.
- **Provider network**: All plans offered use the PPO network.
- Benefits in addition to EHBs: There is an adjustment to account for abortion coverage and adult vision (which are offered in addition to EHBs).
- Administrative costs: See Exhibit 10A in the Memorandum for the assumed values of the following additional items.
  - 1. Administrative Expense (G&A)
  - 2. Broker Commissions & Fees
  - 3. Federal Income Tax (FIT)
  - 4. Contribution to Reserve (Post-Tax)
  - 5. State Premium Tax
  - 6. PCORI Fee
  - 7. Risk Adjustment User Fee
  - 8. Exchange Assessment Fee

For each plan, we have taken the applicable adjustment factor from each category above and multiplied them by the market adjusted index rate to derive each plan adjusted index rate.

#### 4.4.5 Calibration

#### Age Curve Calibration

We have calibrated to the rounded weighted average age which was determined as the age for the factor nearest our projected average factor. We have used the standard DC age curve factors and weighted them using member months in our calculation.

A demonstration of how the plan adjusted index rates and the age curve are used to generate the schedule of premium rates for each plan can be found on Exhibit 13.

#### **Geographic Factor Calibration**

We have elected not to rate for geographic region.

#### **Tobacco Use Rating Factor Calibration**

We have elected not to rate for tobacco usage.

#### 4.4.6 Consumer Adjusted Premium Rate Development

The premium rate that a given consumer will be charged is calculated by first taking the plan adjusted index rate for that member's chosen plan and dividing by the projected average age rating factor. The resulting value is the base rate for that plan. The final step in determining a consumer adjusted premium rate is to

take the rate from the first step and multiply it by the corresponding factor for that member's age from the standard DC age curve. Rate charts are provided for all the consumer adjusted premiums.

#### 4.5 Projected Loss Ratio

The projected loss ratio for the rates provided in this file, using the Federally-prescribed MLR methodology, is 86.3% for the Individual market and 85.9% for the combined Individual/Small Group market. Details behind this calculation can be found in Exhibit 10B.

#### 4.6 Plan Product Information

#### 4.6.1 AV Metal Values

The majority of our 2025 plans include varying cost share levels for some services that depend on the setting in which care is delivered. The HHS AV calculator was used to compute two separate AVs for each impacted plan – one which applied the higher level of cost-share, and one which applied the lower level of cost-share. The results were blended assuming 85% of the designated services are rendered in higher cost-share setting and the remaining 15% at the lower, consistent with experience from our small group and individual markets. Plans without these features used the AV calculator without modification.

Additional details regarding the unique plan designs not accommodated by the HHS AV Calculator along with printouts for each plan are provided in the "Actuarial Memorandum" section of the Supporting Documentation tab of the SERFF filing.

#### 4.6.2 Membership Projections

The membership projections found in Worksheet 2 of the URRT were developed from enrollment as of 2/29/24 using assumptions for termination rates, new sales and transfers. The projections also incorporate any plan mappings anticipated between that month and the rating period. For new plan offerings where no plans are being uniformly modified into them, a minimum level of enrollment was assumed.

#### 4.6.3 Terminated Plans and Products

Plan mappings from the experience period to the rating period can be found in Appendix – Mapping.

#### 4.6.4 Plan Type

Each plan in Worksheet 2, Section I of the URRT contains a plan type that describes the plan exactly.

#### 4.7 Miscellaneous Instructions

#### 4.7.1 Effective Rate Review Information (Optional)

We have no additional exhibits.

#### 4.7.2 Reliance

We do not have any reliance to state.

#### **4.7.3 Actuarial Certification**

Included in the Memorandum.

Group Hospitalization & Medical Services, Inc. d.b.a. CareFirst BlueCross BlueShield (NAIC # 53007)

> Rate Filing # 2768 D.C. Individual Products Rate Filing Effective 1/1/2025

**Actuarial Memorandum** 

# Group Hospitalization & Medical Services, Inc. (NAIC # 53007) H.R. 3950 - Public Law 111-148 - Patient Protection and Affordable Care Act (ACA) D.C. Individual Products Rate Filing Effective 1/1/2025 Actuarial Certification

I, Cory Bream, am a(n) Assistant Actuary with CareFirst GHMSI doing business as CareFirst BlueCross BlueShield. I am a member of the American Academy of Actuaries (AAA) in good standing and have the education and experience necessary to perform the work. Rates were developed in accordance with the appropriate Actuarial Standards of Practice (ASOPs) and the AAA's Code of Professional Conduct. While other ASOPs apply, a sample listing is below.

i. ASOP No. 5, Incurred Health and Disability Claims

ii. ASOP No. 8, Regulatory Filings for Health Plan Entities

iii. ASOP No. 12, Risk Classification

iv. ASOP No. 23, Data Quality

v. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages

vi. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health and Benefit Plans

vii. ASOP No. 41, Actuarial Communications

viii. ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act

I have been involved in the development of these rates, and to the best of my knowledge and understanding, the rates in this filing have been developed in accordance with the available regulations and guidance. Should new guidance be released, this filing may be revised. I certify that this filing has been prepared based on sound and commonly accepted actuarial principles, practices and assumptions in the aggregate for the legal entity.

I further certify the following:

1. The projected Index Rate is:

- a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
- b. Developed in compliance with the applicable Actuarial Standards of Practice
- c. Reasonable in relation to the benefits provided and the population anticipated to be covered
- d. Neither excessive nor deficient

2. The Index Rate and only the allowable modifiers as described in 45 CFR § 156.80(d)(1) and 45 CFR § 156.80(d)(2) were used to generate plan level rates. These rates have been calibrated to account for age (geography and tobacco are not applicable).

3. Consistent with 45 CFR § 156.135, the 2025 HHS Actuarial Values (AV) Calculator was used to determine the AV metal values shown in Worksheet 2 of Part I of the Unified Rate Review Template (URRT) for all plans except those specified. Where necessary, the AVs of the benefits proposed have been calculated with minimal modifications to the AV calculator as described in the Actuarial Memorandum.

As a qualifier to the opinion, the URRT does not demonstrate the process used by the issuer to develop the rates. Rather it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Marketplaces, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

For our initial submission, we have not adjusted 2025 rates to reflect potential impacts of Medicaid redeterminations. We reserve the right to update assumptions as appropriate during the review process.

The DISB has directed CareFirst to file rate submissions with an Actuarial Value Deficiency Factor that reflects the merged pool instead of market specific factors.

The DISB has directed CareFirst to file rate submissions that reflect lower HMO rates than PPO by metal. In order to meet this directive, the contribution to reserve assumed in this filing is 3.55%. The assumed contribution to reserve in this filing, aggregated with the assumed contribution to reserve in our BlueChoice filing, reflects a 2.00% contribution to reserve.

Cory Bream Digitally signed by Cory Bream Date: 2024.05.01 10:30:15

| (4)  | Change in Morbidity                                  | 0.9849       | 4       |
| (5)  | Additional Population Adjustment                     | 1.0000       |         |
| (6)  | Induced Demand                                       | 0.9941       | 5       |
| (7)  | Projection Period Utilization and Network Adjustment | 1.0000       |         |
| (8)  | Demographic Adjustment                               | 1.0073       | 6       |
| (9)  | Area Adjustment                                      | 1.0000       |         |
| (10) | Additional "Other" Adjustments                       | 0.9914       | 7       |
| (11) | Annualized Trend                                     | 8.9%         | 8       |
| (12) | Months of Trend                                      | 24.0         |         |
| (13) | Unit cost & Utilization/1,000 Trend Factor           | 1.1863       |         |
| (14) | Projection Period Index Rate                         | \$<br>874.85 |         |
| (15) | Reinsurance Program                                  | 1.0000       |         |
| (16) | Risk Adjustment Program                              | 0.8830       | 9       |
| (17) | Federal Exchange User Fee                            | 1.0000       |         |
| (18) | Market Adjusted Index Rate                           | \$<br>772.51 |         |
|      | Without Risk Adjustment                              | \$<br>874.85 |         |

The projection period index rate was developed by projecting individual URRT service categories and then building up into a total PMPM. As a result the adjustments above may not match the referenced exhibits exactly because these represent the average factor when considering application at the service category level.

# Exhibit 2 - Base Period Experience

| Service Category                | Incurred Allowed  | AI | lowed PMPM | Utilization<br>Description | Utilization per<br>1,000 | C  | Average<br>ost/Service |

\*Rating factors by cohort for the rating period are based on average factors for each cohort from the current year to date. Weights are based on expected distribution of member months.

\*\*The rating period average age is determined from the member weighted average factor. Specifically it is linearly interpolated using the two age factors on the curve surrounding the member weighted average factor.

\*\*\*Applied uniformly to all plans

(3)/(2)

# CareFirst BlueCross BlueShield Part III Actuarial Memorandum

#### 4.1 Redacted Actuarial Memorandum

CareFirst is making no redactions so both Actuarial Memorandum submissions are the same.

#### 4.2 General Information Section

Company Identifying Information:

- Company Legal Name: Group Hospitalization and Medical Services, Inc. (GHMSI) NAIC # 53007
- State: District of Columbia
- HIOS Issuer ID: 78079
- Market: Individual, Non-Medigap (On Exchange)
- Effective Date: 1/1/25 12/31/25
- Company Filing Number:
- SERFF Filing Number:

#### **Company Contact Information:**

- Primary Contact Name:
- Primary Contact Telephone Number:
- Primary Contact E-Mail Address:

#### 4.3 Proposed Rate Changes (Individual market)

Base rates are changing **the second** on average. The range is **the second** to **the second**. This filing applies to all new and renewing, in-force business in the guaranteed renewable, non-grandfathered, ACA, metaled benefit plans. The number of policyholders affected by this rate change is **the second**.

#### Reason for Rate Change(s):

### 4.4 Market Experience (Combined Individual/Small Group market)

Our SRP reflects all covered lives for every non-grandfathered product in our market per 45 CFR Part § 156.80 (d).

#### 4.4.1 Experience and Current Period Premium, Claims, and Enrollment

The incurred period is 1/1/23 through 12/31/23, as required.

Paid Through Date: 2/29/24 Current Date: 2/29/24

Premiums (prior to MLR rebates) in Experience Period: Experience Period Member Months: Current Date Members:

#### Allowed and Incurred Claims Incurred During the Experience Period

Allowed Claims

- Processed through issuer's claim system:
- Processed outside issuer's claim system:
- IBNR:

#### **Incurred Claims**

- Processed through issuer's claim system:
- Processed outside issuer's claim system:
- IBNR:

#### Method used for determining Allowed Claims

The allowed claims come directly from our claim records and account for capitations by applying contracted PMPM amounts directly to enrollment from the experience period. Drug rebates from the experience period are also included.

#### Support for IBNR estimates

Our estimates of IBNR paid claims were derived using a "chain and ladder" model based on the most recent 36 months to derive the completion factor and IBNR for each incurred month. Estimates of IBNR allowed claims were derived using the same completion factors as those estimated based on paid claims.

#### 4.4.2 Benefit Categories

Inpatient (hospital), outpatient (hospital), professional, other medical (non-capitated ambulance, home health care, durable medical equipment, prosthetics, supplies, vision exams, pediatric dental services and other), prescription drug & capitations.

#### 4.4.3 Projection Factors

4.4.3.1 Trend Factors

#### Trend Factors (Cost/Utilization):

Exhibit 8 in the Memorandum contains our selected annual utilization and unit cost trends by service category. Unit cost and utilization trends were set by service category to produce the overall anticipated trend of

When normalized for induced demand, network, and demographics, the observed composite trends of in and and in become and and respectively.

Using the proposed trend factor, in combination with other assumptions such as morbidity, etc., the annualized allowed PMPM change between 2025 and 2023 represented in this filing is **1999**.

4.4.3.2 Adjustments to Trended EHB Allowed Claims PMPM

#### Morbidity Adjustment:

Exhibit 4 in our memorandum contains support for this adjustment. To measure the projected morbidity of our population, we split our projected population into cohorts defined by metal tier and membership type. Membership type is defined as new member, existing member, or transfer from other lines of business. Consistent with the rules in the 2025 Unified Rate Review Instructions, we began our morbidity projection by normalizing allowed claims for each of the cohorts outlined above for projected changes in age, gender, network and induced utilization.

We have not reflected any morbidity adjustments to the base period normalized allowed PMPMs by metal tier for the existing and transfer membership types. Exhibit 4 demonstrates how these PMPMs are unchanged from the current year YTD to remainder of current year. For the new membership type we have assumed a claims PMPM by metal equal to that of the existing members.

The resulting morbidity calculation is completed in steps split by year:

- Once the remainder of current year (2024) is completed, the membership and claims by metal are combined to derive a total estimate for the year.
- This result carries over to the rating year (2025) as the metal specific normalized PMPMs for the existing members.
- The assumed claims PMPMs by metal for the new members are again assumed to equal those for the existing members.
- Transfer members PMPMs are treated separately and reflect base period amounts projected forward. Our projection factor for these members is **and a**.
- Once these PMPMs are set, the final morbidity calculation is driven by the projected member months at these levels.

The total morbidity change from 2023 to 2025 is expected to be **sector**, which is the factor used in Exhibit 1 in the calculation of the market adjustment index rate.

#### **Demographic Shift:**

Exhibit 6 in the Memorandum contains support for our adjustment due to the anticipated change in the average age of this population between the experience and projection periods. Our methodology measures the change in average demographic factor between the base and rating periods. The demographic factors used are from an internal age/gender curve with an approximate 4.5:1 ratio (age 64+ to age 21 factors). Factors for both time periods are weighted using member months and the ratio of the two is applied as our market level adjustment.

#### Plan Design Changes:

Exhibit 5 in the Memorandum details our support for this adjustment to account for anticipated changes in the average utilization of services due to differences in average cost sharing requirements between the experience and projection periods. Our methodology measures the change in the average induced utilization factor between the base and rating periods. The factors used are the metal level factors from the federal risk adjustment program. Once the average internal pricing AV, weighted by member months, is determined for both the experience and rating periods the linearly interpolated factor is determined. The ratio of these two factors is applied as our market level adjustment.

#### **Other Adjustments:**

Exhibit 7 in the Memorandum details our support for these adjustments. We are proposing additional other adjustments for changes to our capitation fees and drug rebates.

#### 4.4.3.3 Manual Rate Adjustments

Not applicable, as experience was determined to be fully credible.

#### 4.4.3.4 Credibility of Experience

Exhibit 2 in the Memorandum contains a summary of our base period experience, including member months. We have assigned full credibility to this experience.

#### 4.4.3.5 Establishing the Index Rate

The experience period index rate for this filing is **sectors** and the projection period index rate is **sectors**. Both rates and the adjustments made to develop the projected amount from the experience period amount can be found on Exhibit 1 of the Memorandum. Specifically, these adjustments correspond to those outlined in sections 4.4.3.1 and 4.4.3.2.

#### 4.4.3.6 Development of the Market-wide Adjusted Index Rate

The Market-wide Adjusted Index Rate for the Individual market is **and** is derived by multiplying the projection period index rate with the market level adjustments for the risk adjustment program. Details for the risk adjustment program can be found below.

#### Reinsurance

There are no reinsurance recoveries applicable to this market.

#### **Risk Adjustment Payment/Charge:**

The Experience Period Risk Adjustment transfers in the URRT are based on the most recent Wakely estimates.

The risk adjustment estimates above are calculated separately for the Individual market and the Small Group market as required. This approach is different than the blended approach used to calculate the Index Rate, and therefore there is an inconsistency between the risk assumed in rates and the claims data used in the calculation.

The risk adjustment estimates above are calculated separately for the Individual market and the Small Group market as required. This approach is different than the blended approach used to calculate the Index Rate, and therefore there is an inconsistency between the risk assumed in rates and the claims data used in the calculation. As a result of this approach, we are forced to rebalance the contribution to reserve assumed in the Individual filings so that our rate submissions reflect lower HMO rates than PPO by metal. If such rebalancing was not needed, the rate change for Individual GHMSI is estimated to be

If a merged Individual and Small Group risk adjustment methodology was used, the rate change for Individual GHMSI is estimated to be **Example**.

#### **Exchange User Fees:**

There are no applicable exchange user fees since the rates in this filing are not offered on the Federal Marketplace.

#### 4.4.4 Plan Adjusted Index Rate

Exhibit 11 in the Memorandum displays the adjustments made for each plan. Every plan adjusted index rate is developed from the market adjusted index rate using only the allowable plan level modifiers as follows:

- Actuarial value and cost-sharing design of the plan: The actuarial value for each plan was
  determined using our own internal model and estimates the ratio of paid to allowed dollars given
  that plan's benefit design and the assumed allowed amount consistent with the projection period
  index rate. The assumed actuarial values also include a multiplicative factor applied uniformly
  across plans. The application of the AV to an index rate that is the same across all plans results in
  a member months weighted average AV (and resulting average paid PMPM assumed in rates) that
  may be materially deficient depending on the distribution of projected membership and actual cost.
  This factor accounts for the deficiency specific to the combined block of business. The URRT
  instructions state that this adjustment may take into account the benefit differences and utilization
  differences due to differences in cost-sharing. As a result, our plan adjusted index rates also
  include adjustments to account for the impact the metal level has on utilization.
- **Provider network**: All plans offered use the PPO network.
- Benefits in addition to EHBs: There is an adjustment to account for abortion coverage and adult vision (which are offered in addition to EHBs).
- Administrative costs: See Exhibit 10A in the Memorandum for the assumed values of the following additional items.
  - 1. Administrative Expense (G&A)
  - 2. Broker Commissions & Fees
  - 3. Federal Income Tax (FIT)
  - 4. Contribution to Reserve (Post-Tax)
  - 5. State Premium Tax
  - 6. PCORI Fee
  - 7. Risk Adjustment User Fee
  - 8. Exchange Assessment Fee

For each plan, we have taken the applicable adjustment factor from each category above and multiplied them by the market adjusted index rate to derive each plan adjusted index rate.

#### 4.4.5 Calibration

#### Age Curve Calibration

We have calibrated to the rounded weighted average age which was determined as the age for the factor nearest our projected average factor. We have used the standard DC age curve factors and weighted them using member months in our calculation.

A demonstration of how the plan adjusted index rates and the age curve are used to generate the schedule of premium rates for each plan can be found on Exhibit 13.

#### **Geographic Factor Calibration**

We have elected not to rate for geographic region.

#### **Tobacco Use Rating Factor Calibration**

We have elected not to rate for tobacco usage.

#### 4.4.6 Consumer Adjusted Premium Rate Development

The premium rate that a given consumer will be charged is calculated by first taking the plan adjusted index rate for that member's chosen plan and dividing by the projected average age rating factor. The resulting value is the base rate for that plan. The final step in determining a consumer adjusted premium rate is to

take the rate from the first step and multiply it by the corresponding factor for that member's age from the standard DC age curve. Rate charts are provided for all the consumer adjusted premiums.

#### 4.5 Projected Loss Ratio

The projected loss ratio for the rates provided in this file, using the Federally-prescribed MLR methodology, is **set of** for the Individual market and **set of** for the combined Individual/Small Group market. Details behind this calculation can be found in Exhibit 10B.

#### 4.6 Plan Product Information

#### 4.6.1 AV Metal Values

The majority of our 2025 plans include varying cost share levels for some services that depend on the setting in which care is delivered. The HHS AV calculator was used to compute two separate AVs for each impacted plan – one which applied the higher level of cost-share, and one which applied the lower level of cost-share. The results were blended assuming **of** the designated services are rendered in higher cost-share setting and the remaining **of** at the lower, consistent with experience from our small group and individual markets. Plans without these features used the AV calculator without modification.

Additional details regarding the unique plan designs not accommodated by the HHS AV Calculator along with printouts for each plan are provided in the "Actuarial Memorandum" section of the Supporting Documentation tab of the SERFF filing.

#### 4.6.2 Membership Projections

The membership projections found in Worksheet 2 of the URRT were developed from enrollment as of 2/29/24 using assumptions for termination rates, new sales and transfers. The projections also incorporate any plan mappings anticipated between that month and the rating period. For new plan offerings where no plans are being uniformly modified into them, a minimum level of enrollment was assumed.

#### 4.6.3 Terminated Plans and Products

Plan mappings from the experience period to the rating period can be found in Appendix – Mapping.

#### 4.6.4 Plan Type

Each plan in Worksheet 2, Section I of the URRT contains a plan type that describes the plan exactly.

#### 4.7 Miscellaneous Instructions

#### 4.7.1 Effective Rate Review Information (Optional)

We have no additional exhibits.

#### 4.7.2 Reliance

We do not have any reliance to state.

#### 4.7.3 Actuarial Certification

Included in the Memorandum.

### CareFirst BlueCross BlueShield Part III Actuarial Memorandum

#### 4.1 Redacted Actuarial Memorandum

CareFirst is making no redactions so both Actuarial Memorandum submissions are the same.

#### 4.2 General Information Section

Company Identifying Information:

- Company Legal Name: Group Hospitalization and Medical Services, Inc. (GHMSI) NAIC # 53007
- State: District of Columbia
- HIOS Issuer ID: 78079
- Market: Individual, Non-Medigap (On Exchange)
- Effective Date: 1/1/25 12/31/25
- Company Filing Number: 2768
- SERFF Filing Number: CFAP-134065040

**Company Contact Information:** 

- Primary Contact Name: Mr. Cory Bream, ASA, MAAA
- Primary Contact Telephone Number: 410-998-5308
- Primary Contact E-Mail Address: Cory.Bream@CareFirst.com

#### 4.3 Proposed Rate Changes (Individual market)

Base rates are changing 3.6% on average. The range is 1.4% to 5.0%. This filing applies to all new and renewing, in-force business in the guaranteed renewable, non-grandfathered, ACA, metaled benefit plans. The number of policyholders affected by this rate change is 5,590.

#### Reason for Rate Change(s):

The main drivers supporting the rate change are 1) trend, 2) lower projected changes in pool morbidity, and 3) lower projected risk adjustment receivable.

For our initial submission, we have not adjusted 2025 rates to reflect potential impacts of Medicaid redeterminations. We reserve the right to update assumptions as appropriate during the review process.

#### 4.4 Market Experience (Combined Individual/Small Group market)

Our SRP reflects all covered lives for every non-grandfathered product in our market per 45 CFR Part § 156.80 (d).

#### 4.4.1 Experience and Current Period Premium, Claims, and Enrollment

The incurred period is 1/1/23 through 12/31/23, as required.

Paid Through Date: 2/29/24 Current Date: 2/29/24

Premiums (prior to MLR rebates) in Experience Period: \$260,900,126 Experience Period Member Months: 358,970 Current Date Members: 29,178

#### Allowed and Incurred Claims Incurred During the Experience Period

#### Allowed Claims

- Processed through issuer's claim system: \$261,324,770
- Processed outside issuer's claim system: \$0
- **IBNR:** \$9,589,348

#### **Incurred Claims**

- Processed through issuer's claim system: \$233,918,699
- Processed outside issuer's claim system: \$0
- IBNR: \$8,523,738

#### Method used for determining Allowed Claims

The allowed claims come directly from our claim records and account for capitations by applying contracted PMPM amounts directly to enrollment from the experience period. Drug rebates from the experience period are also included.

#### Support for IBNR estimates

Our estimates of IBNR paid claims were derived using a "chain and ladder" model based on the most recent 36 months to derive the completion factor and IBNR for each incurred month. Estimates of IBNR allowed claims were derived using the same completion factors as those estimated based on paid claims.

#### 4.4.2 Benefit Categories

Inpatient (hospital), outpatient (hospital), professional, other medical (non-capitated ambulance, home health care, durable medical equipment, prosthetics, supplies, vision exams, pediatric dental services and other), prescription drug & capitations.

#### 4.4.3 Projection Factors

#### 4.4.3.1 Trend Factors

#### Trend Factors (Cost/Utilization):

Exhibit 8 in the Memorandum contains our selected annual utilization and unit cost trends by service category. Unit cost and utilization trends were set by service category to produce the overall anticipated trend of 8.9%, which is an increase compared to the 7.8% trend assumed in our prior filing. Current observed medical trends as of 202312 are -0.5%, down from 5.9% in 202212. Current observed drug trends are 4.2% as of 202312, up from 2.3% in 202212. The composite medical and drug trend is 0.8% as of 202312, down from 4.9% in 202212.

When normalized for induced demand, network, and demographics, the observed composite trends of 0.8% in 202312 and 4.9% in 202212 become 0.4% and 4.9%, respectively.

Using the proposed trend factor, in combination with other assumptions such as morbidity, etc., the annualized allowed PMPM change between 2025 and 2023 represented in this filing is 7.7%.

#### 4.4.3.2 Adjustments to Trended EHB Allowed Claims PMPM

#### Morbidity Adjustment:

Exhibit 4 in our memorandum contains support for this adjustment. To measure the projected morbidity of our population, we split our projected population into cohorts defined by metal tier and membership type. Membership type is defined as new member, existing member, or transfer from other lines of business. Consistent with the rules in the 2025 Unified Rate Review Instructions, we began our morbidity projection by normalizing allowed claims for each of the cohorts outlined above for projected changes in age, gender, network and induced utilization.

We have not reflected any morbidity adjustments to the base period normalized allowed PMPMs by metal tier for the existing and transfer membership types. Exhibit 4 demonstrates how these PMPMs are unchanged from the current year YTD to remainder of current year. For the new membership type we have assumed a claims PMPM by metal equal to that of the existing members.

The resulting morbidity calculation is completed in steps split by year:

- Once the remainder of current year (2024) is completed, the membership and claims by metal are combined to derive a total estimate for the year.
- This result carries over to the rating year (2025) as the metal specific normalized PMPMs for the existing members.
- The assumed claims PMPMs by metal for the new members are again assumed to equal those for the existing members.
- Transfer members PMPMs are treated separately and reflect base period amounts projected forward. Our projection factor for these members is 1.250.
- Once these PMPMs are set, the final morbidity calculation is driven by the projected member months at these levels.

The total morbidity change from 2023 to 2025 is expected to be -1.5%, which is the factor used in Exhibit 1 in the calculation of the market adjustment index rate.

#### **Demographic Shift:**

Exhibit 6 in the Memorandum contains support for our adjustment due to the anticipated change in the average age of this population between the experience and projection periods. Our methodology measures the change in average demographic factor between the base and rating periods. The demographic factors used are from an internal age/gender curve with an approximate 4.5:1 ratio (age 64+ to age 21 factors). Factors for both time periods are weighted using member months and the ratio of the two is applied as our market level adjustment.

#### Plan Design Changes:

Exhibit 5 in the Memorandum details our support for this adjustment to account for anticipated changes in the average utilization of services due to differences in average cost sharing requirements between the experience and projection periods. Our methodology measures the change in the average induced utilization factor between the base and rating periods. The factors used are the metal level factors from the federal risk adjustment program. Once the average internal pricing AV, weighted by member months, is determined for both the experience and rating periods the linearly interpolated factor is determined. The ratio of these two factors is applied as our market level adjustment.

#### **Other Adjustments:**

Exhibit 7 in the Memorandum details our support for these adjustments. We are proposing additional other adjustments for changes to our capitation fees and drug rebates.

#### 4.4.3.3 Manual Rate Adjustments

Not applicable, as experience was determined to be fully credible.

#### 4.4.3.4 Credibility of Experience

Exhibit 2 in the Memorandum contains a summary of our base period experience, including member months. We have assigned full credibility to this experience.

#### 4.4.3.5 Establishing the Index Rate

The experience period index rate for this filing is \$754.26 and the projection period index rate is \$874.85. Both rates and the adjustments made to develop the projected amount from the experience period amount can be found on Exhibit 1 of the Memorandum. Specifically, these adjustments correspond to those outlined in sections 4.4.3.1 and 4.4.3.2.

#### 4.4.3.6 Development of the Market-wide Adjusted Index Rate

The Market-wide Adjusted Index Rate for the Individual market is \$772.51 and is derived by multiplying the projection period index rate with the market level adjustments for the risk adjustment program. Details for the risk adjustment program can be found below.

#### Reinsurance

There are no reinsurance recoveries applicable to this market.

#### **Risk Adjustment Payment/Charge:**

The Experience Period Risk Adjustment transfers in the URRT are based on the most recent Wakely estimates.

Our projected 2025 risk adjustment transfers, found in Exhibit 9, have been calculated consistent with our membership and morbidity projections found elsewhere in this filing. To project the risk adjustment factors from 2023 to 2025, we have assumed an increase in the statewide premium of 12.9% which reflects an estimate of an average 7.5% increase in 2024 and 5.0% increase in 2025. We have assumed that our CFI Individual non-Catastrophic market share will increase from 79.0% in 2023 to 80.0% in 2025 and that our CFI Individual non-Catastrophic PLRS ratio to the state will decrease from 1.072 in 2023 to 1.065 in 2025. The resultant estimate of risk adjustment is that the GHMSI receivable transfer PMPM for the Individual market will decrease from \$89.59 in 2023 to \$82.40 in 2025. Combined with the \$82.40 is a projected HCRP net PMPM payable of -\$0.26, which results in a total projected risk adjustment receivable of \$82.14.

The risk adjustment estimates above are calculated separately for the Individual market and the Small Group market as required. This approach is different than the blended approach used to calculate the Index Rate, and therefore there is an inconsistency between the risk assumed in rates and the claims data used in the calculation.

The risk adjustment estimates above are calculated separately for the Individual market and the Small Group market as required. This approach is different than the blended approach used to calculate the Index Rate, and therefore there is an inconsistency between the risk assumed in rates and the claims data used in the calculation. As a result of this approach, we are forced to rebalance the contribution to reserve assumed in the Individual filings so that our rate submissions reflect lower HMO rates than PPO by metal. If such rebalancing was not needed, the rate change for Individual GHMSI is estimated to be 1.9%.

If a merged Individual and Small Group risk adjustment methodology was used, the rate change for Individual GHMSI is estimated to be 2.2%.

#### **Exchange User Fees:**

There are no applicable exchange user fees since the rates in this filing are not offered on the Federal Marketplace.

#### 4.4.4 Plan Adjusted Index Rate

Exhibit 11 in the Memorandum displays the adjustments made for each plan. Every plan adjusted index rate is developed from the market adjusted index rate using only the allowable plan level modifiers as follows:

- Actuarial value and cost-sharing design of the plan: The actuarial value for each plan was determined using our own internal model and estimates the ratio of paid to allowed dollars given that plan's benefit design and the assumed allowed amount consistent with the projection period index rate. The assumed actuarial values also include a multiplicative factor applied uniformly across plans. The application of the AV to an index rate that is the same across all plans results in a member months weighted average AV (and resulting average paid PMPM assumed in rates) that may be materially deficient depending on the distribution of projected membership and actual cost. This factor accounts for the deficiency specific to the combined block of business. The URRT instructions state that this adjustment may take into account the benefit differences and utilization differences due to differences in cost-sharing. As a result, our plan adjusted index rates also include adjustments to account for the impact the metal level has on utilization.
- **Provider network**: All plans offered use the PPO network.
- Benefits in addition to EHBs: There is an adjustment to account for abortion coverage and adult vision (which are offered in addition to EHBs).
- Administrative costs: See Exhibit 10A in the Memorandum for the assumed values of the following additional items.
  - 1. Administrative Expense (G&A)
  - 2. Broker Commissions & Fees
  - 3. Federal Income Tax (FIT)
  - 4. Contribution to Reserve (Post-Tax)
  - 5. State Premium Tax
  - 6. PCORI Fee
  - 7. Risk Adjustment User Fee
  - 8. Exchange Assessment Fee

For each plan, we have taken the applicable adjustment factor from each category above and multiplied them by the market adjusted index rate to derive each plan adjusted index rate.

#### 4.4.5 Calibration

#### Age Curve Calibration

We have calibrated to the rounded weighted average age which was determined as the age for the factor nearest our projected average factor. We have used the standard DC age curve factors and weighted them using member months in our calculation.

A demonstration of how the plan adjusted index rates and the age curve are used to generate the schedule of premium rates for each plan can be found on Exhibit 13.

#### **Geographic Factor Calibration**

We have elected not to rate for geographic region.

#### **Tobacco Use Rating Factor Calibration**

We have elected not to rate for tobacco usage.

#### 4.4.6 Consumer Adjusted Premium Rate Development

The premium rate that a given consumer will be charged is calculated by first taking the plan adjusted index rate for that member's chosen plan and dividing by the projected average age rating factor. The resulting value is the base rate for that plan. The final step in determining a consumer adjusted premium rate is to

take the rate from the first step and multiply it by the corresponding factor for that member's age from the standard DC age curve. Rate charts are provided for all the consumer adjusted premiums.

#### 4.5 Projected Loss Ratio

The projected loss ratio for the rates provided in this file, using the Federally-prescribed MLR methodology, is 86.3% for the Individual market and 85.9% for the combined Individual/Small Group market. Details behind this calculation can be found in Exhibit 10B.

#### 4.6 Plan Product Information

#### 4.6.1 AV Metal Values

The majority of our 2025 plans include varying cost share levels for some services that depend on the setting in which care is delivered. The HHS AV calculator was used to compute two separate AVs for each impacted plan – one which applied the higher level of cost-share, and one which applied the lower level of cost-share. The results were blended assuming 85% of the designated services are rendered in higher cost-share setting and the remaining 15% at the lower, consistent with experience from our small group and individual markets. Plans without these features used the AV calculator without modification.

Additional details regarding the unique plan designs not accommodated by the HHS AV Calculator along with printouts for each plan are provided in the "Actuarial Memorandum" section of the Supporting Documentation tab of the SERFF filing.

#### 4.6.2 Membership Projections

The membership projections found in Worksheet 2 of the URRT were developed from enrollment as of 2/29/24 using assumptions for termination rates, new sales and transfers. The projections also incorporate any plan mappings anticipated between that month and the rating period. For new plan offerings where no plans are being uniformly modified into them, a minimum level of enrollment was assumed.

#### 4.6.3 Terminated Plans and Products

Plan mappings from the experience period to the rating period can be found in Appendix – Mapping.

#### 4.6.4 Plan Type

Each plan in Worksheet 2, Section I of the URRT contains a plan type that describes the plan exactly.

#### 4.7 Miscellaneous Instructions

#### 4.7.1 Effective Rate Review Information (Optional)

We have no additional exhibits.

#### 4.7.2 Reliance

We do not have any reliance to state.

#### **4.7.3 Actuarial Certification**

Included in the Memorandum.

Group Hospitalization & Medical Services, Inc. d.b.a. CareFirst BlueCross BlueShield (NAIC # 53007)

> Rate Filing # 2768 D.C. Individual Products Rate Filing Effective 1/1/2025

**Actuarial Memorandum** 

## Group Hospitalization & Medical Services, Inc. (NAIC # 53007) H.R. 3950 - Public Law 111-148 - Patient Protection and Affordable Care Act (ACA) D.C. Individual Products Rate Filing Effective 1/1/2025 Actuarial Certification

I, Cory Bream, am a(n) Assistant Actuary with CareFirst GHMSI doing business as CareFirst BlueCross BlueShield. I am a member of the American Academy of Actuaries (AAA) in good standing and have the education and experience necessary to perform the work. Rates were developed in accordance with the appropriate Actuarial Standards of Practice (ASOPs) and the AAA's Code of Professional Conduct. While other ASOPs apply, a sample listing is below.

i. ASOP No. 5, Incurred Health and Disability Claims

ii. ASOP No. 8, Regulatory Filings for Health Plan Entities

iii. ASOP No. 12, Risk Classification

iv. ASOP No. 23, Data Quality

v. ASOP No. 25, Credibility Procedures Applicable to Accident and Health, Group Term Life, and Property/Casualty Coverages

vi. ASOP No. 26, Compliance with Statutory and Regulatory Requirements for the Actuarial Certification of Small Employer Health and Benefit Plans

vii. ASOP No. 41, Actuarial Communications

viii. ASOP No. 50, Determining Minimum Value and Actuarial Value under the Affordable Care Act

I have been involved in the development of these rates, and to the best of my knowledge and understanding, the rates in this filing have been developed in accordance with the available regulations and guidance. Should new guidance be released, this filing may be revised. I certify that this filing has been prepared based on sound and commonly accepted actuarial principles, practices and assumptions in the aggregate for the legal entity.

I further certify the following:

1. The projected Index Rate is:

- a. In compliance with all applicable state and Federal statutes and regulations (45 CFR 156.80 and 147.102)
- b. Developed in compliance with the applicable Actuarial Standards of Practice
- c. Reasonable in relation to the benefits provided and the population anticipated to be covered
- d. Neither excessive nor deficient

2. The Index Rate and only the allowable modifiers as described in 45 CFR § 156.80(d)(1) and 45 CFR § 156.80(d)(2) were used to generate plan level rates. These rates have been calibrated to account for age (geography and tobacco are not applicable).

3. Consistent with 45 CFR § 156.135, the 2025 HHS Actuarial Values (AV) Calculator was used to determine the AV metal values shown in Worksheet 2 of Part I of the Unified Rate Review Template (URRT) for all plans except those specified. Where necessary, the AVs of the benefits proposed have been calculated with minimal modifications to the AV calculator as described in the Actuarial Memorandum.

As a qualifier to the opinion, the URRT does not demonstrate the process used by the issuer to develop the rates. Rather it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Marketplaces, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

For our initial submission, we have not adjusted 2025 rates to reflect potential impacts of Medicaid redeterminations. We reserve the right to update assumptions as appropriate during the review process.

The DISB has directed CareFirst to file rate submissions with an Actuarial Value Deficiency Factor that reflects the merged pool instead of market specific factors.

The DISB has directed CareFirst to file rate submissions that reflect lower HMO rates than PPO by metal. In order to meet this directive, the contribution to reserve assumed in this filing is 3.55%. The assumed contribution to reserve in this filing, aggregated with the assumed contribution to reserve in our BlueChoice filing, reflects a 2.00% contribution to reserve.

Cory Bream Digitally signed by Cory Bream Date: 2024.05.01 10:30:15

#### Exhibit 1 - Market Adjusted Index Rate Summary

|      |  | 2025         | Exhibit |
|------|--|--------------|---------|
| (1)  | Base Period Total Allowed                            | \$<br>754.70 | 2       |
| (2)  | Base Period Non-EHB PMPM                             | \$<br>0.44   | 2       |
| (3)  | Experience Period Index Rate                         | \$<br>754.26 |         |
| (4)  | Change in Morbidity                                  | 0.9849       | 4       |
| (5)  | Additional Population Adjustment                     | 1.0000       |         |
| (6)  | Induced Demand                                       | 0.9941       | 5       |
| (7)  | Projection Period Utilization and Network Adjustment | 1.0000       |         |
| (8)  | Demographic Adjustment                               | 1.0073       | 6       |
| (9)  | Area Adjustment                                      | 1.0000       |         |
| (10) | Additional "Other" Adjustments                       | 0.9914       | 7       |
| (11) | Annualized Trend                                     | 8.9%         | 8       |
| (12) | Months of Trend                                      | 24.0         |         |
| (13) | Unit cost & Utilization/1,000 Trend Factor           | 1.1863       |         |
| (14) | Projection Period Index Rate                         | \$<br>874.85 |         |
| (15) | Reinsurance Program                                  | 1.0000       |         |
| (16) | Risk Adjustment Program                              | 0.8830       | 9       |
| (17) | Federal Exchange User Fee                            | 1.0000       |         |
| (18) | Market Adjusted Index Rate                           | \$<br>772.51 |         |
|      | Without Risk Adjustment                              | \$<br>874.85 |         |

The projection period index rate was developed by projecting individual URRT service categories and then building up into a total PMPM. As a result the adjustments above may not match the referenced exhibits exactly because these represent the average factor when considering application at the service category level.

## Exhibit 2 - Base Period Experience

| Service Category                | Incurred Allowed  | AI | lowed PMPM | Utilization<br>Description | Utilization per<br>1,000 | C  | Average<br>ost/Service |

\*Rating factors by cohort for the rating period are based on average factors for each cohort from the current year to date. Weights are based on expected distribution of member months.

\*\*The rating period average age is determined from the member weighted average factor. Specifically it is linearly interpolated using the two age factors on the curve surrounding the member weighted average factor.

\*\*\*Applied uniformly to all plans

(3)/(2)

Key Drivers

- 1.) Trend
- 2.) Lower projected changes in pool morbidity
- 3.) Lower projected risk adjustment receivable

#### RATE FILING REQUIREMENTS INDIVIDUAL AND SMALL GROUP PLANS SOLD ON DC HEALTH LINK CHECK-LIST

INSTRUCTIONS: Include all required elements in the table below with the filed rates. The data elements listed in the Actuarial Memorandum should be consistent with the cover letter, if applicable.

| Number | Data Element                       | Requirement Description  | Individual and Small Group             |   |  |  |
|--------|------------------------------------|--|--|---|--|--|
|        |                                    |  | Has the Data Element Been<br>Included? | Location of the Data<br>Element                       |  |  |
| 1      | Purpose of Filing                  | State the purpose of the filing. Identify the applicable law. List the proposed changes to the base rates and rating factors, and provide a general summary.   | Yes                                    | Page 1 of the Actuarial<br>Memorandum PDF in<br>SERFF |  |  |
| 2      | Form Numbers                       | Form numbers should be listed in the actuarial memorandum.   | Yes                                    | Appendix - Form<br>Numbers_IND                        |  |  |
| 3      | HIOS Product ID                    | The HIOS product ID should be listed in the actuarial memorandum. Yes  |  | Exhibit 11 - Plan<br>Adjusted_IND                     |  |  |
| 4      | Effective Date                     | The requested effective date of the rate change. For filings effective $1/1/2017$ and later, follow filing due date requirements.  | Yes                                    | Page 1 of the Actuarial<br>Memorandum PDF in<br>SERFF |  |  |
| 5      | Market                             | Indicate whether the products are sold in the individual or small employer group market.   | Yes                                    | Page 1 of the Actuarial<br>Memorandum PDF in<br>SERFF |  |  |
| 6      | Status of Forms                    | Indicate whether the forms are open to new sales, closed, or a mixture of both, and whether the forms are grandfathered, non-grandfathered, or a mixture of both.  | Yes                                    | Appendix - Form<br>Numbers_IND                        |  |  |
| 7      | Benefits/Metal level(s)            | Include a basic description of the benefits of the forms referenced in<br>the filing and the metal level of each plan design.  | Yes                                    | Exhibit 11 - Plan<br>Adjusted_IND                     |  |  |
| 7.1    | AV Value                           | Provide the actuarial value of each plan design using the AV calculator developed and made available by HHS.   | Yes                                    | See the PDF file "AV<br>Screen Shots" in SERFF        |  |  |
| 8      | Average Rate Increase<br>Requested | The weighted average rate increase being requested, incremental and<br>year-over-year renewal. The weights should be based on premium<br>volume. In the small group market, please also provide weighted<br>average rate increase requested for 2025Q1 over 2024Q1; etc. | Yes                                    | Appendix - Rate<br>Change_IND                         |  |  |
| 9      | Maximum Rate<br>Increase Requested | The maximum rate increase that could be applied to a policyholder<br>based on changes to the base rate and rating factors, incremental and<br>year-over-year renewal. (Does not include changes in the<br>demographics of the covered members.)                          | Yes                                    | Appendix - Rate<br>Change_IND                         |  |  |

| Number | Data Element                                | Requirement Description  | Individual and S                       | mall Group                      |
|--------|---|--|--|---------------------------------|
|        |   |  | Has the Data Element Been<br>Included? | Location of the<br>Data Element |
| 10     | Minimum Rate Increase<br>Requested          | The minimum rate increase that could be applied to a policyholder<br>based on changes to the base rate and rating factors, incremental and<br>year-over-year renewal. (Does not include changes in the<br>demographics of the covered members.)  | Yes                                    | Appendix - Rate<br>Change_IND   |
| 11     | Absolute Maximum<br>Premium Increase        | The absolute maximum year-over-year renewal rate increase that<br>could be applied to a policyholder, including demographic changes<br>such as aging.  | Yes                                    | Appendix - Max<br>Renewal_IND   |
| 12     | Average Renewal Rate<br>Increase for a Year | Calculate the average renewal rate increase, weighted by written<br>premium, for renewals in the year ending with the effective period of<br>the rate filing. The calculation must be performed for each HIOS<br>product ID.   | Yes                                    | Appendix - Rate<br>Change_IND   |
| 13     | Rate Change History                         | Rate change history of the forms referenced in the filing. If<br>nationwide experience is used in developing the rates, provide<br>separately the rate history for District of Columbia and the<br>nationwide average rate history.  | Yes                                    | Appendix - Rate<br>Change_IND   |
| 14     | Exposure                                    | Current number of policies, certificates and covered lives.  | Yes                                    | Appendix - Rate<br>Change_IND   |
| 15     | Member Months                               | Number of members in force during each month of the base<br>experience period used in the rate development and in each of the<br>two preceding twelve-month periods.   | Yes                                    | Appendix - Total<br>Experience  |
| 16     | Past Experience                             | Provide monthly earned premium and incurred claims for the base<br>experience period used in the rate development and each of the two<br>preceding twelve-month periods.   | Yes                                    | Appendix - Total<br>Experience  |
| 17     | Index Rate                                  | Provide the index rate.  | Yes                                    | Exhibit 1 - Summary_IND         |
| 17.1   | Rate Development                            | Show base experience used to develop rates and all adjustments and<br>assumptions applied to arrive at the requested rates. For less than<br>fully credible blocks, disclose the source of the base experience data<br>used in the rate development and discuss the appropriateness of the<br>data for pricing the policies in the filing. | Yes                                    | Appendix - Total<br>Experience  |
| 18     | Credibility Assumption                      | If the experience of the policies included in the filing is not fully<br>credible, state and provide support for the credibility formula used in<br>the rate development.  | No                                     | Not applicable                  |

| Number | Data Element                      | Requirement Description   | Individual and Small Group             |                                  |  |  |
|--------|-----------------------------------|---|--|----------------------------------|--|--|
|        |                                   |   | Has the Data Element Been<br>Included? | Location of the<br>Data Element  |  |  |
| 19     | Trend Assumption                  | Show trend assumptions by major types of service as defined by<br>HHS in the Part I Preliminary Justification template, separately by<br>unit cost, utilization, and in total. Provide the development of the<br>trend assumptions.   | Yes                                    | Exhibit 8 - Trend                |  |  |
| 20     | Cost-Sharing Changes              | Disclose any changes in cost sharing for the plans between the base<br>experience period for rating and the requested effective date. Show<br>how the experience has been adjusted for cost-sharing changes in the<br>rate development. Provide support for the estimated cost impact of<br>the cost-sharing changes.   | No                                     | Not applicable                   |  |  |
| 21     | Benefit Changes                   | Disclose any changes in covered benefits for the plans between the<br>base experience period for rating and the requested effective date.<br>Show how the experience has been adjusted for changes in covered<br>benefits in the rate development. Provide support for the estimated<br>cost impact of the benefit changes.   | Yes                                    | Exhibit 7 - Other<br>Adjustments |  |  |
| 22     | Plan Relativities                 | For rate change filings, if the rate change is not uniform for all plan<br>designs, provide support for all requested rate changes by plan<br>design. Disclose the minimum, maximum, and average impact of the<br>changes on policyholders.<br>For initial filings, provide the derivation of any new plan factors.   | Yes                                    | Appendix - Rate<br>Change_IND    |  |  |
| 23     | Rating Factors                    | Provide the age and other rating factors used. Disclose any changes to rating factors, and the minimum, maximum, and average impact on policyholders. Provide support for any changes.  | Yes                                    | Exhibit 14 - Age Slope           |  |  |
| 23.1   | Wellness Programs                 | Describe any wellness programs (as defined in section 2705(j) of the PHS Act) included in this filing. <sup>1</sup>   | No                                     | Not applicable                   |  |  |
| 24     | Distribution of Rate<br>Increases | Anticipated distribution of rate increases due to changes in base<br>rates, plan relativities, and rating factors. This need not include<br>changes in demographics of the individual or group.   | Yes                                    | Appendix - Rate<br>Change_IND    |  |  |
| 25     | Claim Reserve Needs               | Provide the claims for the base experience period separately for paid<br>claims, and estimated incurred claims (including claim reserve).<br>Indicate the incurred period used for the base period. Indicate the<br>paid-through date of the paid claims, and provide a basic description<br>of the reserving methodology for claims reserves and contract<br>reserves, if any. Provide margins used, if any. | Yes                                    | Appendix - Total<br>Experience   |  |  |

<sup>1</sup>42 U.S. Code § 300gg–4(j)

| Number | Data Element   | Requirement Description   | Individual and S                       | mall Group   |
|--------|--|---|--|--|
|        |  |   | Has the Data Element Been<br>Included? | Location of the<br>Data Element                                |
| 26     | Administrative Costs of<br>Programs that Improve<br>Health Care Quality    | Show the amount of administrative costs included with claims in the<br>numerator of the MLR calculation. Show that the amount is<br>consistent with the most recently filed Supplemental Health Care<br>Exhibit or provide support for the difference.  | Yes                                    | Exhibit10A - DICR_IND<br>and Exhibit 10B - Fed<br>MLR_IND      |
| 27     | Taxes and Licensing or<br>Regulatory Fees                                  | Show the amount of taxes, licenses, and fees subtracted from<br>premium in the denominator of your medical loss ratio calculation(c).<br>Show that the amount is consistent with the most recently filed<br>Supplemental Health Care Exhibit or provide support for the<br>difference.  | Yes                                    | Exhibit10A - DICR_IND<br>and Exhibit 10B - Fed<br>MLR_IND      |
| 28     | Medical Loss Ratio<br>(MLR)  | Demonstrate that the projected loss ratio, including the requested rate<br>change, meets the minimum MLR. Show the premium, claims, and<br>adjustments separately with the development of the projected<br>premium and projected claims (if not provided in the rate<br>development section). If the loss ratio falls below the minimum for<br>the subset of policy forms in the filing, show that when combined<br>with all other policy forms in the market segment in District of<br>Columbia, the loss ratio meets the minimum.   | Yes                                    | Exhibit10A - DICR_IND<br>and Exhibit 10B - Fed<br>MLR_Combined |
| 29     | Risk Adjustment  | Provide rate information relating to the Risk Adjustment program.<br>Information should include assumed Risk Adjustment user fees, Risk<br>Adjustment PMPM excluding user fees and assumed distribution of<br>enrollment by risk score, plan, and geographical area. Provide<br>support for the assumptions, including any demographic changes.<br>Provide information/study on the development of risk scores and<br>Risk Adjustment PMPM. Provide previous year-end estimated risk<br>adjustment payable or receivable amount and quantitative support for<br>the amount. | Yes                                    | Exhibit 9 - Risk<br>Adjustment_IND                             |
| 30     | Past and Prospective<br>Loss Experience<br>Within and Outside the<br>State | Indicate whether loss experience within or outside the state was used<br>in the development of proposed rates. Provide an explanation for<br>using loss experience within or outside the state.   | Yes                                    | Not applicable   |

| Number | Data Element  | Requirement Description   | Individual and Small G                 | froup   |
|--------|---|---|--|---|
|        |   |   | Has the Data Element Been<br>Included? | Location of the<br>Data Element                                       |
| 31     | A Reasonable Margin<br>for Reserve Needs                      | Show the assumed Margin for Reserve Needs used in the development of proposed rates. Margin for Reserve Needs includes factors that reflect assumed contributions to the company's surplus or the assumed profit margin. Demonstrate how this assumption was derived, how the assumption has changed from prior filings, and provide support for changes. If the assumption for Qualified Health Plans exceeds 3% as assumed in the risk corridor formula, justify the excess in light of the company's surplus position.   | Yes                                    | Exhibit10A - DICR_IND<br>and Exhibit 10B - Fed<br>MLR_IND             |
| 32     | Past and Prospective<br>Expenses                              | <ul> <li>Indicate the expense assumptions used in the development of proposed rates. Demonstrate how this assumption was derived. Show how this assumption has changed from prior filings, and provide support for any change.</li> <li>Provide the assumed administrative costs in the following categories: <ul> <li>Salaries, wages, employment taxes, and other employee benefits</li> <li>Commissions</li> <li>Taxes, licenses, and other regulatory fees</li> <li>Cost containment programs / quality improvement activities</li> <li>All other administrative expenses</li> <li>Total</li> </ul> </li> </ul> | Yes                                    | Exhibit10A - DICR_IND<br>and Exhibit 10B - Fed<br>MLR_IND             |
| 33     | Any Other Relevant<br>Factors Within and<br>Outside the State | Show any other relevant factors that have been considered in the development of the proposed rates. Demonstrate how any related assumptions were derived. Show how these assumptions have changed from prior filings and provide support for any change.  | Yes                                    | Actuarial Memorandum  |
| 34     | Other   | Any other information needed to support the requested rates or to comply with Actuarial Standard of Practice No. 8.   | Yes                                    | Actuarial Memorandum  |
| 35     | Actuarial Certification                                       | Signed and dated certification by a qualified actuary that the<br>anticipated loss ratio meets the minimum requirement, the rates are<br>reasonable in relation to benefits, the filing complies with the laws<br>and regulations of the District of Columbia and all applicable<br>Actuarial Standards of Practice, including ASOP No. 8, and that the<br>rates are not unfairly discriminatory.   | Yes                                    | Actuarial Certification is<br>included in the Actuarial<br>Memorandum |

Mr. Philip Barlow Associate Commissioner for Insurance Department of Insurance, Securities and Banking

Re: Group Hospitalization and Medical Services, Inc. Individual, Non-Medigap Rate Filing Cover Letter

Mr. Barlow,

In accordance with DISB requirements this letter has been submitted as cover for our 2025 ACA plan rate filing submitted 5/1/2024. Please note the required information below:

- a. Company Name: Group Hospitalization and Medical Services, Inc. (GHMSI)
- b. NAIC Company Code: 53007
- c. Unique Company Filing Number: 2768
- d. Date Submitted: 5/1/2024
- e. Proposed Effective Date: 1/1/2025.
- f. **Type of Product:** PPO On Exchange
- g. Individual or Group: Individual, Non-Medigap
- h. **Scope and Purpose of Filing:** This filing has been submitted to propose the rate actions listed below in section k for all non-grandfathered ACA compliant plans offered by GHMSI.
- i. **Indication Whether Initial Filing or Change:** This filing proposes a change to existing rates (from our previous SERFF Filing #CFAP-134065040).
- j. Indication if no DC Policyholders: This filing proposes rate actions to our plans sold in DC. DC policyholders of GHMSI ACA plans will be impacted.
- k. **Overall Premium Impact of Filing on DC Policyholders:** Proposed average rate increase for 2025 is 3.6%.
- I. Contact Information:
  - a. Name: Cory Bream, ASA, MAAA
  - b. Telephone Number: 410-998-5308
  - c. Email: Cory.Bream@Carefirst.com
  - d. Fax: 410-505-2192

For further detail and support for the rate actions proposed above please reference the Actuarial Memorandum submitted on 5/1/2024.

Sincerely,

Cory Bream Digitally signed by Cory Bream Date: 2024.05.01 10:45:52 -0400'

Cory Bream, ASA, MAAA Assistant Actuary

#### Rate Filing Justification Part II (Plain Language Summary)

Pursuant to 45 CFR 154.215, health insurance issuers are required to file Rate Filing Justifications. Part II of the Rate Filing Justification for rate increases and new submissions must contain a written description that includes a simple and brief narrative describing the data and assumptions that were used to develop the proposed rates. The Part II template below must be filled out and uploaded as an Adobe PDF file under the Consumer Disclosure Form section of the Supporting Documentation tab.

| Name of Company                  | Group Hospitali | Group Hospitalization & Medical Services, Inc. |      |             |  |  |  |
|----------------------------------|-----------------|--|------|-------------|--|--|--|
| SERFF tracking number            | CFAP-134065040  |  |      |             |  |  |  |
| Submission Date                  | 5/1/2024        |  |      |             |  |  |  |
| Product Name                     | BluePreferred   |  |      |             |  |  |  |
|                                  |                 |  |      |             |  |  |  |
| Market Type:                     | ۲               | Individual                                     | 0    | Small Group |  |  |  |
| Rate Filing Type:                | ۲               | Rate Increase                                  | 0    | New Filing  |  |  |  |
| Scope and Range of the Increase: |                 |  |      |             |  |  |  |
| The                              | 3.6             | % increase is requested beca                   | iuse | :           |  |  |  |

The main drivers supporting the rate change are 1) trend, 2) lower projected changes in pool morbidity, and 3) a lower projected risk adjustment receivable.

This filing will impact:# of policyholder's5,590# of covered lives7,578

The average, minimum and maximum rate changes increases are:

| •  | Average Rate Change: The average premium change, by percentage, across all policy holders if the filing is approved | 3.6  | % |
|----|---|------|---|
| ٠  | Minimum Rate Change: The smallest premium increase (or largest decrease), by percentage, that any one policy holder | 1.4  | % |
| v  | ould experience if the filing is approved   |      |   |
| •  | Maximum Rate Change: The largest premium increase, by percentage, that any one policy holder would experience       | 16.7 | % |
| it | the filing is approved  |      |   |

Individuals within the group may vary from the aggregate of the above increase components as a result of: Product selection, changes in age factors, and changes in family composition.

#### **Financial Experience of Product**

The overall financial experience of the product includes:

In 2023, a total of \$65.6 million in premium was collected and \$73.8 million in claims were paid out. We received \$8.1 million in risk adjustment, for a loss ratio of 100.2%. However, the rate increase of the product is driven partially by the combined Individual and Small group experience, which collected \$260.9 million in premium and paid out \$242.4 million in claims and received \$25.4 million in risk adjustment for a loss ratio of 83.2%.

The rate increase will affect the projected financial experience of the product by: The proposed rate increases are aimed to bring the loss ratio for the combined Individual/small group pool to a projected 83.2%.

| Components of Increase  | Components of Increase<br>The request is made up of the following components:                              |  |  |  |  |  |  |  |  |
|---|--|--|--|--|--|--|--|--|--|
| Trend Increases –   | 8.9 % of the   | 3.6 % total filed increase   |  |  |  |  |  |  |  |
| 1. Medical Utilization Chang  | jes –Defined as the increase in total  | l plan claim costs not attributable to   |  |  |  |  |  |  |  |
| changes in the unit cost of une   | derlying services, or renegotiation of   | of provider contracts. Examples include changes in the mix of services utilized, or an |  |  |  |  |  |  |  |
| increase/decrease in the frequ  | uency of service utilization.  |  |  |  |  |  |  |  |  |
| This component is   | 4.9 % of the   | 3.6 % total filed increase.  |  |  |  |  |  |  |  |
| 2. Medical Price Changes – Defined as the increase in total plan claim costs attributable to changes in |  |  |  |  |  |  |  |  |  |
| , .   | the unit cost of underlying services, or renegotiation of provider contracts.                              |  |  |  |  |  |  |  |  |
| This component is   | 3.9 % of the   | 3.6 % total filed increase.  |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |
| Other Increases –   | (4.9) % of the   | 3.6 % total filed increase   |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |
| •   | 1. Medical Benefit Changes Required by Law – Defined as any new mandated plan benefit changes, as mandated |  |  |  |  |  |  |  |  |
| by either State or Federal Reg<br>This component is   | 0.0 %  of the  | 3.6 % total filed increase.  |  |  |  |  |  |  |  |
| This component is   |  |  |  |  |  |  |  |  |  |
| 2. Medical Benefit Changes  | Not Required by Law – Defined as c   | changes in plan benefit design made by the   |  |  |  |  |  |  |  |
| •   | ired by either State or Federal Regu   |  |  |  |  |  |  |  |  |
| This component is   | -1.9 % of the  | 3.6 % total filed increase.  |  |  |  |  |  |  |  |
| 3 Changes to Administration   | n Costs – Defined as increases in th   | e costs of providing insurance coverage.   |  |  |  |  |  |  |  |
| -   |  | axes, and general business expenses such as rent, salaries,                            |  |  |  |  |  |  |  |
| and overhead.   | •  |  |  |  |  |  |  |  |  |
| This component is   | 1.4 % of the   | 3.6 % total filed increase.  |  |  |  |  |  |  |  |
| 4 Changes to Profit Margin  | - Defined as increases to company  | surplus or changes as an additional margin to cover                                    |  |  |  |  |  |  |  |
| the risk of the company.  |  |  |  |  |  |  |  |  |  |
| This component is   | 0.5 % of the   | 3.6 % total filed increase.  |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |
| 5. Other – Defined as:  |  |  |  |  |  |  |  |  |  |
| The base period experience PI   | The base period experience PMPM of the combined pool came in lower than expected.                          |  |  |  |  |  |  |  |  |
| This component is   | (5.0) % of the   | 3.6 % total filed increase.  |  |  |  |  |  |  |  |
